

The background of the cover is a complex, abstract design. It features a grid of squares in various shades of red, purple, blue, and green. Overlaid on this grid are several clock faces. One large clock face is visible in the upper left, showing Roman numerals. Another clock face is in the lower right, showing Arabic numerals. The overall effect is a sense of time and mechanics.

The Economics Anti-Textbook Rod Hill, Tony Myatt, 2010-03-11 Mainstream textbooks present economics as an objective science free from value judgements that settles disputes by testing hypotheses that applies a pre determined body of principles and contains policy prescriptions supported by a consensus of professional opinion The Economics Anti Textbook argues that this is a myth one which is not only dangerously misleading but also bland and boring It challenges the mainstream textbooks assumptions arguments models and evidence It puts the controversy and excitement back into economics to reveal a fascinating and a vibrant field of study one which is more an art of persuasion than it is a science The Economics Anti Textbook s chapters parallel the major topics in the typical text beginning with a boiled down account of them before presenting an analysis and critique Drawing on the work of leading economists the Anti Textbook lays bare the blind spots in the texts and their sins of omission and commission It shows where hidden value judgements are made and when contrary evidence is ignored It shows the claims made without any evidence and the alternative theories that aren t mentioned It shows the importance of power social context and legal framework The Economics Anti Textbook is the students guide to decoding the textbooks and shows how real economics is much more interesting than most economists are willing to let on
