Social Policy in the European Union, Third Edition Linda Hantrais,2017-09-16 Taking account of the debates about adapting the Union's institutional structures to accommodate different welfare arrangements and the need for more open forms of European governance the third edition of this well received book offers a compact clear and authoritative account of 50 years of social policy formation and implementation across the EU **Women and Leadership in the**

European Union Henriette Müller, Ingeborg Tömmel, 2022-03-03 This volume is the first comprehensive analysis of women's ascendance to leadership positions in the European Union as well as their performance in such positions. It provides a new theoretical and analytical framework capturing both positional and behavioural leadership and the specific hurdles that women encounter on their path to and when exercising leadership. The volume encompasses a detailed set of single and comparative case studies analyzing women's representation and performance in the core EU institutions and their individual pathways to and exercise of power in top level functions as well as comparative analyses regarding the position and behaviour of women in relation to men. Based on these individual studies the volume draws overarching conclusions about women's leadership in the EU. Regarding positional leadership women continue to be underrepresented in leadership positions; they more often hold less prestigious portfolios in such positions and manifold structural hurdles hamper their access to power. Furthermore, huge variations exist across EU institutions with the intergovernmental bodies being the hardest to access. Regarding behavioural leadership women acting in powerful EU positions generally perform excellently. They successfully exercise a combined leadership style that integrates attributes of leadership considered to be masculine and feminine. This is not to argue that women per se are the better leaders. Yet more often than men they are exposed to stronger selection processes and their prevalent practice of a combined leadership style tends to best meet the requirements of modern democratic systems and particularly those of the highly fragmented EU. **The EU Charter of Fundamental Rights**

Steve Peers, Tamara Hervey, Jeff Kenner, Angela Ward, 2021-11-18 This most thorough commentary must be regarded as the Bible on the Charter. Peter Oliver Common Market Law Review. This second edition of the first commentary of the EU Charter of Fundamental Rights in English, written by experts from several EU Member States, provides an authoritative but succinct statement of how the Charter impacts upon EU domestic and international law. Following the conventional article by article approach, each commentator offers an expert view of how each article is either already being interpreted in the courts or is likely to be interpreted. Each commentary is referenced to the case law and is augmented with extensive references to further reading. This is a much welcomed new edition of the authoritative guide to the Charter. European Union Law

Damian Chalmers, Gareth Davies, Giorgio Monti, 2010-06-24 This eagerly awaited new edition has been significantly revised after extensive user feedback to meet current teaching requirements. The first major textbook to be published since the rejuvenation of the Lisbon Treaty, it retains the best elements of the first edition: the engaging, easily understandable writing style; extracts from a variety of sources showing the creation, interpretation and application of the law; and comprehensive coverage. In addition, it has separate chapters on EU law in national courts, governance and external relations, reflecting the new directions in which the field is moving. The examination of the free movement of goods and competition law has been restructured. Chapter introductions clearly set out what will be covered in each section, allowing students to approach complex material with confidence. Detailed further reading sections encourage further study. Put simply, it is required

reading for all serious students of EU law **Caring Responsibilities in European Law and Policy** Eugenia Caracciolo di Torella, Annick Masselot, 2020-02-28 This book explores the emerging engagement of EU law with care and carers The book argues that the regulation of care by the EU is crucial because it enables the development of a broad range of policies It contributes to the sustainability of society and ultimately it enables individuals to flourish Yet to date the EU approach to regulating the caring relationship remains piecemeal and lacks the underpinning of a cohesive strategy Against this backdrop this book argues that the EU can and must take leadership in this area by setting principles and standards in accordance with the values of the treaty in particular gender equality human dignity solidarity and well being The book further makes a case for a stronger protection for carers who should not only be protected against discrimination but should also be supported valued and put in a position to make choices and lead full lives In order to achieve this a proactive approach to rebalancing the relationship between paid and unpaid work is necessary Ultimately the book puts forward a series of legal and policy recommendations for a holistic approach to care in the EU Labour Law in Belgium Frank Hendrickx, 2022-06-20 Derived from the renowned multi volume International Encyclopaedia of Laws this monograph on Belgium not only describes and analyses the legal aspects of labour relations but also examines labour relations practices and developing trends It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting Both individual and collective labour relations are covered in ample detail with attention to such underlying and pervasive factors as employment contracts suspension of the contracts dismissal laws and covenant of non competition as well as international private law The author describes all important details of the law governing hours and wages benefits intellectual property implications trade union activity employers associations workers participation collective bargaining industrial disputes and much more Building on a clear overview of labour law and labour relations the book offers practical guidance on which sound preliminary decisions may be based It will find a ready readership among lawyers representing parties with interests in Belgium and academics and researchers will appreciate its value in the study of comparative trends in laws affecting labour and labour relations **Philosophical Foundations of European Union Law** Julie Dickson, Pavlos Eleftheriadis, 2012-10-11 This volume brings together legal philosophers political philosophers and EU legal academics in the service of developing the philosophical analysis of EU law In a series of original and complementary essays they bring their varied disciplinary expertise and theoretical perspectives to bear on central issues facing the Union and its law **International Workplace Sexual Harassment Laws and Developments for the Multinational Employer** Ellen Pinkos Cobb, 2019-12-06 As the MeToo movement has become an increasingly global and significant workplace matter a timely resource compiling must know international workplace sexual harassment laws for the multinational employer is clearly needed This book provides a comprehensive compilation of global sexual harassment laws clearly necessary in this climate but not currently existing until now It presents legislation addressing workplace sexual

