Epistemics Of Development Economics:

Epistemics of Development Economics Kofi Kissi Dompere, Manzur Ejaz, 1995-08-22 The effective use of development economic theories in practice is limited the authors contend by the lack of explicit criterion for judging their scientific content The directional progress of critical research and teaching is also constrained by this deficiency This study advances a meta theory designed to assist in evaluating the scientific validity of theories in economic development and how these theories can be improved to assist social practice Using this model the study then examines existing theories dividing them into explanatory and prescriptive theories The explanatory theories include the stage based theories of Marx Schumpeter and Rostow and factor based theories including capital based human capital based and technology based theories The prescriptive theories include explanatory theory based prescriptions interventionist prescriptive theories and theories of economic planning In conclusion the authors contend that modern analysis of development economics is plagued with logical ills misleading notions and a weak theoretical structure that lacks scientific appeal Most of the theories except for those of Marx and Schumpeter neglect an analysis of the mechanism of change Epistemics of Development Economics K. K. Dompere, 1995 *Islamic Epistemics and Socioeconomics* Masudul Alam Choudhury, 2025-06-16 This book presents selected essays on the epistemological foundation of the Islamic world system in the light of the exegesis of the Qur'an to develop existing understandings of Islamic economics A selection of key contributions by one of the world's leading figures working at the nexus of Islamic social sciences Islamic philosophy and Islamic economics the book integrates applied foundations of Islamic economics and Islamic philosophy presenting a critical outlook on the existing state of Islamic economics and Islamic finance within a broader framework of socio-scientific enquiry philosophical perspectives on Islam and philosophy of science The author confronts the absence of epistemic groundwork upon which any fresh social and scientific enquiry is developing in Islamic economics casting the discussion within an explanatory framework of the unity of knowledge as bestowed by Islamic monotheistic law which substantively characterizes the generalization and details of everything The present work unravels this objective methodology and its application with reference to a limited number of issues and problems in global economics Complex and multidisciplinary in its treatment this book presents the key arguments on mathematical philosophical and socio-scientific modes of inquiry in deriving developing and empirically applying the Qur'anic methodology of the unity of knowledge to economic problems It is relevant to scholars and advanced students in social scientific studies of Islam Islamic theology and philosophy and Islamic economics and finance **The Theory of Epistemic Fields** Kofi Kissi Dompere, 2024-08-13 The book is about the development of the theory of epistemic fields with the corresponding relational and information fields as a framework for the understanding of strategies and tactics of the theory of knowing as the production of intellectual investment flows and the theory of knowledge accumulation as the production of intellectual capital stocks in systems of factories and departments providing the foundations for the development of open algorithms in the open

space of problem solution dualities The concepts and the roles of thinking and reasoning with curiosity creativity hope Ill posed problems phantom problems unsolved problems misinformation disinformation fake news and courage are introduced defined and analyzed on the cognitive journeys over the space of ignorance knowledge dualities where dualistic polar conflicts between duals in the space of ignorance knowledge dualities are resolved with the instruments of fuzzy optimization the results of which are used to induced the zones of ignorance the zones of knowledge and the zones of contentions A complete development of the set of connecting paths of spaces and sub spaces is provided where all varieties categories and spaces reside in dualistic polar structures with knowledge stock viewed as a single tree with the same roots one trunk many branches and a fruit cocktail The ontological space contains the space of actual potential dualities as the primary category of knowing and the epistemological space contains the space of imagination reality dualities as the derived category of knowing within the space of primary derived dualities The space of potentials contains the space of imaginations which contains the sub spaces of possibility impossibility probability improbability and possibility probability dualities with corresponding spaces of necessity freedom and anticipation expectation dualities leading to the conception of the possible world impossible world dualities in the space of semantic non semantic dualities This book is also a continuation of the sequence of my works on the theories of paradigms of thought rationality info statics info dynamics entropy problem solution dualities in self contained mathematics and philosophy and their relational connectivity to information language knowing knowledge cognitive practices and open machining learning relative to nominalism and the space of construction reduction dualities over the spaces of fundamental applied production consumption input output and cost benefit dualities

