

Erich Mendelsohn

Peter Gössel, Gabriele Leuthäuser

Erich Mendelsohn:

Erich Mendelsohn Erich Mendelsohn, Bruno Zevi, 1985 Eric Mendelsohn: Letters of an Architect Erich Mendelsohn, 1967 **Erich Mendelsohn, 1887-1953** Hans Rudolf Morgenthaller, 1987 100 Gennaro Postiglione, 2004

This volume features 100 homes of different architects Erich Mendelsohn Erich Mendelsohn, Sigrid Achenbach, 1988

Architecture in the Twentieth Century Peter Gossel, Gabriele Leuthäuser, 2001 After several pages of prologue summing up 18th century highlights especially the rise in importance of geometry some forty pages cover 1784-1916 focusing on the heavily fenestrated high rises of the Chicago School and the iron and glass pavilions of Europe The chapter spanning 1892-1925 concentrates on the many disputes over the trajectory of modernism Nieuwe Kunst Stijl Liberty Jugendstil and Art Nouveau all arguing the direction that the boom of prisons hospitals schools town halls and other institutional buildings would take Three more time divisions follow and a concise compendium of architect biographies ends the volume Along with an array of great pictures par for Taschen Gossel and Leuthäuser both active in the private sector add a strong prose style attentive to debates among architects and the socioeconomic stage on which architects act Annotation copyrighted by Book News Inc Portland OR

The Architecture of Modern American Synagogues, 1950s-1960s Anat Geva, 2023-12-14 In the aftermath of World War II the United States experienced a rapid expansion of church and synagogue construction as part of a larger religious boom The synagogues built in that era illustrate how their designs pushed the envelope in aesthetics and construction The design of the synagogues departed from traditional concepts embraced modernism and innovations in building technology and evolved beyond the formal rational style of early 1950s modern architecture to more of an expressionistic design The latter resulted in abstraction of architectural forms and details and the inclusion of Jewish art in the new synagogues The Architecture of Modern American Synagogues 1950s-1960s introduces an architectural analysis of selected modern American synagogues and reveals how they express American Jewry's resilience in continuing their physical and spiritual identity while embracing modernism American values and landscape In addition the book contributes to the discourse on preserving the recent past e.g. mid 20th century architecture While most of the investigations on that topic deal with the brick mortar challenges this book introduces preservation issues as a function of changes in demographics in faith rituals in building codes and in energy conservation As an introduction or a reexamination The Architecture of Modern American Synagogues 1950s-1960s offers a fresh perspective on an important moment in American Jewish society and culture as reflected in their houses of worship and adds to the literature on modern American sacred architecture The book may appeal to Jewish congregations architects preservationists scholars and students in fields of studies such as architectural design sacred architecture American modern architecture and building technology Post WWII religious and Jewish studies and preservation and conservation

The Early Sketches of German Architect Erich Mendelsohn (1887-1953) Hans Rudolf Morgenthaller, Erich Mendelsohn, 1992 Erich Mendelsohn was considered one of the most successful modern

