Equity And Choice An Essay In Economics And Applied Philosophy:

Equity and Choice Julian Le Grand, 1991-12-05 Offering a new answer to an age old problem the meaning of a just or equitable distribution of resources Julian Le Grand examines the principal interpretations of equity used by economists and political philosophers He argues that none captures the essence of the term as well as an alternative conception relating equity to the existence or other

Performance Measurement for Health System Improvement Peter C. Smith, Elias Mossialos, Irene Papanicolas, Sheila Leatherman, 2010-01-07 In a world where there is increasing demand for the performance of health providers to be measured there is a need for a more strategic vision of the role that performance measurement can play in securing health system improvement This volume meets this need by presenting the opportunities and challenges associated with performance measurement in a framework that is clear and easy to understand It examines the various levels at which health system performance is undertaken the technical instruments and tools available and the implications using these may have for those charged with the governance of the health system Technical material is presented in an accessible way and is illustrated with examples from all over the world Performance Measurement for Health System Improvement is an authoritative and practical guide for policy makers regulators patient groups and researchers

Quasi-Markets and Social Policy Julian Le Grand, Will Bartlett, 1993-08-01 Fundamental change is taking place in the provision of welfare services in Britain Government bureaucracies are losing their monopoly in such key areas as health housing community care and education The Government agencies are increasingly acting as purchasers of services or as umbrellas for decentralised units The command economy is being replaced by the quasi market economy This highly topical book assesses whether quasi markets can deliver efficient and equitable public services and whether they represent a permanent break with the State's traditional role of welfare provider

Technical and Vocational Education and Training Stephen Gough, 2011-11-03 Vocational education is central to the plans of policy makers around the world it underpins the development of the poorest economies and the continued competitiveness of the richest Technical and Vocational Education and Training debates the key issues How far can the same principles be applied to vocational learning in universities colleges schools and the workplace Do the needs of learners and the needs of the economy always coincide Should teachers focus on the delivery of skills or the development of cultures What will determine whether what is learnt corresponds to what is taught Who are the stakeholders in vocational learning and can they all be satisfied at once What does it really mean to say that vocational provision is a kind of investment Drawing on contemporary internationally significant case studies in water education management education and education for sustainable development along with UNESCO's International Centre for Technical and Vocational Education and Training Gough provides a challenging discussion

GPs and Purchasing in the NHS Bernard Dowling, 2024-11-01 This title was first published in 2000 The relative performance of health authorities and general practitioners as commissioners of health care services is a crucial question in the current health care policy debate but

hitherto a poorly researched area This work addresses that topic and represents a systematic direct comparison of GPs and health authorities as purchasers of health care services In doing this it centres upon two of the chief controversies about the NHS internal market the equality of hospital waiting times for fund holding patients and the fairness of the budgets received by fund holding practices for commissioning effective surgery In discussing the policy implications of the research the book then addresses what lessons should be learned from the internal market about equity and efficiency in the service now that the present Labour Government is reforming the NHS with the introduction of Primary Care Groups and Primary Care Trusts

Geographic Thought George L. Henderson, Marvin Waterstone, 2009 This unabridged reader offers a fresh approach to learning about Geographic Thought by showing through concrete examples and detailed editorial essays how the discipline has been forever altered by the rise of progressive social struggles of the last 30 years

School Effectiveness Louise Morley, Naz Rassool, 2002-11 This book traces the development of the school effectiveness debate and raises key questions about how it has become a dominant discourse in theories of educational change today

A Political Economy of Behavioural Public Policy Adam Oliver, 2023-02-23 Behavioural public policy has thus far been dominated by approaches that are based on the premise that it is entirely legitimate for policymakers to design policies that nudge or influence people to avoid desires that may not be in their own self interest This book argues instead for a liberal political economy that radically departs from these paternalistic frameworks Oliver argues for a framework whereby those who impose no substantive harms on others ought to be free of manipulative or coercive interference On this view BPP does not seek to correct an individual's conception of the desired life This book is the third in a trilogy of books by Adam Oliver on the origins and conceptual foundations of BPP

Motivation, Agency, and Public Policy Julian Le Grand, 2003-09-18 Uses a detailed empirical examination of policies in health services education social security and taxation to illustrate how policies can be designed to give the proper balance of motivation and agency cover

A Good-enough Service Bill New, 1999

Basic Income on the Agenda Robert-Jan Veen, Loek Groot, 2025-10-01 Persisting unemployment poverty and social exclusion labour market flexibility job insecurity and higher wage inequality changing patterns of work and family life are among the factors that exert pressure on welfare states in Europe This book explores the potential of an unconditional basic income without means test or work requirement to meet the challenges posed by the new social question compared to policies of subsidized insertion in work It also assesses the political chances of basic income in various European countries These themes are highly relevant to policy makers in the field of labour markets and social security economists political philosophers and a social science audience in general

Fairness Nicholas Rescher, 2018-02-06 In theory and practice the notion of fairness is far from simple The principle is often elusive and subject to confusion even in institutions of law usage and custom In *Fairness* Nicholas Rescher aims to liberate this concept from misunderstandings by showing how its definitive characteristics prevent it from being absorbed by such related conceptions as paternalistic benevolence radical egalitarianism and social

harmonization Rescher demonstrates that equality before the state is an instrument of justice not of social utility or public welfare and argues that the notion of fairness stops well short of a literal egalitarianism Rescher disposes of the confusions arising from economists penchant to focus on individual preferences from decision theorists concern for averting envy and from political theorists sympathy for egalitarianism In their place he shows how the idea of distributive equity forms the core of the concept of fairness in matters of distributive justice The coordination of shares with valid claims is the crux of the concept of fairness In Rescher's view this means that the pursuit of fairness requires objective rather than subjective evaluation of the goods being shared This is something quite different from subjective equity based on the personal evaluation of goods by those laying claim to them Insofar as subjective equity is a concern the appropriate procedure for its realization is a process of maximum value distribution Further Rescher demonstrates that in matters of distributive justice the distinction between new ownership and preexisting ownership is pivotal and calls for proceeding on very different principles depending on the case How one should proceed depends on context and what is adjudged fair is pragmatic in that there are different requirements for effectiveness in achieving the aims and purposes of the sort of distribution that is intended Rescher concludes that fairness is a fundamentally ethical concept Its distinctive *modus operandi* contrasts sharply with the aims of paternalism preference maximizing or economic advantage Fairness will be of interest to philosophers economists and political scientists

