Escalation And Negotiation In International Conflict:

Escalation and Negotiation in International Conflicts I. William Zartman, Guy Faure, Guy Olivier Faure, 2005-12-08 This volume examines the point where the concepts and practices of escalation and negotiation meet The contribution of NGOs to international conflict resolution Tilman Pradt, 2014-04-11 Non governmental organisations NGOs have become important actors in the globalised world They run aid and relief programmes in the poorest countries support international institutions like the United Nations or are watchdogs of them for example watchdogs of the Bretton Woods institutions In doing so NGOs naturally work permanently with state agencies and it is probably hard to find an NGO which is totally free of any governmental support in financial logistical or informative matters Thus there are strong NGO government connections on a daily work basis NGOs run multiple attempts to contribute to the resolution of conflicts on all political levels They bring together people on the grass root level they try to influence high officials through public pressure and they organise conferences and discussions with members and consultants of the concerned parties The latter approach is analysed in this study But how do NGOs influence the level of official international relations To which degree can NGOs improve the relations of two conflicted parties especially when the conflict is protracted and severe The aim of this study is to define the preconditions of successful NGO mediation to measure the NGO influence as an antecedent condition for successful mediation and to exhibit its limits The underlying assumption is that conflict resolution is more likely if NGO mediation supports this attempt This approach can be labelled as an assumption of constant effect since the focus is on understanding the NGOs influence on international conflict resolution Three cases of NGO led mediation attempts are analysed The cases are selected because of their problematic official relations are chosen under criteria of comparability Thus they have similar conditions framework in common namely in matters of time territory and main actors The case studies analysed are seated in the Middle East because negotiations between Israel and Palestine were and still are highly conflicted protracted and many mediation attempts by third parties have taken place there The analysis of these three cases their differences and similarities shall lead to a better general understanding of the possibilities and limits of NGOs and the necessary preconditions

Psychological and Political Strategies for Peace Negotiation Francesco Aquilar, Mauro Galluccio, 2010-11-15 Peace is one of the most sought after commodities around the world and as a result individuals and countries employ a variety of tactics to obtain it One of the most common practices used to accomplish peace is negotiation With its elevated role in the dialogue surrounding peace negotiation is often steeped in politics and focused on managing parties in conflict However the art and science of negotiation can and should be viewed more broadly to include a psychological and cognitive approach Psychological and Political Strategies for Peace Negotiation gathers the foremost authors in the field and combines their expertise into a volume which addresses the complexity of peace negotiation strategies To further underscore the importance of successful negotiation strategies the editors have also included the unique perspective of authors with personal experience with political upheaval in Serbia and Lebanon Though each chapter focuses on a different topic they are integrated to create a foundation for future research and practice Specific topics included in this volume embrace Changing minds and the multiple intelligence MI framework Personal schemas in the negotiation process Escalation of image in international conflicts Representative decision making Transformative leadership for peace negotiation Psychological and Political Strategies for Peace Negotiation is an essential reference for psychologists negotiators mediators and conflict managers as well as for students and researchers in international cross cultural and peace psychology studies

International Mediation in Civil Wars Timothy D Sisk, 2009-01-08 This book evaluates the role of international mediators in bringing civil wars to an end and makes the case for powerful peacemaking using incentives and sanctions to leverage parties into peace As internal violence within countries is a hugely significant threat to international peace in the post Cold War era the question of how these wars end has become an urgent research and policy question This volume explores a critical aspect of peacemaking that has yet to be sufficiently evaluated the turbulent period beyond the onset of formal or open negotiations to end civil wars and the clinching of an initially sustainable negotiated settlement The book argues that the transnational flow of weapons resources and ideas means that when civil wars today end they are more likely to do so at the negotiating table than on the battlefield It uses bargaining theory to develop an analytical framework to evaluate peace processes moving from stalemate in wars to negotiated settlement and it rigorously analyses the experiences of five cases of negotiated transitions from war and the role of international mediators South Africa Liberia Burundi Kashmir and Sri Lanka

International Conflict Stephen L. Quackenbush, 2014-08-01 International Conflict Logic and Evidence is based on the premise that proper understanding of international conflict a necessary prerequisite for achieving peace can come only from logic and evidence not from opinion and anecdote This groundbreaking book introduces students to

international conflict's key theories and empirical research. Throughout the text, author Stephen L. Quackenbush gives examples that enable readers to see the theory in real world events and provides the data from the most recent research. Covering the entire process of interstate war from causes of conflict to escalation, conduct, resolution, and recurrence, the book provides readers with a fascinating, thorough study that will help them understand how international conflict works.

Understanding Conflict and Conflict Analysis Ho-Won Jeong, 2008-04-08 effectively fills a long standing void and will no doubt be hailed as a much needed new addition to the literature. This text very much exemplifies the strength of Ho-Won Jeong as a theorist and one of the more prolific writers in the larger peace and conflict studies field. The final three chapters on De-escalation Dynamics, which includes a brief section on third party intervention, Conciliation Strategies, and especially the one on Ending Conflict, which provides a range of outcomes beyond the usual focus on third party intervention, read like a mediation epitomizes the value of this new text. *Journal of Peace Research* an awesome tour d'horizon of modern war, violence and confrontation within and between nations. Illustrating via just about every conflict in every corner of the world, the author invokes an endless array of insights and interpretations ranging from the micro to the macro, beautifully written in a seamless sequence of closely linked and discursive essays. Professor J. David Singer, University of Michigan: Ho-Won Jeong has written an illuminating analysis of the dynamics of conflict. He lays out the tools we have to analyze conflict in a literate and comprehensive way. A valuable book for anyone interested in a more comprehensive understanding of conflict, its sources and its de-escalation and termination. Janice Gross Stein, Belzberg Professor of Conflict Management, Director, Munk Centre for International Studies, University of Toronto: Jeong has successfully combined behavioral and structural analysis of the dynamics of social conflict. This volume covers the multiple dimensions: escalation, entrapment, de-escalation, termination, and resolution, both of violent and non-violent confrontation between adversaries, as well as the utility and limitations of external intervention. For students of the social sciences, it should serve as an excellent introduction to the complex realities of social conflict. Milton Esman, John S. Knight Professor of International Studies, Emeritus, Cornell University: By examining the dynamic forces which shape and re-shape major conflicts, this timely book provides students with the knowledge base needed to successfully study conflict, sources, processes, and transformations. Broad in focus, it addresses the multiple social, political, and psychological features central to understanding conflict situations and behaviour. A range of both recent and historical examples, including the Arab-Israeli conflict, the War on Terrorism, the Cold War, and the civil wars in Sudan, former Yugoslavia, and Sri Lanka, are discussed, illustrating the application of concepts and theories essential to the analysis of inter-group, inter-state, and intra-state conflict, and conflict resolution in a wider context. *Understanding Conflict and Conflict Analysis* is key reading for students of international relations, peace and conflict studies, conflict resolution, international security, and international law. *The Prevention and Intervention of Genocide* Samuel Totten, 2008-03-31.