The Theory of Problem-Solution Dualities and Polarities Kofi Kissi Dompere, 2022-04-25 This book is concerned with the development of the understanding of the relational structures of information knowledge decision choice processes of problems and solutions in the theory and practice regarding diversity and unity principles of knowing science non science and information knowledge systems through dualistic polar conditions of variety existence and nonexistence It is a continuation of the sequence of my epistemic works on the theories on fuzzy rationality info statics info dynamics entropy and their relational connectivity to information language knowing knowledge cognitive practices relative to variety identification problem solution dualities variety transformation problem solution dualities and variety certainty uncertainty principle in all areas of knowing and human actions regarding general social transformations It is also an economic theoretic approach in understanding the diversity and unity of knowing and science through neuro decision choice actions over the space of problem solution dualities and polarities The problem solution dualities are argued to connect all areas of knowing including science and non science social science and non social science into unity with diversities under neuro decision choice actions to support human existence and nonexistence over the space of static dynamic dualities The concepts of diversity and unity are defined and explicated to connect to the tactics and strategies of decision choice actions over the space of problem solution dualities The concepts of problem and solution are

defined and explicated not in the space of absoluteness but rather in the space of relativity based on real cost benefit conditions which are shown to be connected to the general parent offspring infinite process where every solution generates new problem s which then generates a search for new solutions within the space of minimum maximum dualities in the decision choice space under the principle of non satiation over the space of preference non preference dualities with analytical tools drawn from the fuzzy paradigm of thought which connects the conditions of the principle of opposites to the conditions of neuro decision choice actions in the zone of variety identifications and transformations The Monograph would be useful to all areas of Research Learning and Teaching at Advanced Stages of Knowing and Knowledge Production

African Philosophy and the Epistemic Marginalization of Women Jonathan Chimakonam, Louise du Toit, 2018-04-20 This book examines the underexplored notion of epistemic marginalization of women in the African intellectual place Women s issues are still very much neglected by governments corporate bodies and academics in sub Saharan Africa The entrenched traditional world views which privilege men over women make it difficult for the modern day challenges posed by the neglect of the feminine epistemic perspective to become obvious Contributors address these issues from both theoretical and practical perspectives demonstrating what philosophy could do to ameliorate the epistemic marginalization of women as well as ways in which African philosophy exacerbates this marginalization Philosophy is supposed to teach us how to lead the good life in all its ramifications why is it failing in this duty in Africa where the issue of women s epistemic vision is concerned The chapters raise feminist agitations to a new level beginning from the regular campaigns for various women s rights and reaching a climax in an epistemic struggle in which the knowledge controlling power to create acquire evaluate regulate and disseminate is proposed as the last frontier of feminism

Epistemic Economics and Organization Anna Grandori, 2013-04-26 This book proposes a new approach to economics management and organization that should help in making economic organization wise innovative and robust in an uncertain and risky world Although the modern economy and society is knowledge intensive Anna Grandori argues that the dominant economic organizational and behavioural models neglect to a large extent the problem of valid knowledge construction and effective knowledge governance The book integrates inputs from economics and behavioural science with insights from the philosophy of knowledge to define new micro foundations neither a calculative deductive and omniscient rational actor nor an experiential adaptive and biased behavioural actor but a knowledgeable and imaginative epistemic actor The implications for contracts and organizations sustained also by insights from law are shown to be far reaching including a new view of the nature of the firm as an entity establishing agreement under which to discover uses of resources under uncertainty and as a democratic institution

Epistemic Communities, Constructivism, and International Environmental Politics Peter Haas, 2015-08-20 Epistemic Communities Constructivism and International Environmental Politics brings together 25 years of publications by Peter M Haas The book examines how the world has changed significantly over the last 100 years discusses the need for new

constructivist scholarship to understand the dynamics of world politics and highlights the role played by transnational networks of professional experts in global governance Combining an intellectual history of epistemic communities with theoretical arguments and empirical studies of global environmental conferences as well as international organizations and comparative studies of international environmental regimes this book presents a broad picture of social learning on the global scale In addition to detailing the changes in the international system since the Industrial Revolution Haas discusses the technical nature of global environmental threats Providing a critical reading of discourses about environmental security this book explores governance efforts to deal with global climate change international pollution control stratospheric ozone and European acid rain With a new general introduction and the addition of introductory pieces for each section this collection offers a retrospective overview of the author s work and is essential reading for students and scholars of environmental politics international relations and global politics

