N. B. Camac,2016-06-19 Excerpt from Epoch Making Contributions to Medicine Surgery and the Allied Sciences Being Reprints of Those Communications Which First Conveyed Epoch Making Observations to the Scientific World Together With Biographical Sketches of the Observers In the mass of scientific literature which appears year after year there occurs very occasionally an article which presents the results of experiment or investigation that prove epoch making These articles though recording masterpieces of scientific research are buried with valueless or ephemeral writings Certain of my teachers in presenting a subject at clinics and lectures had for the inspection of the students the article which communicated such observations as first placed the subject upon a sound scientific basis Subsequently in my own teaching I followed this custom There has thus resulted a collection begun some twelve years ago of epoch making articles a part of which is gathered into the present volume Upon first thought one is disposed to conclude that to day such communications would be obsolete and of historic value only but on reading the articles the fact becomes evident that the work and observations were so thoroughly and accurately done in the first instance that the teaching practice and terminology of to day are either the same as when first communicated or based directly on these foundations In many instances subsequent writers have merely paraphrased the statements of the original observers Indeed one may go further and say that some of the errors of today are the result of disregarding or misquoting the facts clearly set forth in these original treatises As an example Jenner s definite direction regarding the technique of vaccination if adhered to would prevent many of the infections and shocking ulcerations seen even in our own day Again in Laennec s writings is to be found much that would clear the confusion regarding physical signs
