International Monetary Economics, 1870-1960 M. June Flanders, 1989 This history of international monetary thought from the end of the nineteenth century to the middle of the twentieth century provides the most comprehensive survey of the literature on the theory of international finance yet produced The author argues that progress in the field has not been linear and classifies the literature according to groupings of ideas and personalities rather than chronologically After a brief survey of the Classical doctrines she examines the developments of all the main schools through the Neoclassicals the Keynesians and the New Classics

International Trade and Economic Development Rajat Acharyya, Saibal Kar, 2014 This graduate textbook offers advanced and contemporary readings in international trade and economic development and provides an overview of the fundamental topics in this area It brings together many of the issues that are considered staple reading for a course in trade and development and it offers a systematic coverage of the relevant and state of the art research on various aspects of the subject This includes detailed analysis of important sub topics such as trade and labour market trade and public economics the theory of the second best foreign aid factor mobility and regional and global welfare It also covers international trade and labour standards the informal labour market and TRIPS Aimed at post graduate students interested in trade theory and applications in development issues this book should also prove a valuable resource for practicing economists policy makers and advanced undergraduate students studying international trade The text balances extensive coverage of available literature in the area with substantive inclusions from new research published in leading journals and volumes It aims to fill the gap in the teaching resources and should promote further theoretical and empirical research in the subject

Handbook of International Economics P.B. Kenen, R.W. Jones, 1984-01-01 This Handbook adopts a traditional definition of the subject and focuses primarily on the explanation of international transactions in goods services and assets and on the main domestic effects of those transactions The first volume deals with the real side of international economics It is concerned with the explanation of trade and factor flows with their main effects on goods and factor prices on the allocation of resources and income distribution and on economic welfare and also with the effects on national policies designed explicitly to influence trade and factor flows In other words it deals chiefly with microeconomic issues and methods The second volume deals with the monetary side of the subject It is concerned with the balance of payments adjustment process under fixed exchange rates with exchange rate determination under flexible exchange rates and with the domestic ramifications of these phenomena Accordingly it deals mainly with macroeconomic issues although

microeconomic methods are frequently utilized especially in work on expectations asset markets and exchange rate behavior For more information on the Handbooks in Economics series please see our home page on <http://www.elsevier.nl> locate hes
