resources of the twentieth century On the other hand I realized the necessity of preparing a separate treatise which is *The Inner Nature of Color* to relate the results of my research to the inexhaustibly fruitful spiritual research of Rudolf Steiner so as to try to contribute to a new understanding of the background out of which it arose The fact that any intimate knowledge about the spirituality of the ancient world and above all its relation to the present has not only dropped out of the intellectual life of today but in some quarters is actually impugned seems reason enough to offer this study for whatever use anthroposophists or anyone else can make of it J Leonard Benson In this fascinating work J Leonard Benson describes the spiritual and esoteric nature of color in relation to the four elements fire earth air and water Based on insights provided by Rudolf Steiner and a deep knowledge of classical cosmology and color theory this book shows how an understanding of the inner nature of color leads to a completely different view of the world and evolution than is current in our present civilization one completely at odds with the ruling neo Darwinian paradigm *The Inner Nature of Color* will be of interest to artists art historians spiritual seekers and anyone who has ever been struck by the remarkable beauty of our colored world and wondered what it means
