Timasheff, 1985-11-28 The critically acclaimed laboratory standard *Methods in Enzymology* is one of the most highly respected publications in the field of biochemistry Since 1955 each volume has been eagerly awaited frequently consulted and praised by researchers and reviewers alike The series contains much material still relevant today truly an essential publication for researchers in all fields of life sciences **Amino Acids, Peptides and Proteins** R. C. Sheppard, 1981 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume *Interpreting Protein Mass Spectra* A. Peter Snyder, 2000 *Interpreting Protein Mass Spectra* is a hands on laboratory guide for a wide range of researchers investigating the structures of proteins and peptides The focus is on the interpretation of structural information gathered through electrospray ionization mass spectrometry ESI MS The book will also provide useful background and protocols for anyone using matrix assisted laser desorption ionization MALDI fast atom bombardment FAB and secondary ion mass spectrometry SIMS The book includes numerous practical examples detailed discussions of experimental setups and valuable hints for troubleshooting both methods and the handling of materials
