**Smart Architecture - A Sustainable Approach for Transparent Building Components Design** Valentina Frighi, 2021-08-25 This book explores the specific role that glazing technologies play within the world of smart architecture as important components of contemporary and future sustainable architectural and technological research Smart Architecture begins with a definition of the concept of smart in architecture and examines how innovative technologies and materials have shaped buildings over the years The author then provides a supporting database of contemporary smart architecture mapping adopted strategies recognizing common patterns and evaluating current and future trends in the context of smart building envelopes energy efficiency and the development of high potential innovative building components The book proceeds with a focus on the specific role that glazing technologies play in this framework and provides a systematic methodology to quantify options for the effective integration of transparent building components within advanced and innovative building envelope systems

**Sustainable Resilient Built Environments** Rama Devi Nandineni, Susan Ang, Norwina Binti Mohd Nawawi, 2024-07-05 The proceedings of Sustainable Resilient Built Environments are based on the SRBE 2022 conference held in December 2022 It focuses on the advances under the overarching theme of Sustainability The concept of Sustainability has been conventionally defined as meeting the needs of the present without compromising the ability of future generations to meet their own needs In scientific literature sustainable development has been analysed using different qualitative approaches such as economic social ecological cultural institutional ethical and political In this edited volume the concepts of both sustainability and resilience are considered to open up useful pathways towards achieving sustainable buildings and infrastructure Though the concepts of sustainability and resilience are considered to help improve the built environment the interrelations and interdependence between these two concepts are not clearly evident This has led to the questions such as Is the sustainable built environment always resilient Is the resilient built environment always sustainable What more is needed for sustainability In exploring

these pertinent questions the proposed edited volume is expected to unveil and disseminate new insights on the themes related to sustainable and resilient built environment The themes of the proceedings lay a platform for researchers and professionals to integrate the aspects including smart innovation technologies green energy efficiency carbon reduction sustainability and resilience with regard to buildings and other built infrastructure Specific objectives included as per the five themes are as follows Environment Design and Sustainability Sustainable Smart Buildings Community Resilience Social Sustainability Heritage and Sustainability Pandemic issues and sustainable development

management and other related fields      Case Studies in Parametric Design Jeffrey Collins, 2023-09-28 Case Studies in Parametric Design is a guide to scripting digital models for architects, designers and builders. The use of parametric design in architecture has afforded the realization of incredible built work. Modelling software can resolve complex geometry and aid in the development of stunning creations. Methods for creating the digital models to achieve these results, however, can be perplexing. Learning curves are steep and benefits garnered from adapting existing workflows to incorporate new tools may appear trivial. This book describes programming techniques for a variety of buildings and provides novices an understanding of language and processes, challenges intermediate users with rigor and intentionality, and offers proficient practitioners objectives beyond novel form making. The case studies consist of six mass topologies and six facade topologies; each includes sample topology models and scripts, descriptions of steps for generating customizable parametric models, and suggestions for additional modelling inquiries. This is essential reading for students and practitioners interested in harnessing the full potential of parametric design.

*Wood* Joachim Radkau, 2013-12-23 The iceman could not do without wood when he was climbing his Alpine glacier, nor could medieval cathedral builders or today's construction companies. From time immemorial, the skill of the human hand has developed by working wood so much so that we might say that the handling of wood is a basic element in the history of the human body. The fear of a future wood famine became a panic in the 18th century and sparked the beginnings of modern environmentalism. This book traces the cultural history of wood and offers a highly original account of the connection between the raw material and the human beings who benefit from it. Even more, it shows that wood can provide a key for a better understanding of history, of the peculiarities as well as the varieties of cultures, of a co-evolution of nature and culture, and even of the rise and fall of great powers. Beginning with Stone Age hunters, it follows the twists and turns of the story through the Middle Ages and the Industrial Revolution to the global society of the twenty-first century in which wood is undergoing a varied and unexpected renaissance. Radkau is sceptical of claims that wood is about to disappear, arguing that such claims are self-serving arguments promoted by interest groups to secure cheaper access to and control over wood resources. The whole forest and timber industry often strikes the outsider as a world unto itself, a hermetically sealed black box, but when we lift the lid on this box as Radkau does here, we will be surprised by what we find within. Wide-ranging and accessible, this rich historical analysis of one of our most cherished natural resources will find a wide readership.

