

EQUITY VS EQUALITY

EQUITY

Equity refers to fairness and justice in the distribution of resources, opportunities, and privileges, taking into account the unique circumstances and needs of individuals or groups. It recognizes that different individuals or groups may require different levels of support or accommodations to achieve a level playing field. Equity aims to address historical and systemic disadvantages and achieve 'equality of opportunity'.

EQUALITY

Equality refers to the principle of treating everyone the same or providing the exact same opportunities and resources to all individuals or groups regardless of need. It focuses on uniformity and equal treatment without necessarily considering the specific needs, circumstances, or historical disadvantages that certain individuals or groups may face.

An Equal Chance Derek Birley,Anne Dufton,2017-05-08 This book first published in 1971 provides an account of educational and social services their functions and how they relate to each other It discusses their problems and makes constructive and original proposals for their future development Taking the child and its needs as their central theme the authors go beyond superficial organisational matters to consider fundamental issues that profoundly affect the future of the nation s children This title will be of interest to students of sociology and education

Equality in Education Kathleen Lynch,1999 A text for students of education and sociology with up to date data on equality in education in Ireland

International Studies in Educational Inequality, Theory and Policy Richard Teese,Stephen Lamb,Marie Duru-Bellat,2007-06-03 Inequality is a marked and persistent feature of education systems both in the developed and the developing worlds Major gaps in opportunity and in outcomes have become more critical than in the past thanks to the knowledge economy and globalization More and more populations both rich and poor depend on successful use of school and on gaining post school qualifications But access to high quality schooling success at school and

chances of higher education all remain socially divided with implications for economic opportunities personal growth and civic and community development What causes these divisions in how education systems work Have decades of public investment brought about at least some improvements even if major gaps remain If not what are the barriers the social processes which have frustrated the efforts of government The pursuit of equity as a goal of public policy is examined in this book through a series of national case studies covering many different global contexts from the wealthiest to some of the poorest nations on earth What have we learnt from the policy experience globally Do we know more today than yesterday about the origins of social inequality Are our policies better framed better designed to tackle inequality And which way forward What does the evidence suggest in terms of future approaches and emphasis This work is published in three volumes which together form a 3 volume set Equality And Achievement In Education James S. Coleman,2019-08-27 This book presents a major report that has evoked extensive controversy and initiated extensive policy debate on equality and achievement in education It examines the concept of equality of educational opportunity and the relations between equality and achievement and between families and schools *Equalities and Education in Europe* Melinda Dooly,Nanny Hartsmar,Alistair Ross,2012-01-17 This book is about inequities in education in Europe The authors have worked together on an analysis of educational inequalities in Europe which they draw on through the book they suggest that the countries of Europe through the European Union are beginning to address issues of educational disadvantage on a systematic continent wide basis Because of this policy concern this book is timely in the way that it addresses social and education inequities on the scale of Europe This is not simply an account of practices and policies The authors analysis of individual country and European Union policy documents will be of practical and theoretical use to the policy community and the community of practitioners who are concerned with inequities in society and in education in particular The authors want to do more than simply add to the literature and theory they aspire to make an impact on how education can contribute to positively improving the lives of disadvantaged groups While some suggest that education is doomed to simply reproduce existing social patterns and replicate social inequities the authors believe that educational policies have the potential to challenge inequalities and to transform lives **Handbook of the Sociology of Education** Maureen T. Hallinan,2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being

determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system

Equality and Power in Schools Anne Lodge, Kathleen Lynch, 2004-11-23 Based on a study of 12 schools over a two year period this book explores issues of equality and power both in the classroom and in the staffroom Through classroom observation interviews with pupils and staff focus groups and questionnaires the authors examine classroom practice grouping and streaming peer group relations and attitudes to power relationships both between pupils and teachers and amongst teachers themselves They also look particularly at the different experiences of pupils in single sex and co educational schools The authors findings offer an insight into the way schools operate in terms of social class gender religion and ethnicity and raise fundamental questions about the use and abuse of power in schools and how this affects the lives of pupils and staff This book will be of interest to those studying education sociology gender studies and women's studies and to policy makers and teachers in senior management roles

Health and Well-being, Quality Education, Gender Equality, Decent work and Inequalities: The contribution of psychology in achieving the objectives of the Agenda 2030 Paola Magnano, Soledad Romero-Rodriguez, Jenny Marcionetti, Anna Parola, Andrea Zammiti, Celia Moreno-Morilla, 2024-02-07 The United Nations 2030 Agenda has defined 17 goals to promote sustainable development on a global scale it's based on five critical dimensions known as the 5Ps people prosperity planet partnership and peace Many of the goals can be connected to psychology or educational sciences for example improving health and well being SDG3 ensuring quality education SDG4 promoting gender equality SDG5 and decent work SDG8 and reducing inequality SDG10 This means that researchers in the field of psychology or related sciences can give substantial contributions to support the achievement of the goals of Agenda 2030 Research on the contribution of psychology and educational sciences in achieving these goals should be encouraged