Theories of Knowing and Knowledge Production

Kofi Kissi Dompere,2024-09-26 The book is devoted to exploring the organizational dimensions of the general space of problem solution dualities within epistemic fields to examine the diversity and unity of knowing and information knowledge production in science and non science and how to account for and explain the forces of variety transformations as induced by decision choice actions in creating the functor space and the space of categorial converters as well as to integrate decision choice qualities of curiosity creativity hope despair success failure and their relationships with epistemic anomalies in the production of intellectual investment flows and capital stocks and the rise and fall of institutions in response to the dynamics of the open space of problem solution dualities with open algorithms under the principle of non satiation The conditions and sources of uncertainties in human actions are traced though the space of ontic epistemic dualities as generated by cognitive capacity limitations leading to the concepts of imagination possibility and probability with corresponding worlds and then link to the discussions on thinking reasoning processes with goals objectives and visions of education in social set ups The concepts and phenomena of anticipation necessity expectation freedom anomaly curiosity creativity hope despair success and failure contained in the space of imaginations are defined under the concepts of onticity and epistemicity where their roles in the dualistic polar journeys are discussed analyzed and connected to epistemic transversality conditions under the principle of opposites relative to the conditions of input output and cost benefit dualities The book is to fill in some of the important phenomena needed in my investigation of theory of knowing as a production of intellectual investment flows and information knowledge accumulation as the production of intellectual capital stocks relative to the disequilibrium dynamics of human intellectual heritage based on fuzzy paradigm of thought thus providing an added foundation in integrating subjective elements into the development of open artificial intelligence where cost benefit values operate to determine varieties over the spaces of true false and yes no dualities in machine learning

Experts and Epistemic Monopolies Roger Koppl,Steven Horwitz,Laurent Dobuzinskis,2012-10-15 Under what conditions of supply and demand are experts likely to give us good

advice When is expert failure more likely Do entrepreneurs challenge existing expertise Are they experts themselves This title brings a heterogeneous collection of thinkers some Austrian and to engage the problem of experts Institutional Learning and Knowledge Transfer Across Epistemic Communities Elias G. Carayannis, Ali Pirzadeh, Denisa Popescu, 2011-11-25 Over the past several decades as the pace of globalization has accelerated operational issues of international coordination have often been overlooked For example the global financial crisis that began in 2007 is attributed in part to a lack of regulatory oversight As a result supranational organizations such as the G 20 the World Bank and the International Monetary Fund have prioritized strengthening of the international financial architecture and providing opportunities for dialogue on national policies international co operation and international financial institutions Prevailing characteristics of the global economic systems such as the increasing power of financial institutions changes in the structure of global production decline in the authority of nation states over their national economy and creation of global institutional setting e g global governance have created the conditions for a naturally evolving process towards enabling national epistemic communities to create institutions that comply with global rules and regulations can control crises In this context transfer of technical knowledge from the larger organizations and its global epistemic communities to member communities is becoming a policy tool to convince participants in the international system to have similar ideas about which rules will govern their mutual participation In the realm of finance and banking regulation the primary focus is on transfer of specialized and procedural knowledge in technical domains such as accounting procedures payment systems and corporate governance principles thereby promoting institutional learning at national and local levels In this volume the authors provide in depth analysis of initiatives to demonstrate how this type of knowledge generated at the international organization level is codified into global standards and disseminated to members particularly in the developing world where the legal and regulatory infrastructure is often lacking They argue that despite the challenges when a country intends to join the global system its institutions and economic structures need to move toward the global norms In so doing they shed new light on the dynamics of knowledge transfer financial regulation economic development with particular respect to supporting global standards and avoiding future crises **The Political Economy of Human Behaviour and Economic Development** Sangaralingam Ramesh, 2022-09-24 This book explores how economics can be based around studies on human behaviour rather than relying on overly simplified assumptions generated from mathematical modelling Through examining the link between human economic activity and psychology specifically regarding the development of cognitive and non cognitive ability insight into the human dimensions of economic development and the sources of human inequality are provided This book aims to question assumptions of rationality utilised in neoclassical economic theory and suggest how economic activity can be better understood through a deeper recognition of human behaviour It will be relevant to students and researchers interested in the political economy and behavioural economics Epistemic Foundations of Fuzziness K. K. Dompere, Kofi

