European Emissions Trading in Practice Stefano Clò, 2011 Emission markets are crucial both to provide the right incentives to reduce GHG emissions and to fund investments necessary for a transition to a low carbon world Emission markets however cannot achieve these objectives if inappropriately designed This book is a novel and fresh attempt to look at the real functioning of the EU Emission Trading Scheme and to assess its effectiveness and inconsistencies its positive and negative impacts on industrial and financial markets With the overall objective to improve its design and performance Carlo Carraro University of Venice Italy this important book has the great achievement of addressing a complicated and socially highly debated issue of how society could be given optimal incentives for emission reductions from a legal and economic perspective Moreover it not only addresses the various issues from a theoretical perspective but provides important empirical evidence on the working of emissions trading as well The book will undoubtedly have important lessons not only at the theoretical level but also for policy makers interested in improving the effectiveness of emission trading schemes From the foreword by Michael Faure This unique and up to date book analyses the functioning of the European Emissions Trading Scheme ETS and assesses the extent to which relevant legislation has affected its capacity to promote cost effective

reduction of European carbon emissions The author investigates whether inefficiency has been caused by both the ETS cap setting procedure and by the ETS relevant allocation rule as defined by Directive 2003/87/EC He then considers whether the new Directive 2009/29/EC which reforms the ETS institutional design is likely to improve the scheme's effectiveness by reducing the risk of carbon leakage which could potentially be a consequence of implementing a unilateral policy across the asymmetric political landscape of Europe This well documented book will appeal to researchers and postgraduate students in environmental law and environmental economics as well as policymakers within environment industry and economics and electric and industrial operators and stakeholders Environmental NGOs energy and environmental consulting groups members of the European Commission and energy and environmental think tanks will also find much to interest them in this insightful book

Economics and Regulation in China Michael Faure, Guangdong Xu, 2013-10-15 This book from a top international group of scholars explores the ways in which economic tools can be used to improve the quality of regulation in general and legislative tools in particular As the role of law becomes increasingly important in China the question arises of how effective regulatory and legislative tools can be developed to accompany the Chinese evolution towards a welfare state China therefore provides a unique case study for scholars and policymakers interested in examining how regulation can play a role in promoting sustainable development Economics and Regulation in China goes beyond traditional economic analysis of law by focusing specifically on the question of how economic tools can guide the quality of legislation To this end the book centres in on three areas regulation as a tool of economic growth competition policy and environmental policy Not only are these three domains of great importance for China but they are also relevant for a broad scholarship interested in the economic analysis of law

This volume contributes to discussions on how ex ante evaluation of legislative proposals and ex post analysis can increase the effectiveness and efficiency of regulation using economic tools offering insights that go beyond the particular case of China. The analysis offered by this book makes it an invaluable resource for academics and policymakers alike.

Public Procurement and the EU Competition Rules Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market. Hitherto their close connection has been noted but not closely examined. This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market. This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition. This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted. The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective. Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement. It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law.

Research Handbook on EU Agriculture Law Joseph A. McMahon, Michael N. Cardwell, 2015-11-27 Following the conclusion of the latest round of reforms to the Common Agricultural Policy CAP in 2013 the Research Handbook on EU Agriculture Law provides an up to date discussion of these reforms and the changing landscape in which the CAP now operates. Adopting an interdisciplinary approach and with international contributors from across Europe and the United States the Handbook commences with analyses of the legal instruments which implement the reformed CAP before moving on to consider questions of land use the role of agriculture within the wider food chain and the international dimension. In these contexts particular issues identified include the environmental impact of past present and future farming practices the ability of the food chain to accommodate consumer preferences and scientific innovation and the hurdles to be cleared before international consensus can be reached on a whole range of agricultural imperatives. As well as providing a state of the art point of reference for academics this comprehensive book will be of great interest to students scholars and policymakers dealing with these new challenges faced by agriculture in the EU.