Health Services Restructuring in Canada Charles M. Beach, John Deutsch Institute for the Study of Economic Policy, 2006 John Deutsch Institute for the Study of Economic Policy Queen's Univ Kingston Canada Presents proceedings of a conference held at Queen's Univ on November 17-18 2005 Covers health care reform drugs for rare diseases issues in delivery of health care and more For public health personnel Softcover hardcover also available

Economics of a Crowded Planet Fraser Murison Smith, 2019-11-08 This book asks the question how would economics look today and into the future if one started with a blank sheet of paper Written mainly for a technical audience yet accessible to the lay reader Economics of a Crowded Planet addresses the ontology epistemology and methodology of a future economics as if from outside the economy looking in It presents a conceptual framework for a future economics drawing from systems science and hierarchy theory integrating central concepts from present day economics so as to orient the field in a direction that can serve society's future needs in practical ways The exposition reveals a paradigm called market planetarianism the idea that the power of markets may be used to steer the economy toward a desired long term goal Both a prescriptive doctrine and an economic methodology it treats the economy and nature as instances of complex evolutionary systems demanding analytical tools quite unlike those of the 20th century mainstream

Fair Division Steven J. Brams, Alan D. Taylor, 1996-02-23 Cutting a cake dividing up the property in an estate determining the borders in an international dispute such problems of fair division are ubiquitous Fair Division treats all these problems and many more through a rigorous analysis of a variety of procedures for allocating goods or bads like chores or deciding who wins on what

issues when there are disputes Starting with an analysis of the well known cake cutting procedure I cut you choose the authors show how it has been adapted in a number of fields and then analyze fair division procedures applicable to situations in which there are more than two parties or there is more than one good to be divided In particular they focus on procedures which provide envy free allocations in which everybody thinks he or she has received the largest portion and hence does not envy anybody else They also discuss the fairness of different auction and election procedures *The Microeconomics Anti-Textbook* Rod Hill,Tony Myatt,2021-12-02 Mainstream textbooks present economics as an objective science free from value judgements The Microeconomics Anti Textbook demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives In this fully updated and expanded edition of their celebrated book Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti text analysis and critique Challenging the assumptions arguments and models Hill and Myatt provide the essential guide to decoding the textbooks and show that real economics is far more interesting and subversive than the simplistic version presented to students Virtualism James G. Carrier,Daniel Miller,2020-08-25 We live in a time of economic virtualism whereby our lives are made to conform to the virtual reality of economic thought Globalization transnational capitalism structural adjustment programmes and the decay of welfare are all signs of the growing power of economics one of the most potent forces of recent decades In the last thirty years economics has ceased to be just an academic discipline concerned with the study of economy and has come to be the only legitimate way to think about all aspects of society and how we order our lives Economic models are no longer measured against the world they seek to describe but instead the world is measured against them found wanting and made to conform This profound and dangerous change in the power of abstract economics to shape the lives of people in rich and poor countries alike is the subject of this interdisciplinary study Contributors show how economics has come to portray a virtual reality a world that seems real but is merely a reflection of a neo classical model and how governments the World Bank and the IMF combine to stamp the world with a virtual image that condemns as irrational our local social and cultural arrangements Further it is argued that virtualism represents the worrying emergence of new forms of abstraction in the political economy of which economics is just one example **Rewriting Democracy** Elizabeth Deeds Ermarth,2007 Illuminating and comprehensive this excellent volume addresses the problematic relationship between democratic institutions and the current critique of enlightenment and modernity It focuses on the terms and conditions under which it would be possible to prevent events such as 9 11 or the genocide in Darfur in the future Health Care and Public Policy David A. Reisman,2009-01-01 Health care is absorbing an increasing share of resources in all countries It is the task of public policy to ensure that the nation secures good quality attention at an affordable price This book distinguishing clearly between health status and health care examines the ways in which governments can keep down morbidity and mortality

while also ensuring that treatments are medically justifiable economically cost effective and socially equitable Ignorance uncertainty asymmetrical information professional monopolies insurance and poverty all mean that the market by itself is not enough Pragmatic intervention is also required to ensure that well being and social justice are delivered in combination with value for money Health Care and Public Policy is a comprehensive and intelligible cross disciplinary account of the objectives of health care policy medical social economic and of the policy tools that government can employ cost benefit analysis entry barriers competition in order to ensure that scarce resources are not wasted nor needy social groups deprived of basic and affordable care Health policy is hotly debated in all countries This cross national book is timely and relevant It will be of special interest to academics and students who want to deepen their understanding of health economics social policy and administration public policy and government political economy and the logic of institutions

Advanced Introduction to Public Finance Vito Tanzi, 2020-09-25 The Advanced Introduction to Public Finance offers a fresh look at the field of public finance and explains how changes in both the market and the government have made public finance a more challenging interesting and at times frustrating branch of economics It provides a cosmopolitan perspective and details the part that historical developments have played in shaping modern views The author explores the real life practical nature of public finance and deemphasizes the role of arm chair theorizing by focusing on real issues that are seen from a community rather than an individualistic perspective