Kissi Dompere, 2009-03-13 This monograph is a treatment on optimal fuzzy rationality as an enveloping of decision choice rationalities where limited information vagueness ambiguities and inexactness are essential characteristics of our knowledge structure and reasoning processes The volume is devoted to a unified system of epistemic models and theories of decision choice behavior under total uncertainties composed of fuzzy and stochastic types The unified epistemic analysis of decision choice models and theories begins with the question of how best to integrate vagueness ambiguities limited information subjectivity and approximation into the decision choice process The answer to the question leads to the shifting of the classical paradigm of reasoning to fuzzy paradigm This is followed by discussions and establishment of the epistemic foundations of fuzzy mathematics where the nature and role of information and knowledge are explicated and represented The epistemic foundation allows total uncertainties that constrain decision choice activities knowledge enterprise logic and mathematical structures as our cognitive instruments to be discussed in reference to the phenomena of fuzzification defuzzification and fuzzy logic The discussions on these phenomena lead us to analyze and present models and theories on decision choice rationality and the needed mathematics for problem formulation reasoning and computations The epistemic structures of two number systems made up of classical numbers and fuzzy numbers are discussed in relation to their differences similarities and relative relevance to decision choice rationality The properties of the two number systems lead to the epistemic analysis of two mathematical systems that allow the partition of the mathematical space in support of decision choice space of knowledge and non knowledge production into four cognitively separate but interdependent cohorts whose properties are analyzed by the methods and techniques of category theory The four cohorts are identified as non fuzzy and non stochastic non fuzzy and stochastic both of which belong to the classical paradigm and classical mathematical space and fuzzy and non stochastic and fuzzy and stochastic cohorts both of which belong to the fuzzy paradigm and fuzzy mathematical space The differences in the epistemic foundations of the two mathematical systems are discussed The discussion leads to the establishment of the need for fuzzy mathematics and computing as a new system of reasoning in both exact and inexact sciences The mathematical structures of the cohorts are imposed on the decision choice process to allow a grouping of decision choice models and theories The corresponding classes of decision choice theories have the same characteristics as the logico mathematical cohorts relative to the assumed information knowledge structures The four groupings of models and theories on decision choice activities are then classified as 1 non fuzzy and non stochastic class with exact and full information knowledge structure no uncertainty 2 non fuzzy and stochastic class with exact and limited information knowledge structure stochastic uncertainty 3 fuzzy and non stochastic class with full and fuzzy information knowledge structure fuzzy uncertainty and 4 Fuzzy and stochastic class with fuzzy and limited information knowledge structure fuzzy and stochastic uncertainties All these different classes of decision choice problems have their corresponding rationalities which are fully discussed to present a unified logical system of theories on decision choice process The volume is concluded

with epistemic discussions on the nature of contradictions and paradoxes viewed as logical decision choice problems in the classical paradigm and how these contradictions and paradoxes may be resolved through fuzzy paradigm and the methods and techniques of optimal fuzzy decision choice rationality The logical problem of sorites paradox with its resolution is given as an example Interested audience includes those working in the areas of economics decision choice theories philosophy of sciences epistemology mathematics computer science engineering cognitive psychology fuzzy mathematics and mathematics of fuzzy stochastic processes

Change and Continuity at the World Bank Peter J. Hammer, 2013-01-01 This fascinating book examines the World Bank's capacity for change illustrating the influence of overlapping political organizational and epistemic constraints Through comprehensive historical and economic analysis Peter J Hammer illuminates the difficulties faced by recent attempts at reform and demonstrates the ways in which the training and socialization of Bank economists work to define the policy space available for meaningful change The author examines the patterns of change and continuity at the World Bank during the presidencies of James Wolfensohn 1995 2005 Paul Wolfowitz 2005 2007 and Robert Zoellick 2007 2012 and discusses the role that various Chief Economists have played in the evolution of the Bank's research activities His analysis of Bank reforms both successful and unsuccessful demonstrates how neoclassical economics sets the Bank's research and development agendas and limits reform possibilities derived from different academic traditions This clear and balanced account is an important case study in the role that epistemic constraints can play in the formation of public policy with implications for both the World Bank and other international organizations Students professors and researchers with an interest in economic development institutional economics and policy studies will find it an invaluable resource as will government officials and practitioners working in international development

The Routledge Handbook of Epistemic Injustice Ian James Kidd, José Medina, Gaile Pohlhaus, Jr., 2017-03-31 In the era of information and communication issues of misinformation and miscommunication are more pressing than ever Epistemic injustice one of the most important and ground breaking subjects to have emerged in philosophy in recent years refers to those forms of unfair treatment that relate to issues of knowledge understanding and participation in communicative practices The Routledge Handbook of Epistemic Injustice is an outstanding reference source to the key topics problems and debates in this exciting subject The first collection of its kind it comprises over thirty chapters by a team of international contributors divided into five parts Core Concepts Liberatory Epistemologies and Axes of Oppression Schools of Thought and Subfields within Epistemology Socio-political Ethical and Psychological Dimensions of Knowing Case Studies of Epistemic Injustice As well as fundamental topics such as testimonial and hermeneutic injustice and epistemic trust the Handbook includes chapters on important issues such as social and virtue epistemology objectivity and objectification implicit bias and gender and race Also included are chapters on areas in applied ethics and philosophy such as law education and healthcare The Routledge Handbook of Epistemic Injustice is essential reading for students and researchers in ethics epistemology political philosophy feminist theory and

philosophy of race It will also be very useful for those in related fields such as cultural studies sociology education and law

