The Economics of Inequality, Poverty, and Discrimination in the 21st Century Robert S. Rycroft, 2013-03-07
Leading scholars examine the conflicting paradigms of affluence and destitution in the United States as well as other free societies and discuss the influence of education race and status on economic mobility While recent catastrophic events in New Orleans and Haiti may have magnified issues of social inequity leaders have debated over poverty and discrimination for decades Are the poor disadvantaged by the institutions of society or by the choices they make Through two insightful volumes the author examines differing academic and political perspectives to help shed light on the causes of poverty and inequality the role that gender race age or sexual preference plays in determining opportunity and the effectiveness of current social and economic policies in balancing the inequity among disparate groups The Economics of Inequality Poverty and Discrimination in the 21st Century consists of 2 volumes containing 32 papers divided into 5 categories measurement inequality and mobility institutions and choices demographic groups and discrimination and policy The papers written by economists sociologists philosophers and lawyers deal with the extent of inequality in the United States and how it compares to other countries and the newly emerging evidence on the relationship between inequality and mobility within a society

Poverty and Discrimination Kevin Lang, 2011-02-11
Many ideas about poverty and discrimination are nothing more than politically driven assertions unsupported by evidence And even politically neutral studies that do try to assess evidence are often simply unreliable In Poverty and Discrimination economist Kevin Lang cuts through the vast literature on poverty and discrimination to determine what we actually know and how we know it Using rigorous statistical analysis and economic thinking to judge what the best research is and which theories match the evidence this book clears the ground for students social scientists and policymakers who want to understand and help reduce poverty and discrimination It evaluates how well antipoverty and antidiscrimination policies and programs have worked and whether they have sometimes actually made the problems worse And it provides new

insights about the causes of and possible solutions to poverty and discrimination The book begins by asking Who is poor and by giving a brief history of poverty and poverty policy in the United States in the twentieth century including the Welfare Reform Act of 1996 Among the topics covered are the changing definition of poverty the relation between economic growth and poverty and the effects of labor markets education family composition and concentrated poverty The book then evaluates the evidence on racial discrimination in areas such as education employment and criminal justice as well as sex discrimination in the labor market and assesses the effectiveness of antidiscrimination policies Throughout the book is grounded in the conviction that we must have much better empirical knowledge of poverty and discrimination if we hope to reduce them

Race and Poverty John F. Kain, 1969 Collection of writings on the effects economic implications of racial discrimination on Black poverty in the USA covers racial inequality of employment opportunity rural migration to urban area slum neighbourhoods housing discrimination public opinion concerning the social integration of negroes government policy etc Bibliography pp 184 to 186 and statistical tables

Poverty and Discrimination Lester C. Thurow, 1969 Defines poverty and discrimination as problems of the distribution of income and evaluates the effectiveness of various methods of altering that distribution
