scholarly work that offers the first full length reassessment in English of the importance of the Brücke group to German modernism specifically and to international modernism more generally. It challenges, interrogates and updates existing orthodoxies in the field of Brücke studies by deploying new research combined with innovative interpretative approaches. This is an exciting volume of essays with an interlinking tripartite structure that charts the significance of this pioneering German avant-garde group in relation to various critical themes: namely cultural and material identity, collectivity and selfhood, as well as defamation and rehabilitation. The book is unique in the field in that it seeks to excavate specific historical research relating to the activities of the Brücke as a bohemian yet nonetheless enterprising artists' community and considers the contributions of the key members in relation to the dynamics of that group rather than simply on an individual basis. It thoroughly explores the historiography of the Brücke artists' reception throughout the turbulent history of the twentieth century up until the present day.

The Vital Art of D.H. Lawrence Jack Stewart, 1999 D.H. Lawrence asserts Jack Stewart expresses a painter's vision in words supplementing visual images with verbal rhythms. With the help of twenty-three illustrations, Stewart shows how Lawrence's style relates to impressionism, expressionism, primitivism and futurism. Stewart examines Lawrence's painterly vision in *The White Peacock*, *Sons and Lovers*, *The Rainbow*, *Women in Love*, *Kangaroo* and *The Plumed Serpent*. Stewart's final three chapters deal with the influence exerted on Lawrence's fiction by the work of Van Gogh, Cézanne, Gauguin and the Japanese artists Hokusai and Hiroshige. He concludes by synthesizing the themes that pervade this interarts study: vision and expression, art and ontology.

The Great War and the Death of God Charles A. O'Connor, 2014-04-07 A compelling analysis of how World War I spurred the rise of atheism and the subsequent effect on Western theology, philosophy, literature and art. The catastrophic Great War left humanity in a world no longer trustworthy and reassuring but seemingly meaningless and indifferent. Instead of redressing humanity's cosmic alienation, postwar Western culture abandoned its concern for cosmic meaning, lost its confidence in human reason and enabled the scientific worldview of neo-Darwinian materialism to emerge and eventually dominate the Western mind. According to the proponents of that worldview, science is the only source of genuine truth; nature is the product of a blind evolutionary process and reality at bottom is just physics and chemistry. Thus, God is dead and continued belief in a transcendentally purposeful universe is intellectually indefensible and either disingenuous or delusional. By turning away from the eternal questions about the nature of reality, Western culture effectively ceded unwarranted credibility and prominence to neo-Darwinian materialism, including its recently strident New Atheism. O'Connor revisits the 20th century's journey from Nietzsche's declaration of the death of God to the rise of materialism as the dominant worldview of western intelligentsia. We live in a world that has largely expelled both mind and meaning from the citadels of serious intellectual pursuit, and O'Connor's book is a fascinating and scholarly expedition into the how and why of that troubling development. Carter Phipps, author of *Evolutionaries*. I found this topic to be top rate. The book is well researched and conceived, nicely narrated and analyzed, and an original body of inquiry into a

Jean Rhys's Modernist Bearings and Experimental Aesthetics Sue Thomas, 2022-01-27 Addressing Jean Rhys's composition and positioning of her fiction this book invites and challenges us to read the tacit silent and explicit textual bearings she offers and reveals new insights about the formation scope and complexity of Rhys's experimental aesthetics Tracing the distinctive and shifting evolution of Rhys's experimental aesthetics over her career Sue Thomas explores Rhys's practices of composition in her fiction and drafts as well as her self reflective comment on her writing The author examines patterns of interrelation intertextuality intermediality and allusion both diachronic and synchronic as well as the cultural histories entwined within them Through close analysis of these this book reveals new experimental thematic generic and political reaches of Rhys's fiction and sharpens our insight into her complex writerly affiliations and lineages

The Expressionist Turn in Art History Kimberly A. Smith, 2017-07-05 During the period in which Expressionist artists were active in central Europe art historians were producing texts which also began to be characterized evocatively as expressionist yet the notion of an expressionist art history has yet to be fully explored in historiographic studies of the discipline This anthology offers a cross section of noteworthy art history texts that have been described as expressionist along with critical commentaries by an international group of scholars Written between 1912 and 1933 the primary sources have been selected from the published scholarship of both recognized and less familiar figures in the field's Germanic tradition Wilhelm Worringer Fritz Burger Ernst Heidrich Max Dvor Heinrich Wölfflin and Carl Einstein Translated here for the first time these examples of an expressionist turn in art history along with their secondary analyses and the book's introduction offer a productive lens through which to re examine the practice and theory of art