architects in Germany during the 1920s This volume contains a catalogue of his early sketches It establishes a chronological sequence of the sketches and furnishes a clear explanation of his creative background A detailed evaluation of his relationship to the Blue Rider group supplies a source for his Expressionist intentions and design theory Mendelsohn's own statements from papers and letters are also examined **Weimar Germany** Eric D. Weitz, 2018-09-25 The definitive history of Weimar politics culture and society A New York Times Book Review Editor's Choice A Financial Times Best Book of the Year Thoroughly up to date skillfully written and strikingly illustrated Weimar Germany brings to life an era of unmatched creativity in the twentieth century one whose influence and inspiration still resonate today Eric Weitz has written the authoritative history that this fascinating and complex period deserves and he illuminates the uniquely progressive achievements and even greater promise of the Weimar Republic Weitz reveals how Germans rose from the turbulence and defeat of World War I and revolution to forge democratic institutions and make Berlin a world capital of avant garde art He explores the period's groundbreaking cultural creativity from architecture and theater to the new field of sexology and presents richly detailed portraits of some of the Weimar's greatest figures Weimar Germany also shows that beneath this glossy veneer lay political turmoil that ultimately led to the demise of the republic and the rise of the radical Right Yet for decades after the Weimar period continued to powerfully influence contemporary art urban design and intellectual life from Tokyo to Ankara and Brasilia to New York Featuring a new preface this comprehensive and compelling book demonstrates why Weimar is an example of all that is liberating and all that can go wrong in a democracy Till We Have Built Jerusalem Adina Hoffman, 2016-04-05 A cultural history of Jerusalem under the British Mandate focusing on the tensions between its architecture and its political divisions **Eric Mendelsohn, 1887-1953** Erich Mendelsohn, 2021-09-09 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant Erich Mendelsohn Erich Mendelsohn, 1987 **Erich Mendelsohn** Charlotte Benton, Erich Mendelsohn, Regina Stephan, 1999 The Einstein Tower Klaus Hentschel, 1997 Focusing on the Einstein Tower an architecturally historic observatory built in Potsdam in 1920 this book investigates German scientific life by blending biography architectural history scientific theory and research and scientific politics **Programs and Manifestoes on 20th-Century Architecture** Ulrich Conrads, 1975-11-15 The present volume offers eloquent testimony that many of the master builders of this century have held passionate convictions regarding the

philosophic and social basis of their art Nearly every important development in the modern architectural movement began with the proclamation of these convictions in the form of a program or manifesto The most influential of these are collected here in chronological order from 1903 to 1963 Taken together they constitute a subjective history of modern architecture compared with one another their great diversity of style reveals in many cases the basic differences of attitude and temperament that produced a corresponding divergence in architectural style In point of view the book covers the aesthetic spectrum from right to left from programs that rigidly generate designs down to the smallest detail to revolutionary manifestoes that call for anarchy in building form and town plan The documents placed in context by the editor are also international in their range among them are the seminal and prophetic statements of Henry van de Velde Adolf Loos and Bruno Taut from the early years of the century Frank Lloyd Wright's 1910 annunciation of Organic Architecture Gropius's original program for the Bauhaus founded in Weimar in 1919 Towards a New Architecture Guiding Principles by Le Corbusier the formulation by Naum Gabo and Antoine Pevsner of the basic principles of Constructivism and articles by R Buckminster Fuller on universal architecture and the architect as world planner Other pronouncements some in flamboyant style including those of Erich Mendelsohn Hannes Meyer Theo van Doesburg Oskar Schlemmer Ludwig Mies van der Rohe El Lissitzky and Louis I Kahn There are also a number of collective or group statements issued in the name of movements such as CIAM De Stijl ABC the Situationists and GEAM Since the dramatic effectiveness of the manifesto form is usually heightened by brevity and conciseness it has been possible to reproduce most of the documents in their entirety only a few have been excerpted

Makers of 20th-Century Modern Architecture Donald Leslie Johnson, Donald

Langmead, 2013-05-13 Makers of 20th Century Modern Architecture is an indispensable reference book for the scholar student architect or layman interested in the architects who initiated developed or advanced modern architecture The book is amply illustrated and features the most prominent and influential people in 20th century modernist architecture including Wright Eisenman Mies van der Rohe and Kahn It describes the milieu in which they practiced their art and directs readers to information on the life and creative activities of these founding architects and their disciples The profiles of individual architects include critical analysis of their major buildings and projects Each profile is completed by a comprehensive bibliography