Policy and Practice Challenges for Equality in Education Neimann, Theresa, Felix, Jonathan J., Shliakhovchuk, Elena, Hindman, Lynne L., 2021-09-10 Well educated populations are important aspects of any contemporary society as education increases national and global development and the positive expansion of communities to participate actively in civil matters also increases Educational equality is based on the principles of administrative competence and fairness of access and distribution of resources opportunities and treatment which ensures success for every person Ensuring equal access to quality education requires addressing a wide range of persistent inequalities in society and includes a stronger focus on how different forms of inequalities intersect to produce unequal opportunities or outcomes that affect marginalized and vulnerable groups Policy and Practice Challenges for Equality in Education takes a multifaceted look

at issues of equality and inequality in education as related to policy practice resource access and distribution As such this book explores the potential practices in education that serve to mitigate and transform unproductive practices which have left societies scarred by social and educational inequalities The chapters provide a critical analysis of the manifestations of inequalities in various educational contexts and discerns how broader social inequalities are informed by education related matters This book is ideal for sociologists administrators instructors policymakers data scientists community leaders practitioners stakeholders researchers academicians and students interested in educational equality and the unique challenges being faced worldwide

Constructing Educational Inequality Peter Foster, Roger Gomm, Martyn Hammersley, 2005-06-21 The issue of educational opportunity has long been of public concern and a major focus for educational research As a result there is now a substantial body of research findings in this field both quantitative and qualitative This work relates to various levels of the educational system and to different categories of student but particularly social class gender ethnicity and race The central trend has been to find persisting inequalities despite reform at system institutional and classroom levels Furthermore the educational system is frequently portrayed as playing a key role in reproducing wider social and economic inequalities This book examines the status of educational inequality as a social problem explores the conceptual issues surrounding it assesses a representative sample of recent research and seeks to clarify the relevant methodological ground rules thereby laying the basis for future research in the field

The Role of Education In Fighting Inequality Counsel Mayabi, 2015-02-17 Seminar paper from the year 2014 in the subject Sociology Knowledge and Information University of Nairobi Law course Social Foundations of Law language English abstract The presence of unequal opportunities and incentives for varied social statuses in a community or a state sums up my definition which is open to debate of inequality These include the unequal distribution of resources and the distribution that is based on already established patterns that have been socially defined In this context there are categories of people in a given society and resources are distributed based on the category into which the people fall Because of the inequalities in the society the people at the upper classes would be always ahead of those in the lower class Those at the lower class will therefore find it hard to abridge the wide gap between the classes Some have said that education is the only way up the social ladder A few however refute the claim that no one needs to be educated to avoid poverty That is education is no guaranteed solution for the inequalities They say we cannot run to education as the only solution to poverty Going to institutions of higher learning to find a way out of poverty or social problems should be out of anyone's mind Marsh p12 However such mentality is not in its entirety justifiable as the power of education cannot be underestimated Education may not be the only way out but at least it has a bearing on the overall call for equality Having said this my paper finds out and its main purpose is to provide a justification that education may be in one way or another a way out of inequality and poverty as would be argued in the rest part of this paper

Educational Inequalities Kalwant Bhopal, Uvanney Maylor, 2013-11-07 While there is considerable

literature on social inequality and education there is little recent work which explores notions of difference and diversity in relation to race class and gender This edited text aims to bring together researchers in the field of education located across many international contexts such as the UK Australia USA New Zealand and Europe Contributors investigate the ways in which dominant perspectives on difference intersectionality and institutional structures underpin and reinforce educational inequality in schools and higher education They emphasize the importance of international perspectives and innovative methodological approaches to examining these areas and seek to locate the dimensions of difference within recent theoretical discourses with an emphasis on race class and gender as key categories of analysis **Illusions of Equality**

(International Library of the Philosophy of Education Volume 7) David Cooper,2010-02-25 Educational policy and discussion in Britain and the USA are increasingly dominated by the confused ideology of egalitarianism David E Cooper begins by identifying the principles hidden among the confusions and argues that these necessarily conflict with the ideal of educational excellence in which conflict it is this ideal that must be preserved He goes on to criticize the use of education as a tool for promoting wider social equality focussing especially on the muddles surrounding equal opportunities social mix and reverse discrimination Further chapters criticize the new egalitarianism favoured on epistemological grounds by various sociologists of knowledge in recent years and cultural egalitarianism according to which standard criteria of educational value merely reflect parochial and economic interests *Education, Equality and Development: Persistent Paradoxes in Indian Women's History* CWDS,2011 Education Equality and Development Persistent Paradoxes in India Women s History

Education, Equality and Society Bryan Wilson,2023-03-31 Originally published in 1975 the essays in this book explore a particular level at which the concept of equality must be applied if educational equality is to be realised Whilst each stands independently of the others there are points of convergence and overlap in the perspectives of the writers each of whom represents a different discipline education sociology psychology philosophy and politics The relationship between equality and unity uniformity and justice are discussed and at every level false assumptions are revealed Education, Equality, and Meritocracy in a Global Age Takehiko Kariya,Jeremy Rappleye,2020 Kariya and Rappleye focus on the Japanese model looking at the country s educational history and policy shifts They show how the Japanese experience can inform global approaches to educational reform and policymaking and how this kind of exploration can reinvigorate a more rigorous discussion of meritocracy equality and education This book is made available as an open access electronic publication with the generous support of the Suntory Foundation
