Enzyme Handbook Dietmar Schomburg,Dörte Stephan,2013-10-05 Recent progress on enzyme immobilisation enzyme production coenzyme regeneration and enzyme engineering has opened up fascinating new fields for the potential application of enzymes in a large range of different areas As more progress in research and application of enzymes has been made the lack of an up to date overview of enzyme molecular properties has become more apparent Therefore we started the development of an enzyme data in formation system as part of protein design activities at GBF The present book Enzyme Handbook represents the printed version of this data bank In future a computer searchable versionwill be also available The enzymes in this Handbook are arranged according to the Enzyme Commission list of enzymes Some 3000 different enzymes will be covered Frequently enzymes with very different properties are included under the same EC number Although we intend to give a representative overview on the characteristics and variability of each enzyme the Handbock is not a com pendium The readerwill have to go to the primary literature for more detailed information Naturally it is not possible to cover all the numerous literature references for each enzyme for special enzymes up to 40000 if the data re presentation is tobe concise as is intended

Enzyme Handbook: Class 1.1: Oxidoreductases EC 1.1.1.1150-EC 1.1.99.26 ,1990 **Enzyme Handbook** Dietmar Schomburg,Dörte Stephan,1994-06-16 Recent progress on enzyme immobilisation enzyme production coenzyme

regeneration and enzyme engineering has opened up fascinating new fields for the potential application of enzymes in a large range of different areas. As more progress in research and application of enzymes has been made, the lack of an up to date overview of enzyme molecular properties has become more apparent. Therefore we started the development of an enzyme data information system as part of protein design activities at GBF. The present book *Enzyme Handbook* represents the printed version of this data bank. In future a computer searchable version will be also available. The enzymes in this Handbook are arranged according to the Enzyme Commission list of enzymes. Some 3000 different enzymes will be covered. Frequently enzymes with very different properties are included under the same EC number. Although we intend to give a representative overview on the characteristics and variability of each enzyme, the Handbook is not a compendium. The reader will have to go to the primary literature for more detailed information. Naturally it is not possible to cover all the numerous literature references for each enzyme. For special enzymes up to 40000 if the data representation is to be concise as is intended.