International Economic Law in the 21st Century Ernst-Ulrich Petersmann, 2012-07-24 The state centred Westphalian model of international law has failed to protect human rights and other international public goods effectively. Most international trade financial and environmental agreements do not even refer to human rights consumer welfare democratic citizen participation and

transnational rule of law for the benefit of citizens This book argues that these multilevel governance failures are largely due to inadequate regulation of the collective action problems in the supply of international public goods such as inadequate legal judicial and democratic accountability of governments vis a vis citizens Rather than treating citizens as mere objects of intergovernmental economic and environmental regulation and leaving multilevel governance of international public goods to discretionary foreign policy human rights and constitutional democracy call for civilizing and constitutionalizing international economic and environmental cooperation by stronger legal and judicial protection of citizens and their constitutional rights in international economic law Moreover intergovernmental regulation of transnational cooperation among citizens must be justified by principles of justice and multilevel constitutional restraints protecting rights of citizens and their public reason The reality of constitutional pluralism requires respecting legitimately diverse conceptions of human rights and democratic constitutionalism The obvious failures in the governance of interrelated trading financial and environmental systems must be restrained by cosmopolitan constitutional conceptions of international law protecting the transnational rule of law and participatory democracy for the benefit of citizens

Bibliography of Agriculture, 1990 *Environmental Management in Practice: Vol 1* Paul Compton, Dimitri Devuyt, Luc Hens, Bhaskar Nath, 2013-01-11 Focuses on the instruments and tools currently available to the environmental manager A theoretical background to the instruments is given together with an overview of those instruments that are in common use today with particular attention to the physical economic legislative and communication instruments *The Law and Economics of Enforcing European Consumer Law* Franziska Weber, 2016-03-03 In the internet age the need for effective consumer law enforcement has arguably never been greater This timely book is a comparative law and economic analysis of the changing landscape of EU consumer law enforcement policy EU member states are moving away from purely public or private law enforcement and now appear to be moving towards a more mixed approach not least due to European legislation This book reflects on the need for and creation of efficient enforcement designs It examines the various economic factors according to which the efficiency of different enforcement mechanisms can be assessed Hypothetical case scenarios within package travel and misleading advertising dealing with substantial individual harm and trifling and widespread harm are used to illustrate various consumer law problems Design suggestions on how to optimally mix enforcement mechanisms for these case scenarios are developed The findings are then used as a benchmark to assess real life situations in countries with different enforcement traditions the Netherlands Sweden and England The book is of value to both researchers and policy makers working in the area of consumer protection

From Chasing Violations to Managing Risks Florentin Blanc, 2018-09-28 Florentin Blanc focuses specifically on regulatory inspections and enforcement their historical development contrasted approaches and methods and their relative effectiveness in achieving regulatory objectives Inspections aimed at verifying compliance with regulations are one of the most significant activities of modern states in terms of the number of staff employed or of people affected and one of the

most visible ones but have long remained relatively under researched or at least not considered as such **Commercial and Economic Law in the European Union** Jules Stuyck, 2024-04-17 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of the structure competence and management of the European Union provides substantial and readily accessible information for lawyers academics and policymakers likely to have dealings with its activities and data No other book gives such a clear uncomplicated description of the organization s role its rules and how they are applied its place in the framework of international law or its relations with other organizations The monograph proceeds logically from the organization s genesis and historical development to the structure of its membership its various organs and their mandates its role in intergovernmental cooperation and its interaction with decisions taken at the national level Its competence its financial management and the nature and applicability of its data and publications are fully described Systematic in presentation this valuable time saving resource offers the quickest easiest way to acquire a sound understanding of the workings of the European Union for all interested parties Students and teachers of international law will find it especially valuable as an essential component of the rapidly growing and changing global legal milieu

Banking Law Andreas Kokkinis, Andrea Miglionico, 2021-03-16 Banking regulation and the private law governing the bank customer relationship came under the spotlight as a result of the global financial crisis of 2007 2009 More than a decade later UK EU and international regulatory initiatives have transformed the structure business practices financing models and governance of the banking sector This authoritative text offers an in depth analysis of modern banking law and regulation while providing an assessment of its effectiveness and normative underpinnings Its main focus is on UK law and practice but where necessary it delves into EU law and institutions such as the European Banking Union and supervisory role of the European Central Bank The book also covers the regulation of bank corporate governance and executive remuneration the promises and perils of FinTech and RegTech and the impact of Brexit on UK financial services Although detailed the text remains easy to read and reasonably short pedagogic features such as a glossary of terms and practice questions for each chapter are intended to facilitate learning It is a useful resource for students and scholars of banking law and regulation as well as for regulators and other professionals who are interested in reading a precise and evaluative account of this evolving area of law
