Gostin, Harold Hongju Koh, 2003 Inequality Marcia H Rioux Bioethics and Disability Alicia Ouellette, 2011-04-25 Bioethics and Disability provides tools for understanding the concerns fears and biases that have convinced some people with disabilities that the health care setting is a dangerous place and some bioethicists that disability activists have nothing to offer bioethics It wrestles with the charge that bioethics as a discipline devalues the lives of persons with disabilities arguing that reconciling the competing concerns of the disability community and the autonomy based approach of mainstream bioethics is not only possible but essential for a bioethics committed to facilitating good medical decision making and promoting respect for all persons regardless of ability Through in depth case studies involving newborns children and adults with disabilities it proposes a new model for medical decision making that is both sensitive to and sensible about the fact of disability in medical cases **Fixing the Poor** Molly Ladd-Taylor, 2017-12-01 How state welfare politics not just concerns with race improvement led to eugenic sterilization practices Honorable Mention 2018 Outstanding Book Award The Disability History Association Shortlist 2019 Wallace K Ferguson Prize Canadian Historical Association Between 1907 and 1937 thirty two states legalized the sterilization of more than 63 000 Americans In Fixing the Poor Molly Ladd Taylor tells the story of these state run eugenic sterilization programs She focuses on one such program in Minnesota where surgical sterilization was legally voluntary and administered within a progressive child welfare system Tracing Minnesota's eugenics program from its conceptual origins in the 1880s to its official end in the 1970s Ladd Taylor argues that state sterilization policies reflected a wider variety of worldviews and political agendas than previously understood She describes how after 1920 people endorsed sterilization and its alternative institutionalization as the best way to aid dependent children without helping the undeserving poor She also sheds new light on how the policy gained acceptance and why coerced sterilizations persisted long after eugenics lost its prestige In Ladd Taylor's provocative study eugenic sterilization appears less like a deliberate effort to improve the gene pool than a complicated but sadly familiar tale of troubled families fiscal and administrative politics and deep felt cultural attitudes about disability dependency sexuality and gender Drawing on institutional and medical records court cases newspapers and professional journals Ladd Taylor reconstructs the tragic stories of the welfare dependent sexually delinquent and disabled people who were labeled feeble minded and targeted for sterilization She chronicles the routine operation of Minnesota's three step policy of eugenic commitment institutionalization and sterilization in the 1920s and 1930s and shows how surgery became the price of freedom from a state institution Combining innovative political analysis with a compelling social history of those caught up in Minnesota's welfare system Fixing the Poor is a powerful reinterpretation of eugenic sterilization **Embodied Injustice** Mary Crossley, 2022-08-25 Black people and

people with disabilities in the United States are distinctively disadvantaged in their encounters with the health care system. These groups also share harsh histories of medical experimentation, eugenic sterilizations, and health care discrimination. Yet the similarities in inequities experienced by Black people and disabled people and the harms endured by people who are both Black and disabled have been largely unexplored. To fill this gap, *Embodied Injustice* uses an interdisciplinary approach, weaving health research with social science critical approaches and personal stories to portray the devastating effects of health injustice in America. Author Mary Crossley takes stock of the sometimes vexed relationship between racial justice and disability rights advocates and interrogates how higher disability prevalence among Black Americans reflects unjust social structures. By suggesting reforms to advance health equity for disabled people, Black people, and disabled Black people, this book lays a crucial foundation for intersectional cross-movement advocacy to advance health justice in America.

Intellectual Disability James C. Harris, 2006. It is estimated that 7.2 million people in the United States have mental retardation or associated impairments, a spectrum now referred to as intellectual disability. This book provides professionals with the latest and most reliable information on these disabilities. It utilizes a developmental perspective and reviews the various types of intellectual disabilities, discusses approaches to classification, diagnosis, and appropriate interventions, and provides information on resources that may offer additional help. Case examples are included in each section to highlight specific diagnostic and treatment issues. The emphasis in this book is on the development of the person, the provision of interventions for behavioral and emotional problems associated with intellectual disability, and the positive support necessary for self-determination. It discusses the facilitation of transitions throughout the lifespan, from infancy to maturity and old age. Additionally, the book reviews evaluations for behavioral and emotional problems, genetic factors, appropriate psychosocial, medical, and pharmacological interventions, and family and community support.

Righting Educational Wrongs Arlene Kanter, Beth Ferri, 2013-12-24. *Righting Educational Wrongs* brings together the work of scholars from the fields of disability studies in education and law to examine contemporary struggles around inclusion and access to education. Specifically, contributors examine policies and practices as they contribute to or undermine educational access for individuals with disabilities. Kanter and Ferri expand our understanding about the potential of legal studies to inform work around disability studies in education and vice versa. Contributors explore the intersections between disability studies, law, and education, forging a theoretical framework for thinking about educational access. Several essays take a critical look at some of the histories of exclusion in education and the ways that these exclusions have been upheld by a variety of educational policies and practices. Other essays reflect on how students with disabilities and their families experience the Individuals with Disabilities in Education Act. By bridging various disciplines, *Righting Educational Wrongs* offers new insights to allow us to better understand the multiple perspectives and voices within the field of disability studies.

Modern Peoplehood John Lie, John Lie, 2009-06-30. In modern states, John Lie argues, ideas of race, ethnicity, and nationality can be subsumed under the

rubric of peoplehood He argues indeed that the modern state has created the idea of peoplehood That is the seemingly primitive atavistic feelings of belonging associated with ethnic racial and national identity are largely formed by the state Not only is the state responsible for the development and nurturing of these feelings it is also responsible for racial and ethnic conflict even genocide When citizens think of themselves in terms of their peoplehood identity they will naturally locate the cause of all troubles from neighborhood squabbles to wars in racial ethnic or national attitudes and conflicts Far from being transhistorical and transcultural phenomena race ethnicity and nation Lie argues are modern notions modernity here associated with the rise of the modern state the industrial economy and Enlightenment ideas
