Erich Mendelsohn Complete Works Of The Architect:

Erich Mendelsohn Erich Mendelsohn, Bruno Zevi, 1985 Erich Mendelsohn Erich Mendelsohn, 1992 Erich Mendelsohn the most well known of the Expressionist architects first published this book his Complete Works in 1930 the title is something of a misnomer as it does not include his later less successful work It encompasses his wartime sketches some of them no larger than a postage stamp the seminal Einstein Observatory and his splendid commercial work of the 1920s and 30s including factories office buildings theaters housing and department stores Over 50 projects are shown through period photographs including interiors sketches drawings and models Reproduced here in full are all of the sketches Mendelsohn made when he was a soldier on the Russian front during the First World War fine examples of his early work and some of the most intensely personal drawings to come out of his period Also included is the first English translation of two lectures Mendelsohn delivered on his own unique vision of architecture and society **Till We Have Built Jerusalem** Adina Hoffman, 2016-04-05 A cultural history of Jerusalem under the British Mandate focusing on the tensions between its architecture and its political divisions The Architecture of Modern American Synagogues, 1950s-1960s Anat Geva, 2023-12-14 In the aftermath of World War II the United States experienced a rapid expansion of church and synagogue construction as part of a larger religious boom The synagogues built in that era illustrate how their designs pushed the envelope in aesthetics and construction The design of the synagogues departed from traditional concepts embraced modernism and innovations in building technology and evolved beyond the formal rational style of early 1950s modern architecture to more of an expressionistic design The latter resulted in abstraction of architectural forms and details and the inclusion of Jewish art in the new synagogues The Architecture of Modern American Synagogues 1950s 1960s introduces an architectural analysis of selected modern American synagogues and reveals how they express American Jewry's resilience in continuing their physical and spiritual identity while embracing modernism American values and landscape In addition the book contributes to the discourse on preserving the recent past e.g. mid 20th century architecture While most of the investigations on that topic deal with the brick mortar challenges this book introduces preservation issues as a function of changes in demographics in faith rituals in building codes and in energy conservation As an introduction or a reexamination The Architecture of Modern American Synagogues 1950s 1960s offers a fresh perspective on an important moment in American Jewish society and culture as reflected in their houses of worship and adds to the literature on modern American sacred architecture The book may appeal to Jewish congregations architects preservationists scholars and students in fields of studies such as architectural design sacred architecture American modern architecture and building technology Post WWII religious and Jewish studies and preservation and conservation *The Break with the Past* Deborah Ascher Barnstone, 2017-08-15 Between 1918 and 1933 the German interwar avant garde was a primary force driving European cultural innovation and modernism These innovations continue to influence artistic practice theory and arts education today

thus making a comprehensive study of the relationship between individual war experience and the immediate response of avant garde architects after the war all the more important The Break with the Past pursues several important interrelated questions What were the disparate war experiences of German architects and did they have different effects on Weimar cultural production Did political orientation play a part in support for the war In aesthetic choices What changes occurred in avant garde architectural practice after 1918 How do they compare with pre war positions and practices and expectations for post war outcomes In order to address these questions the book uses individual case studies of four leading architects Bruno Taut Walter Gropius Erich Mendelsohn and Hans Scharoun This is a valuable resource for academics and students in the areas of Art and Architecture History German history and Cultural Studies European Culture and Modernism

Constructing a Sense of Place Haim Yacobi, 2017-05-15 While it is widely recognized that architects and their architecture play a key role in constructing a sense of place the inherent nexus between an architectural ideology and the production of national space and place has so far been neglected Focusing on the Zionist ideology this book brings together practising architects and academics to critically examine the role of architects architecture and spatial practices as mediators between national ideology and the politicization of space The book first of all sets out the wider context of theoretical debates concerning the role of architecture in the process of constructing a sense of place then divides into six main sections The book not only provides an innovative new perspective on how the Israeli state had developed but also sheds light on how architecture shapes national identity in any post colonial and settler state *The Architecture of Red Vienna, 1919-1934* Eve Blau, 1999 Encyclopedic in its coverage this seminal work focuses on the architecture of Prague from the turn of the century to the end of the Second World War a rich matrix within which to place the figures who created the powerful innovative spirits of modern Czech architecture The book documents the architects structures and theoretical underpinnings that helped to shape Prague s cultural heritage and present day artistic spirit Weimar Germany Eric D. Kay Bea Jones, 2016-04-01 Franco Albini's works of architecture and design produced between 1930 and 1977 have enjoyed a recent revival but to date have received only sporadic scholarly attention from historians and critics of the Modern Movement A chorus of Italian voices has sung his praises none more eloquently than his protégé Renzo Piano Kay Bea Jones illuminating study of selected works by Studio Albini will reintroduce his contributions to one of the most productive periods in Italian design Albini emerged from the ideology of Rationalism to produce some of Italy's most coherent and poetic examples of modern design He collaborated for over 25 years with Franca Helg and at a time when professional male female partnerships were virtually unknown His museums and installation motifs changed the way Italians displayed historic artifacts He composed novel suspension structures for dwellings shops galleries and his signature INA pavilions where levity and gravity became symbolic devices for connoting his subjects Albini clarified the vital role of tradition in modern architecture as he experimented with domestic space His cohort defied CIAM ideologies to re-socialize postwar housing and speculate on ways of reviving Italian cities He explored new fabrication technologies from the scale of furniture to wide span steel structures yet he never abandoned the rigors of craft and detail in favor of mass production *Suspending Modernity* follows the evolution of Albini's most important buildings and projects even as they reveal his apprehensive attitudes about the modern condition Jones argues here that Albini's masterful use of materials and architectural expression mark an epic paradigm shift in the modern period