**Health Spaces of the World** Joe Boschetti, 2000 New designs for health facilities are in constant demand. The Health Spaces Series features projects that are considered to be among the best designs of our time for the modern health industry. Projects from around the world have been featured and chapter      **Graz Architecture** Michael Szyszkowitz, Renate Ilsinger, 2003 This book focuses solely on buildings accessible to the general public, avoiding shops and bars, restaurants. Page 27      *Bioclimatic Approaches in Urban and Building Design* Giacomo Chiesa, 2021-01-04 This book explores the bioclimatic approach to building design. Constant innovations in the field are evident, including the need to face climate changes and

increase the local resilience at different scales regional urban architectural Differently from other contributions this book provides a definition of the bioclimatic design approach following a technological and performance driven vision It includes one of the largest collection of research voices on the topic becoming also a critical reference work for bioclimatic theory It is intended for architects engineers researchers and technicians who have professional and research interests in bioclimatic and in sustainable and technological design issues      *Designing Kinetics for Architectural Facades* Jules

Moloney,2011-06-14 Architectural facades now have the potential to be literally kinetic through automated sunscreens and a range of animated surfaces This book explores the aesthetic potential of these new types of moving facades Critique of theory and practice in architecture is combined here with ideas from kinetic art of the 1960 s From this background the basic principles of kinetics are defined and are used to generate experimental computer animations By classifying the animations a theory of kinetic form called state change is developed This design research provides a unique and timely resource for those interested in the capacity of kinetics to enliven the public face of architecture Extra material including animations can be seen at [www.kineticarch.net/statechange](http://www.kineticarch.net/statechange)

**Gestures in Time** Phineas Harper,Markus Bogensberger,2019-12-02 This book features the winner and another five outstanding projects from the 19th Architecture Prize of the Land Steiermark They are as engaging and diverse as the region from a tiny sliver of riverside to one of the most visited Basilicas in the Catholic world From architects taking their first steps to those at the very height of their careers From the Mur valley to nearly a kilometer above sea level The stories these projects tell describe a different way of doing architecture They speak of agents of social equity and cultivators of culture and the spirit above economic goals In a world addicted to speed the careful gestures in time of Styria s richest architecture show what is possible when we slow down      **Dream Houses** Francisco

Asensio Cerver,1998 A variety of houses by contemporary architects and designers explained and described in depth This volume is amply illustrated in color with large format photographs and includes plans sketches and details in black and white which unveil the secrets of each buildings A must for architects decorators and designers for students in these fields as well as for the general public interested in remaining up to date on these topics and obtaining ideas on the latest developments in single family housing throughout the world The text is clear and concise without excluding relevant technical information presented in descriptive reports prepared by the architects themselves Dust jacket fly leaf      Technological Paradigms and

Digital Eras Giacomo Chiesa,2019-07-24 The book connects the ICT and the architectural worlds analyzing modeling materialization and data driven visions for design issues at different scales Furthermore using sample modeling and materialization tools it explores the links between performance driven design approaches and the application of new digital technologies Intended for architects and urbanists it provides a theoretical framework to address the implications of the digital revolution in building design and operation Furthermore combining insights from IT and ICT with architectural and urban design know how it offers engineering professionals a technology driven interpretation of the building design field

**High-Performance Double Skin Façade Buildings** Mona Azarbayjani, 2022-07-13 This book provides a comprehensive theoretical platform for the use and construction of double skin fa ade projects The DSF concept has been used mostly in European buildings however its success in other climates should be addressed Increasing numbers of buildings are featuring double skin fa ade technology in the US however still relatively few have been studied for their performance in operation This book gives architects a practical guide to analyze and evaluate the actual performance of double skin fa ade buildings in different climatic contexts It is important for high performance buildings to have tools to evaluate a design s predicted performance to achieve specific sustainable goals To determine that the application of DSF in different climates will provide better thermal comfort building simulation tools analyze various thermal comfort parameters through studies of the fa ade and compare them with the actual building s performance data The book takes the reader on an on site tour of eight DSF buildings around the US Interviews with the buildings architects and engineers owners and users offer additional perspectives and insights into the construction and performance of these developments in building design This will provide architects with a comprehensive understanding of the challenges and opportunities in integrating double skin fa ades into their projects *Studienzentrum Inffeldgründe der TU Graz* Frank Werner, 2001 *MOVE* Michael Schumacher, Oliver Schaeffer, Michael-Marcus Vogt, 2012-11-05 Dynamic components and adaptive elements are becoming increasingly important in contemporary architecture and not just because of their visual effect If architects and engineers are engaging more and more with the issue of movement whether in the form of sun tracking solar cells lowerable walls or intelligently programmed elevators it s because they are busy exploring responses to three challenges How can we control and reduce the energy requirement of buildings How can we expand the range of possible uses And how can we represent illustrate accommodate and control dynamic movements in buildings Designers and builders who seek to use kinetic components face technical and design challenges that aren t covered by traditional structural theory For these users this book presents the technical tools and constructional solutions that will allow them to implement these movements concretely and deploy them functionally within the domains of of Energy Change of Use and Interaction First it lays out the fundamentals and design principles of kinetics in architecture technology art and nature in a structured manner In a third section forty movable elements are shown in action each on a double page with specially prepared phase drawings and organized by type of movement including rotation sliding folding and transformation The international examples from noted architects range from window mechanisms to solar protection and light redirection systems movable walls and roofs and movable civil engineering structures **Architecture in Austria : a Survey of the 20th Century** Otto Kapfinger, Dietmar Steiner, Adolph Stiller, Jaime Salazar, 1999 **The Architects' Journal** , 1997
