Integrative Approaches to Psychology and Christianity, Fourth Edition David N. Entwistle, 2021-11-03 Since the first edition of Integrative Approaches to Psychology and Christianity was published in 2004 this has become the standard textbook on the topic Now in its fully revised fourth edition Dr Entwistle's book elucidates historical philosophical and practical issues in the integration of psychology and Christianity As in previous editions the current text provides an introduction to many of the worldview issues and philosophical foundations that frame the relationship of psychology and theology includes scholarly reflection on the integration literature and surveys six models of possible relationships between psychology and Christianity ranging from those that are completely opposed to either religion or psychology to intermediate models that assert that some limited interaction between them is possible to viewpoints which suggest that a Christian worldview approach can be used to provide a context for exploring areas of overlapping interest between psychology and Christianity The current edition considers recent advances in both Catholic and Protestant thinking on integration including contemporary questions about what evangelicalism is and is not that shape evangelical reactions to the integration debate New content ranges from information about the contrasting views of Tertullian and Augustine to insights from contemporary psychology about factors that adversely affect the quality and reliability of human thinking to how conflict over COVID 19 has entered contemporary religious debate The book is designed to help readers become aware of the presuppositional backdrops that each of us brings to these issues Questions at the end of each chapter are included to help readers evaluate both the material and their own burgeoning approach to integration This book is ideal as a textbook for students of psychology and other behavioral and social sciences social work sociology theology counseling pastoral counseling at both

the graduate and undergraduate level It is also written for the broader readership of psychologists counselors pastors and others who are interested in integration

Beyond Fideism Olli-Pekka Vainio, 2016-04-15 After the postmodern turn every tradition seeks the right to have their own rules of rational discourse The crucial question is are there ways to communicate between the traditions so that the traditions do not need to give up their identities in order to take part in conversation Vainio examines the basic assumptions behind well known types of Christian theology and seeks ways in which they might interact with one other and with other non Christian traditions without capitulation of their identities Vainio claims that there are religious identities that can be negotiated and communicated and that there are ecclesiastical doctrines which can be meaningfully discussed among churches This book explores three key areas analysis of the uses of fideism within classical Christian theology clarification of different types of theological method that seek to express the task of theology in contemporary setting an explanation of the contours of religious identity and rationality which takes seriously both classical Christian identity and pluralistic contexts where most of the Christian communities dwell nowadays The proposal for negotiability of Christian identity draws together ideas from among others virtue epistemology reformed epistemology communitarianism and feminist sensibilities

A Critical Realist's Theological Method Douglas W. Kennard, 2013-02-21 A Critical Realist's Theological Method explores a systematic theology method grounded in critical realism in the wake of Alister McGrath Imre Lakatos Nancey Murphy N T Wright and Dale Allison Kennard surveys philosophical and traditional theological approaches for contributions and limitations in order to set out a method for theology and science Kennard extends this method to a Thiselton Ricoeur hermeneutic that can fund insightful exegesis and Biblical theology in the wake of Ladd Dunn Vos and Goldingay This Biblical theology method is illustrated by wisdom literature the traditional reef of the discipline and then developed for the contributions toward systematic theology as Gabler had originally envisioned With contextualized Scripture sourcing most of the content for systematic theology the trajectory is shown in the subtitle Returning the Bible and Biblical Theology to be the Framer for Theology and Science The method is exemplified in exegesis of creation texts which frame possibilities for science Likewise Biblical theology frames a bio ethics integration of psychology and theology setting out a transactional model for psychological recovery with University of Chicago professor Paul Holmes A theology for peer review and work is also framed

Resurrection, Scripture, and Reformed Apologetics Steven D. West, 2012-07-26 Apologetic methodology has been the subject of intense debate in Reformed circles This book argues that we can test Reformed apologetic methods for consistency using two linchpin theological topics the doctrine of the resurrection and the doctrine of Scripture Should apologetics move from establishing theism to the resurrection and then to Scripture Or should theism the resurrection and the doctrine of Scripture be accepted on the testimony of the Holy Spirit as basic beliefs Alternatively do these doctrines need to be presupposed and incorporated into a transcendental defense of the faith After analyzing classical apologetics historical evidentialism Reformed epistemology and presuppositionalism for their

apologetic cogency Steven D West contends that any method used by Reformed apologists should be able to argue successfully for a high view of Scripture the source of the doctrine of the resurrection The book will be useful to everyone interested in the relationship between theology philosophy and apologetics Welcome to College 2nd ed Jonathan Morrow,2017-03-28 The single best volume I have ever read for preparing students for how to follow Jesus and flourish as his disciple in college J P Moreland Is there a more frightening question for a graduating high school senior than What will you do with your life In college whether they realize it or not students will answer that question every day with each decision All of the new friends and new experiences of higher education will shape their future It s critical that students know how to handle college before they re in the thick of it Jonathan Morrow tackles the tough questions that arise during these formative years including How do you grow spiritually How do you manage your time to both study well and have fun Is all truth relative Are there good reasons to be a Christian As a Christian how should you view issues like dating and sex Each chapter of this new edition has been updated and the author has included a new chapter on Christianity homosexuality and the Bible Grounded in both his own extensive experience and biblical truth Morrow s book is full of quick easy to read chapters and excellent advice The Hermeneutics of Doctrine Anthony C. Thiselton,2007-11-08 Throughout the book Thiselton shows how perspectives that arise from hermeneutics shed fresh light on theological method reshape horizons of understanding and reveal the relevance of doctrine for formation and for life Engaging Deconstructive Theology Ronald T. Michener,2016-04-29 Engaging Deconstructive Theology presents an evangelical approach for theological conversation with postmodern thinkers Themes are considered from Derrida Foucault Mark C Taylor Rorty and Cupitt developing dialogue from an open minded evangelical perspective Ron Michener draws upon insights from radical postmodern thought and seeks to advance an apologetic approach to the Christian faith that acknowledges a mosaic of human sources including experience literature and the imagination **God and the Brain** Kelly James Clark,2019-07-02 Does cognitive science show that religious belief is irrational Kelly James Clark brings together science and philosophy to examine some of humanity s more pressing questions Is belief in God as Richard Dawkins claims a delusion Are atheists smarter or more rational than religious believers Do our genes determine who we are and what we believe Can our very creaturely cognitive equipment help us discover truth and meaning in life Are atheists any different from Mother Teresa Clark s surprising answers both defend the rationality of religious belief and contribute to the study of cognitive science God and the Brain explores complicated questions about the nature of belief and the human mind Scientifically minded philosophically astute and reader friendly God and the Brain provides an accessible overview of some new cognitive scientific approaches to the study of religion and evaluates their implications for both theistic and atheistic belief **Knowing God as an Evangelical** Dan-Adrian Petre,2023-04-26 In the present polyphony of evangelical theological epistemology there are several authoritative approaches Yet the evangelical emphasis on sola scriptura demands that theological epistemology be subjected to the biblical

canon In this book Dan Adrian Petre argues for a canonically derived theological epistemological framework that may foster a fuller understanding of theological knowledge formation within evangelicalism Specifically he explores some representative evangelical voices to identify the reasons for the contemporary epistemological variance Petre then uses a canonical epistemological methodology to outline a biblically based framework In exploring how the Scripture conceptualizes the formation of theological knowledge the book uses cognitive linguistics to grasp the conceptual meaning of the theological knowledge formation in the Bible using prototypical case studies The resulting epistemological implications outline a minimal epistemological model derived from the biblical canon Using this vantage point the author assesses the contemporary evangelical epistemological dissonance as a means of indicating a way forward for a canonical epistemological attunement
