A Manual of Land and Fresh Water Vertebrate Animals of the United States (exclusive of Birds) Henry Sherring Pratt, 1923 The naturalist frequently finds that to learn to identify species is a most difficult task and yet nothing is more important to his work He finds that species are not separated merely on shape and colour but on structural peculiarities which frequently are connected with particular habits This is especially the case in vertebrate animals which in Great Britain with its very limited number of forms may be identified in a haphazard manner by elimination This is impossible in a country where different climatic areas interdigitate and where there are many species as the United States which for the purpose of the naturalist is a continent Here Prof H S Pratt fills the bill by his *Vertebrate Animals of the United States* which however omits birds A short account of each group is given the anatomical features dividing it up into sub groups and families being usually illustrated Where necessary special features for families are described and then follow keys to the genera descriptions of the same and keys to their species The whole closes with a good bibliography and a glossary of technical terms The short descriptions of each species with mention of their geographical distributions and habitats are excellent and the tabulation of the sub species most useful We learn that there are about 600 species of freshwater fishes 70 of newts and 61 of frogs and toads we are given a key by which their tadpoles and eggs can be identified 300 reptiles and a wide series of mammals belonging to 9 orders We characterise this publication as a book for ready reference such as should be on the

shelves of all American naturalists Barefoot-Hearted Kathleen Meyer, 2002-02-26 The Wyoming Centennial Wagon Train ended in Cody in a dismal torn down drive in movie theater Before setting up the corral we were forced to clear away shards of glass bent nails broken lumber My prairie skirt and petticoats hung ragged and clay caked and under a droopy Stetson my frizzled hair appeared at once greased and starched beyond human recognition A cloud a sort of vaporousness redolent with fresh acrid sweat on top of powerful stale sweat hung thickly about me Laced as it was with a woman's sweet musky secretions and all gone past ripe oddly it was a pungency I savored Such goaty piquance though was cause to be shunned in any town setting The look of my world had changed Gone were the high dollar designer clothes and the zipping around fabled Marin County in a candy apple red 1966 Mustang convertible It was true that I unfailingly sought the ironies in life and with a kind of dual personality shifted easily through incongruencies such as town strolls in high heels and backcountry hiking in bare feet the bucket seats of a classic automobile and the broken down bench of a beater truck It was only during the years that I'd worn white overalls taped drywall and come home every night much like Charles Schulz's Pig Pen flaking a cloud of dried white mud bits onto the rug that I'd felt moved to keep my fingernails painted red Now I was to slip farther than ever planned toward one end of my seesaw and then incredibly by conscious design inch out even farther from Barefoot Hearted With more than 1.5 million copies in print Kathleen Meyer's groundbreaking international bestseller *How to Shit in the Woods: An Environmentally Sound Approach to a Lost Art* has been widely embraced by the outdoor community and has found its way into myriad places national parks outdoor leadership schools and scout troop headquarters the camp tents of those who have discovered that it is amusing out loud reading and the bathroom literature baskets of households around the world Now from the Rocky Mountain West Meyer brings us *Barefoot Hearted: A Wild Life Among Wildlife* a coming into the country story told with the frank dry humor and sharp research of her first book The country in this case is Montana's tall reaching landscape with its ever underfoot wild critters the on tenterhooks territory of a new romantic relationship and the pressure cooker that is our precarious global imbalance Meyer finds herself in midlife standing out under yawning skies surrounded by sagebrush and cactus having fallen for the Irish charm of itinerant farrier Patrick McCarron As partners they travel across three mountain states with draft horses and a covered wagon and then set up housekeeping in a seventy-five year old dairy barn In this primitive structure the author rapidly discovers she's living with troops of mice a nursery colony of seventy-five bats sexually fired up skunks and more flies than in a pig shed She tells of a freakish season that orphaned seventy-seven bear cubs an unusual fly fishing trip on a famed blue ribbon trout stream the visitations of moose and the discovery of a den of wolves Meyer's prose is original and inspired playful yet provocative She carries us vividly back to the settlers' old West while pondering modern day dilemmas those of fitting into this fast hurtling world of determining amid the earth's rising extinctions of species whose planet it is and of managing to stay empowered residing with a man who stands six feet six and beats steel on an anvil for a living A personal chronicle of conscience and a love story of rare and quirky
