M. Ali Abbas,Mr.Alexander Klemm,Mr.Sukhmani Bedi,Junhyung Park,2012-01-01 This paper assembles a new dataset on corporate income tax regimes in 50 emerging and developing economies over 1996 2007 and analyzes their impact on corporate tax revenues and domestic and foreign investment It computes effective tax rates to take account of complicated special regimes such as partial tax holidays temporarily reduced rates and increased investment allowances There is evidence of a partial race to the bottom

countries have been under pressure to lower tax rates in order to lure and boost investment. In the case of standard tax systems i.e. tax rules applying under normal circumstances the effective tax rate reductions have not been larger than those witnessed in advanced economies and revenues have held up well over the sample period. However a race to the bottom is evident among special regimes most notably in the case of Africa creating effectively a parallel tax system where rates have fallen to almost zero. Regression analysis reveals higher tax rates adversely affect domestic investment and FDI but do raise revenues in the short run.

**Offshore Financial Centers, Accounting Services and the Global Economy** Don E. Garner, David L. McKee, Yosra AbuAmara McKee, 2000-07-30 The new global climate of free enterprise has brought with it a proliferation of offshore financial centers that presumably have important roles to play in the emergent global economy. The air of secrecy that appears to pervade the activities of offshore financial centers may well slant or obscure any real understanding of the functions of such centers. The authors investigate the role of major international accounting firms and their services in the processes of business facilitation in the locations that host these centers. By focusing the investigation upon the role of the accounting firms in offshore financial centers the authors gain a better grasp of the real or potential impacts of the firms in the global economy and in the jurisdictions that host them. Not only do the authors provide a detailed assessment of what the major accounting firms are actually doing in the centers but they point out what attributes are needed by jurisdictions hoping to succeed as offshore financial centers. The centers included are Antigua Barbuda the Bahamas Barbados Bermuda the Cayman Islands the Channel Islands the Isle of Man Gibraltar Malta Cyprus Bahrain the United Arab Emirates Mauritius the Seychelles Singapore and Vanuatu. The authors describe the legal and institutional environments facing business operations in general and the accounting firms in particular in offshore financial centers. By studying these operations it should show what they are doing in terms of facilitating the international activities that flow through such centers. It should also add to the understanding of the potential that offshore activities have as vehicles for development in small emerging economies. This study should be of interest to a wide range of business disciplines as well as governmental agencies in advanced and emerging nations international agencies such as regional development banks and accountants and the international financial community.
