Enzyme Engineering Volume 2 E. Pye, 2012-12-06 Considerable worldwide interest has arisen in recent years in the controlled use of enzymes as catalysts in industrial processing analytical chemistry and medical therapy This interest has generated the new interdisciplinary field of Enzyme Engineering which includes both the scientific and technologic aspects of the production purification immobilization and application of enzymes in a variety of situations and reactor configurations A series of Engineering Foundation conferences on Enzyme Engineering was initiated to provide an international forum for the exchange of ideas and information over the entire range of this new field The outstanding success of the first two conferences attests to the vigor and potential of this field to contribute significantly to a better understanding and resolution of some of the major problems faced by mankind The first conference which was held August 9-13 1971 at Henniker New Hampshire U S A aided significantly in molding the several traditional disciplines that interact to form the field of Enzyme Engineering The conference was highly successful mainly because many of the key scientists and engineers from the several facets of Enzyme Engineering were brought together for the first time at a single residential meeting The result was an exchange of ideas and education of one another in the pertinent principles of the diverse disciplines which contribute to this field The second conference held August 5-10 1973 at Henniker New Hampshire U S A

Enzyme Engineering Howard H. Weetall, 2012-12-06 Enzyme technology continues to maintain a high degree of interest both in the academic and industrial communities Since the last Enzyme Engineering Conference held in Bad Neuenahr Federal Republic of Germany two years ago an increasing emphasis has been placed on the study and application of immobilized whole cells and organelles This new emphasis has been reflected in the number of presentations directed to this area The Fifth International Enzyme Engineering Conference was held in Henniker New Hampshire July 29 to August 3 1979 The organizers of this conference are especially grateful for the generous support received from a number of industrial organizations The conference was attended by 183 participants representing over 22 countries making this truly an international conference During this conference emphasis was placed on a wide variety of areas including enzyme production energy transduction cofactor modification biomass conversion immobilized enzymes cells and organelles and enzymatic synthesis of chemicals and pharmaceuticals This volume contains most of the presentations and posters presented at the Fifth Conference The names of the session co chairmen workshop chairmen committee members and sponsoring organizations are included as an appreciation of their efforts in making this a successful conference The preparation of this volume was carried out by the editors including editing and proofing of the individual manuscripts and the final copy of this volume The editors are indebted to Ms S
