*Informal Economies and Power* Anna Danielsson,2018-10-26 The global ubiquity of informal economic activities has turned informality into a key policy question not least in international peace and state building This book explores a core aspect of economic informality its resilience despite comprehensive international anti informality operations Using Kosovo as an illustrative case Danielsson suggests that to understand the resilience of informality two distinct areas of practice need to be studied in conjunction rather than separately The first concerns the professional practices enacted by international organisations in their attempts to formalise the informal economy in Kosovo The second area of practice concerns the everyday informal economic practices of social agents in Kosovo To study these areas of practice at their junction Danielsson uses Pierre Bourdieu s concept of symbolic power and argues that in post conflict Kosovo the distinct practices have become interwoven and co constitutive of a novel ordering and meaning of informality The resilience of the informal thus plays out through while undermining and reinforcing the need of the international anti informality operations Including scholarship from global governance global political economy and social theory this book s original perspective on informal economies and power will appeal to scholars and professionals located in peace studies development studies and the field of international relations

*Economy and Society in Europe* Luigi Burroni, Maarten Keune, Guglielmo Meardi, 2012 Drawing on the development of economic sociology over the past 40 years this book brings together leading scholars to explore the relationship between social institutions on economic processes Inspired in particular by the innovative and

creative dimensions of Colin Crouch's work they signpost directions for future research. It will be an important reader for international scholars exploring the unfolding dimensions of contemporary relations in economy and society. Jacqueline O'Reilly, University of Brighton Business School, UK. Improving our understanding of how economy and society interrelate in Europe is of paramount importance. The rigorous and thought provoking analyses about the interaction between markets and the institutions of society contained in this book undoubtedly represent an excellent example of how this improvement can be achieved especially in these times of crisis. Andr s Rodr guez Pose, London School of Economics, UK. This book offers a refreshing account of the deep changes occurring over recent years in the relationship between economy and society in Europe. This is of course a classical theme since Max Weber's work but the social institutions which shape economic performance have profoundly evolved as have the analytical categories used to understand them. The contributions in this volume provide a broad and interesting perspective dealing with issues as varied as industrial relations, welfare regimes, families and the labour market, universities, local governance and many others. In the wake of the financial crisis, the major theories on the role of such institutions are found partly unsatisfactory as the boundaries between economy and society are constantly shifting. Everyone interested in improving our analytical tools to understand the direction of change in Europe should welcome this book. Marino Regini, University of Milan, Italy. While an economy is always embedded in society, the relationship between the two is undergoing profound changes in Europe, resulting in widespread instability which is emphasised by the current crisis. This book analyses these changes and, in particular, pressures of intensifying international competition, globalization and financialization within Europe. Combining the perspectives of economic sociology, political economy and political science, the expert contributors offer an in-depth multidisciplinary insight to the functioning of a number of institutional arenas around which European economies and societies are organized. Areas explored include the state and public policy at European, national and regional level, the welfare state, industrial relations, systems, education, systems and the family. This challenging and thought provoking book will be of great interest to a wide ranging audience across a number of disciplines including European studies, political science, comparative political economy, economic sociology, industrial relations and social policy.
