The Economics of Aid J. M. Healey, 2010-11-29 First published in 1971 this reissue considers the main aspects of foreign aid to developing countries in terms of economic concepts and principles The author gives an economic definition of aid and considers the motives for giving aid and the principles on which it may be allocated He looks at the effect on the economic growth of developing countries of both the aid given and the need to repay the debt and the effect on trade patterns and resource allocation of tying aid to one particular project or one source of goods While economic analysis is only a first step in providing a basis for policy decisions on foreign aid Dr Healey shows that many issues can be clarified by looking at them from the economists point of view The Economics of Foreign Aid Raymond F. The end of the Cold War forced Western donors to rethink their aid relations with Africa This book looks at two of these donors France and Britain and asks whether the development programmes of these former colonial powers have undergone radical changes since the end of the Old World Order It focuses on the introduction of a controversial new regime trend political conditionality and uses policy models to illustrate the driving forces behind this new development strategy and

explain substantial differences in France and Britain's practice of political conditionality in Togo and Kenya. Overall, this volume, the first comparative study of French and British aid in the post-Cold War period, offers fresh insights into the evolution of the political assistance agenda and into deeper forces at work within the French and UK policy processes.

Johnson, 2022-07-30 Harry G. Johnson was best known for his work on monetary theory and international economics, but he was also very active in the theory of distribution, trade strategy, and development economics. These 4 books, originally published between 1967 and 1971, explore the relationship between nationalism and economic development, trade policy to promote development, the use of geometrical tools in international trade theory, and issues surrounding multi-lateral free trade.

Power, Economics, And Security Henry Bienen, 2019-10-16 This volume is dedicated to the memory of Klaus E. Knorr. This is fitting for a number of reasons. The collaborative work here was done under the auspices of the Center of International Studies at Princeton University, which Klaus Knorr directed from 1961 until 1968. The concerns of this book are to analyze the relationships among economic and military power and national security, to explore the ways economic power and economic decline relate to international hegemony, and to examine our understanding of concepts such as power, security, and burden sharing. These concerns ranked high on Klaus Knorr's research agenda during his productive and fruitful life. **Economic Policies Towards Less Developed Countries** Harry G. Johnson, 2021-07-29 Originally published in 1967, this book examines the major problems of trade and aid policy posed for the developed countries by the UN Conference on Trade and Development in 1964. Johnson surveys the political and economic setting of the Conference, international aspects of economic development, trade policy to promote development, possible new international arrangements for trade in primary products, and the possibilities offered by international monetary reform for benefitting less developed countries. The divergence between the well-being of developed and less developed countries remains one of the key problems of our time, and this book is therefore as relevant now as when it was first published. **Program Analysis Techniques** United States. tensions rapid technological change and terrorist violence The book is organized into three parts Part I examines the theories and strategies that shape America's approach to security policy Part II dives inside the defense policy process exploring the evolution of contemporary civil military relations the changing character of the profession of arms and the issues and debates in the budgeting organizing and equipping process Part III examines how purpose and process translate into American defense policy This invaluable and prudent text remains a classic introduction to the vital security issues the United States has faced throughout its history It breaks new ground as a thoughtful and comprehensive starting point to understand American defense policy and its role in the world today Contributors Gordon Adams John R Allen Will Atkins Deborah D Avant Michael Barnett Sally Baron Jeff J S Black Jessica Blankshain Hal Brands Ben Buchanan Dale C Copeland Everett Carl Dolman Jeffrey Donnithorne Daniel W Drezner Colin Dueck Eric Edelman Martha Finnemore Lawrence Freedman Francis Fukuyama Michael D Gambone Lynne Chandler Garcia Bishop Garrison Erik Gartzke Mauro Gilli Robert Gilpin T X Hammes Michael C Horowitz G John Ikenberry Bruce D Jones Tim Kane Cheryl A Kearney David Kilcullen Michael P Kreuzer Miriam Krieger Seth Lazar Keir A Lieber Conway Lin Jon R Lindsay Austin Long Joseph S Lupa Jr Megan H MacKenzie Mike J Mazarr Senator John McCain Daniel H McCauley Michael E McInerney Christopher D Miller James N Miller John A Nagl Henry R Nau Ren e de Nevers Joseph S Nye Jr Michael E O Hanlon Mancur Olson Jr Sue Payton Daryl G Press Thomas Rid John Riley David Sacko Brandon D Smith James M Smith Don M Snider Sir Hew Strachan Michael Wesley Richard Zeckhauser