The NGOization of Social Movements in Neoliberal Times Alexandra Ana,2024-06-20 Drawing on theories in politics sociology gender and feminist studies and social movement studies this book compares and contrasts NGOized feminist organizations and informal street feminist groups in Belgium and Romania in order to understand the transformation of modern and contemporary feminist movements Chapters trace the development of this NGOization process and its entanglements with neoliberal modes of governance and techniques and proposes an historically and empirically grounded analytical model to studying the NGOization of feminist movements as a multidimensional process By analyzing the NGOization process through a cross national comparison based on very different cases the book disentangles the links between institutionalization professionalization bureaucratization and precarization and brings clarifications concerning the outcomes associated with them such as demobilization depoliticization co optation and burn out This book places the NGOization offeminist movement organizations within the specific context of relations between the state and the market in neoliberalism This book will be of interest to scholars and researchers across Gender Feminist Studies Social Movements Sociology and Politics Gender Politics in the Expanding European Union Silke Roth,2008-09-01 In May 2004 after

bringing their legislation into accordance with EU regulations ten more countries joined the European Union The contributors to this volume assess the impact of this historical development on gender relations in the new and old EU member states Instead of focusing on either western or eastern Europe this book investigates the similarities and differences in diverse parts of Europe Although initially limited gender equality was part of the original framework of the European Union an organization often more open than national governments to feminist demands as this volume illustrates with case studies from eastern and western Europe The enlargement process thus provides some important policy instruments for increasing equality between men and women Hate and Reconciliation Guido Cuyvers,2022-11-29 Every day the media

confront us with the many forms and excesses of hatred cyber hatred hate speech bullying hate groups religiously inspired violence against dissidents and genocides Hatred is human and current It is an intrinsic part of what can happen between people Personal experiences can lead people to hate someone In society and even on a global level hatred is again and again the motor of misunderstanding and often also of violence between people Sometimes hate smoulders almost unconsciously at other times he is furious and serves as a flag for serious violence Hatred has many faces and seems omnipresent that much is

clear The term Erida complex after the Greek goddess of hate symbolizes the common and deeply rooted nature of hatred Hatred is mighty as a destructive force He knows how to motivate individuals and large groups of people to bring out the worst in themselves He turns life among people into a desert However he cannot compete with Irene the goddess and the symbol of peace After all he is unable to correct what went wrong Nor is it a ground for building a peaceful society At the same time hatred is impotent against the positive freedom of people to transcend the negative Those who are open to this will see many connecting and therefore Irenian initiatives Hatred does not and should not have the last word Opposite the well of Erida is the Irenese the way to peace After examining the nature of hate this book focuses a wide angle lens on its many faces in individuals and groups as well as peoples Facing the negativity of hatred this book presents constructive approaches to fostering relationships between people and peace

Social developments in the European Union 2013 David Natali (OSE),2014-06-01 The European Union has gone through a crucial period marked by growing anti EU sentiments and the difficult implementation of its largely renewed socio economic governance After years of in depth innovations and the hope of reinvigorating the E M U social dimension European institutions have engaged in a lively debate on how to exit the recession and relaunch the integration project While most Member States have continued to pursue punitive austerity programmes at a time when 27 million Europeans are unemployed and a quarter of the EU population is at risk of poverty most stakeholders namely the trade union movement and policymakers agree on the need for an EU driven growth strategy This 2013 edition of Social developments in the European Union provides key insights from analysts and scholars Through the critical assessment of the EU economic governance of the last few years contributors have set guidelines for a reinforced EU social protection and investment plan The proposals for a pan European unemployment insurance scheme and an EU minimum income scheme are analysed together with a renewed focus on the gender dimension of European social policies Beyond economic and social governance this volume critically reviews national reforms of labour market policies While the state of the European economy is still gloomy the institutional and policy reforms proposed here represent an opportunity to unveil a new path for Europe