Epistemic Cognition and Development David Moshman,2014-12-05 Epistemic cognition the philosophical core of metacognition concerns people s knowledge about the justification and truth of beliefs Multiple literatures in psychology and education address aspects of epistemic cognition In the absence of a coherent conceptual framework however these literatures mostly fail to communicate with each other and often connect only loosely to genuine epistemology This complicates any effort to achieve a systematic theoretical understanding of epistemic cognition and its development Deanna Kuhn writes in her foreword Moshman is not the first to take on this challenge but he fulfills it elegantly and I think the most comprehensively and astutely After reviewing the basics of philosophical epistemology and cognitive psychology *Epistemic Cognition and Development* provides a compelling account of developmental change across childhood and beyond in knowledge about knowledge especially with regard to fundamental conceptions of objectivity subjectivity rationality justification and truth This is followed by detailed consideration of domain specific epistemologies of science logic morality social convention history and identity including associated forms of reasoning The final section provides theoretical conclusions educational and social applications and suggestions for further research

Epistemic Challenges in a Modern World Gunnar Skirbekk,2020 The modern world is in crisis a double crisis as it were at the factual level with various challenges that tend to interact and reinforce each other and at the epistemic level where no single science or expertise alone can grasp the complexity of what is going on In this publication such basic epistemic challenges are addressed critically and constructively and in this perspective four current cases are discussed and assessed such as the United Nations Agenda 2030 for sustainable development On this background some proposals for epistemic and institutional improvements are considered

Contemporary Issues in Development Economics B. N. Ghosh,2001-04-12 This new collection of articles puts the very latest issues in economic development under the microscope exploring them from a variety of perspectives Beginning with an assessment of the current state of play in development the authors move forward to examine neglected issues such as human development gender brain drain military expenditure and post colonial theory While analysing the problems of external debts technology transfer and new theories of international trade the relationship between developing and developed economies is fully explored The book also examines the important topics of financial reform structural adjustments and the role of the IMF in the new financial architecture The highly respected contributors subject these critical issues to thorough analysis with suggestions towards resolving some of these problems making this an indispensable book that researchers and students of development economics cannot afford to miss

Epistemic Freedom in Africa Sabelo Ndlovu-Gatsheni,2018-06-27 *Epistemic Freedom in Africa* is about the struggle for African people to think theorize interpret the world and write from where they are located unencumbered by Eurocentrism The imperial denial of common humanity to some human beings meant that in turn their knowledges and experiences lost their value their

epistemic virtue Now in the twenty first century descendants of enslaved displaced colonized and racialized peoples have entered academies across the world proclaiming loudly that they are human beings their lives matter and they were born into valid and legitimate knowledge systems that are capable of helping humanity to transcend the current epistemic and systemic crises Together they are engaging in diverse struggles for cognitive justice fighting against the epistemic line which haunts the twenty first century The renowned historian and decolonial theorist Sabelo J Ndlovu Gatsheni offers a penetrating and well argued case for centering Africa as a legitimate historical unit of analysis and epistemic site from which to interpret the world whilst simultaneously making an equally strong argument for globalizing knowledge from Africa so as to attain ecologies of knowledges This is a dual process of both deprovincializing Africa and in turn provincializing Europe The book highlights how the mental universe of Africa was invaded and colonized the long standing struggles for an African university and the trajectories of contemporary decolonial movements such as Rhodes Must Fall and Fees Must Fall in South Africa This landmark work underscores the fact that only once the problem of epistemic freedom has been addressed can Africa achieve political cultural economic and other freedoms This groundbreaking new book is accessible to students and scholars across Education History Philosophy Ethics African Studies Development Studies Politics International Relations Sociology Postcolonial Studies and the emerging field of Decolonial Studies The Open Access versions Chapter 1 and Chapter 9 available at <https://doi.org/10.4324/9780429492204> have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Epistemic Liberalism Adam James Tebble, 2016-01-13 In the wake of what has come to be called the cultural turn it is often asked how the state should respond to the different and sometimes conflicting justice claims made by its citizens and what ultimately is the purpose of justice in culturally diverse societies Building upon the work of a diversity of theorists this book demonstrates that there is a distinct epistemic tradition of liberalism that can be used to critique contemporary responses to cultural diversity and their underlying principles of justice It critically examines multicultural nationalist and liberal egalitarian approaches and argues that an epistemic account of liberalism that emphasises social complexity rather than cultural diversity or homogeneity is the most appropriate response to the question of justice in modern culturally diverse societies Epistemic Liberalism will be of interest to students and scholars of contemporary political theory and philosophy liberal political theory and the politics of culture and identity
