Pizarro, Charles Dinarello, 2021-08-10. *Asthma: Targeted Biological Therapies* Girolamo Pelaia, Alessandro Vatrella, Rosario Maselli, 2016-11-10. This book focuses on the fundamentals of the use of biologics in asthma, describing the rationale, principles, mechanisms of action and indications. Essential Aspects of Immunometabolism in Health and Disease

Niels Olsen Saraiva Camara, Jose C Alves-Filho, Pedro Manoel Mendes de Moraes-Vieira, Vinicius Andrade-Oliveira, 2021-10-21 Immunometabolism has emerged as an intersectional crossroad between metabolism and immune response Over the past decade it has become clear that most if not all immune cell functions are not separated from cellular metabolism Although seminal works have addressed the metabolic fate of immune cells during differentiation and function the physiological status of a given tissue is also dependent on the cell metabolism The dialogue between immune cells and their microenvironment can also modulate cellular metabolism which can trigger the onset and progression of a multitude of inflammation mediated diseases Thus uncovering the specific characteristics of the metabolism in different immune cells types and in different conditions can shed light into the molecular mechanisms of disease and help develop new drugs and therapeutic strategies to treat immune diseases The edited volume Essentials aspects of Immunometabolism will give the readers a broad view on how metabolic pathways can influence many types of immune cells during activation differentiation and function in health and disease Of note the structure of the book was created thinking not only on the experienced immunologist but also on undergraduate and graduate students physicians and all members of the scientific community interested in this exciting field of research
