Ernst Gisel Rathaus Fellbach:

Ernst Gisel Christian Marquart, Thomas Dix, 1996 **Ernst Gisel** Christian Marquart, Ernst Gisel, 1996 Ernst Gisel's town hall for Fellbach is one of the very few buildings that make one enthuse about the town Like Stirling's Neue Staatsgalerie it invites you to linger even without a reason in the Stuttgart museum you are attracted by terraces ramps and an open rotunda whereas in the Fellbach building there is a sense of a strong suction that will draw the public into the inner courtyard of the complex A bit Italian this is what Gisel himself says about the atmosphere there and he is right The urban quality of the new town hall corresponds with the quality of the detailed architectural solutions and the care with which Gisel devoted himself to the architectural design in the interior Heinz Tesar: Christus, Hoffnung Der Welt, Donau City, Wien Immo Boyken, Heinz Tesar, 2002-03-20 Heinz Tesar built this church as a spiritual centre an oasis in the diaspora for Donau City a new residential and commercial centre of Vienna **Frank Lloyd Wright Home and Studio, Oak Park (Opus 23)** Elaine Harrington, Frank Lloyd Wright, 1996-06-26 Frank Lloyd Wright began making contributions to the Modern movement in his home in Oak Park *Kisho Kurokawa* Dennis Sharp, 2002 Known as the Big Eye the Oita Stadium is one of the chosen venues for the next World Cup in 2002 It will be reused for the second stage of the Japan Inter Prefectural Athletic Competition in 2008 after the World Cup continuing to grow in the future to become a large scale all purpose sports park for Oita The whole site covers an area of 225 ha and has several facilities outside the main football stadium These include general fitness training and lodging centres a botanical pool two multipurpose athletic fields two rugby and soccer practise pitches a softball field tennis courts and other game areas The main stadium features an open track for athletic events as well as the football pitch It can also be used year round for public events aided by its retractable roof For soccer matches spectator seats are placed right up to the edge of the pitch to bring them close to the action To change over for track events a retractable seating system was developed The stadium sits elegantly on its site enhanced by the gentle curves of its spherical design The choice of the sphere Kurokawa says is an expression of abstract symbolism This spherical shape also enables the retractable portion to move along its curved surface The use of Teflon membrane panels with 25 percent light permeability obviates the need for artificial lighting during daylight hours In order for the pitch to get proper exposure to sunlight the elliptical roof opening runs along the north south axis A main arch with perpendicular horizontal sub members follows the elliptical shape of the roof opening Between the roof and the spectator seating below the surrounding mountains can be seen from a slender ventilation clearstorey set just below the roof line This slit of space is designed to create a feeling of openness inside the stadium Since the original design an idea emerged for a moving camera to be located on the main beam to deliver special dynamic images for television audiences around the world Kisho Kurokawa Kishō Kurokawa, Dennis Sharp, Catherine Slessor, Tomio Ōhashi, 1999 The completion of the first phase of Kuala Lumpur International Airport in 1998 resulted in two 4000 m runways and a 335 000 m² main terminal building The airport can

handle 25 million passengers a year By 2020 however the airport will be able to handle 120 000 000 passengers a year It is not surprising that everyone should wonder why Malaysia would need an international airport of that size The reason is the intense strategic competition that has already started Unquestionably the world will have an entirely new high speed transportation system by 2025 at the latest This will be the HSST Hypersonic Speed Transport which will carry between 300 and 500 passengers at speeds up to Mach 3.5 The HSST will be meaningless for short routes Therefore the required international hub airports will be limited to two in North America one in Central and South America one in Africa two in Europe one in Russia and three in Asia Like China and South Korea Malaysia is very eager to obtain one of the three Asian international hub airports because a country with such an airport and the associated infrastructure is very likely to become a financial information tourism and advanced industrial centre The airport is an integral part of a future linear capital corridor which was also developed by Kurokawa The area surrounding the airport will be used for an experiment in artificially restoring the tropical rain forest Creating such a forest is the most effective method for blocking out noise from the airport This is the basis of the architect's concept for a symbiosis between airport and forest In addition the architect believes that this is effective for expressing the identity of Malaysia as tropical rain forests are the typical vegetation of the country Kurokawa was a key figure of Japanese Metabolism he has played an essential role in this movement not only through projects and buildings but also through theoretical writings Since then he has been one of the leading architects in Japan

axis was built from 1826 to 1829 It was followed from 1829 to 1840 by the freely developing area of the Hofg rtenhaus and its adjacent facilities all of which has become known as the Roman Baths The Crown Prince involved himself in the planning process contributing over 100 sketches He called Charlottenhof my Siam understood as a synonym for a better world and he was pursuing with it his intention of presenting his own future style of government based on romantic theories of the state and striving for a harmonious balance of all classes and interests Charlottenhof is Schinkel s only work to have survived complete inside and outside surrounded by Lenn s landscape garden which has also been carefully looked after and preserved

Frank O. Gehry Gottfried Knapp, Christian Richters, 2000 Text in English and German After his deconstructive beginnings in the eighties and nineties Frank Gehry increasingly practised a very plastic form of architecture His expressively sculptural cultural buildings the Vitra Design Museum in Weil am Rhein his project for the Walt Disney Concert Hall in Los Angeles and above all the Guggenheim Museum in Bilbao see Opus 32 have shaped the architectural awareness of our period and provided exemplary artistic alternatives to the architectural canon of Modernism Within Gehry s rapidly growing volume of work the comparatively small energy forum for the Minden Ravensburg Electricity Company EMR plays a particularly striking role insofar as the extraordinarily complex brief almost contradictory functions had to be blended in a very cramped space compelled the architect to use highly differentiated forms and materials In this way something like a primal model of sculptural building emerged a massively fissured subtly lit structure that explains itself inside with amazing naturalness making visitors gasp with its changing spatial situations as an exhibition and events centre exploding all conventions as an office building and translating the theme of energy into sensual forms by architectural means as the electricity company s technical distribution centre The old dictum form follows function acquires a new and radical quality in the architecture of the Energieforum In addition to the presentation of the energy forum in Bad Oeynhausen this book contains an illustrated survey of all other buildings by Frank Gehry in Europe

Bolles + Wilson Lars Lerup, Mirko Zardini, 2003 The Luxor is a significant milestone in the Suvre of Bolles Wilson As a major public building it pursues themes first tested in the 1993 new city library in M nster a characteristic plan form an intervention that

redefines its context and a synthesis of the abstract with a spatial warmth an ambience that communicates directly and subliminally to a wide audience base The architecture of this German Australian duo does not fit easily into conventional architectural genres Smallness intimacy and precise details characterise their work just like an increasing number of urban interventions that have made a major impact on cities like Hengelo The Hague or Magdeburg The design of the Luxor Theatre the process of its realisation Bolles Wilson s surrounding urban fields and most importantly the internal life in the building engendered by the architecture are fully presented in this book **Egon Eiermann, German Embassy, Washington** Immo Boyken,Egon Eiermann,2004 When the German Embassy in Washington was completed in 1964 the architectural critic for the Washington Post wrote that the express aim of those commissioning the building had been to make an architectural statement that would embody the spirit of the young German democracy **A City-hall in France** Grégory T.