The Other Modern Movement Kenneth Frampton, 2022-01-25 A revealing new look at modernist

architecture emphasizing its diversity complexity and broad inventiveness Usually associated with Mies and Le Corbusier the Modern Movement was instrumental in advancing new technologies of construction in architecture including the use of glass steel and reinforced concrete Renowned historian Kenneth Frampton offers a bold look at this crucial period focusing on architects less commonly associated with the movement in order to reveal the breadth and complexity of architectural modernism The Other Modern Movement profiles nineteen architects each of whom consciously contributed to the evolution of a new architectural typology through a key work realized between 1922 and 1962 Frampton's account offers new insights

into iconic buildings like Eileen Gray's E 1027 House in France and Richard Neutra's Kaufmann House in Palm Springs California as well as lesser known works such as Antonin Raymond's Tokyo Golf Club and Alejandro de la Sota's Maravillas School Gymnasium in Madrid. Foregrounding the ways that these diverse projects employed progressive models advanced new methods in construction techniques and displayed a new sociocultural awareness. Frampton shines a light on the rich legacy of the Modern Movement and the enduring potential of the unfinished modernist project. *The Break with the Past* Deborah Ascher Barnstone, 2017-08-15. Between 1918 and 1933 the German interwar avant garde was a primary force driving European cultural innovation and modernism. These innovations continue to influence artistic practice theory and arts education today thus making a comprehensive study of the relationship between individual war experience and the immediate response of avant garde architects after the war all the more important. *The Break with the Past* pursues several important interrelated questions: What were the disparate war experiences of German architects and did they have different effects on Weimar cultural production? Did political orientation play a part in support for the war? In aesthetic choices? What changes occurred in avant garde architectural practice after 1918? How do they compare with pre war positions and practices and expectations for post war outcomes? In order to address these questions the book uses individual case studies of four leading architects: Bruno Taut, Walter Gropius, Erich Mendelsohn and Hans Scharoun. This is a valuable resource for academics and students in the areas of Art and Architecture History, German history and Cultural Studies, European Culture and Modernism.

Erich Mendelsohn, 1960 **Building the Cold War** Annabel Jane Wharton, 2001. In postwar Europe and the Middle East Hilton hotels were quite literally little Americas. For American businessmen and tourists a Hilton Hotel with the comfortable familiarity of an English speaking staff, a restaurant that served cheeseburgers and milkshakes, transatlantic telephone lines and most important air conditioned modernity offered a respite from the disturbingly alien. For impoverished local populations these same features lent the Hilton a utopian aura. The Hilton was a space of luxury and desire, a space that realized permanently and prominently the new and powerful presence of the United States. *Building the Cold War* examines the architectural means by which the Hilton was written into the urban topographies of the major cities of Europe and the Middle East as an effective representation of the United States. Between 1953 and 1966 Hilton International built sixteen luxury hotels abroad. Often the Hilton was the first significant modern structure in the host city as well as its finest hotel. The Hiltons introduced a striking visual contrast to the traditional architectural forms of such cities as Istanbul, Cairo, Athens and Jerusalem where the impact of its new architecture was amplified by the hotel's unprecedented siting and scale. Even in cities familiar with the Modern the new Hilton often dominated the urban landscape with its height changing the look of the city. The London Hilton on Park Lane for example was the first structure in London that was higher than St Paul's cathedral. In his autobiography Conrad N Hilton claimed that these hotels were constructed for profit and for political impact: an integral part of my dream was to show the countries most exposed to Communism the other side of the

coin the fruits of the free world Exploring everything the carefully drafted contracts for the buildings to the remarkable visual and social impact on their host cities Wharton offers a theoretically sophisticated critique of one of the Cold War s first international businesses and demonstrates that the Hilton s role in the struggle against Communism was as Conrad Hilton declared significant though in ways that he could not have imagined Many of these postwar Hiltons still flourish Those who stay in them will learn a great deal about their experience from this new assessment of hotel space

Discover tales of courage and bravery in Crafted by is empowering ebook, Stories of Fearlessness: **Erich Mendelsohn** . In a downloadable PDF format (Download in PDF: *), this collection inspires and motivates. Download now to witness the indomitable spirit of those who dared to be brave.
