Economics And Management Of Franchising Networks:

Economics and Management of Franchising Networks Josef Windsperger, Gérard Cliquet, George Hendrikse, Mika Tuunanen, 2012-12-06 Franchising networks are experiencing great success in international business organization Few books try to explain the characteristics of these networks Contrary to the existing literature this book tackles more theoretical problems related to governance organization knowledge management contract design incentive and regulation issues both from the economic and management view point It delivers new theoretical and empirical results regarding plural forms contract design and knowledge and strategic management issues Its purpose is to offer researchers and practitioners new theoretical and empirical insights in one of the most important economic phenomenon at the beginning of the 21st century Franchising networks as organizational arrangement for growth and internationalization of firms

Economics and Management of Networks Gérard Cliquet, George Hendrikse, Mika Tuunanen, Josef Windsperger, 2007-03-20 Previous research on the institutional structure of franchising networks Bri ley et al 1991 Lutz 1995 Shane 1998 Lafontaine and Shaw 1999 2005 fuso 2002 Penard et al 2003a b does not explain the governance structure of the franchising firm as an institutional entity that consists of two interrelated parts Residual decision rights and ownership rights The latter includes not only residual income rights of franchised outlets but also residual income rights of franchisor owned outlets Previous studies primarily examines the incentive signalling and screening effects of fees royalties and other contractual provisions from the point of view of organizational economics see Dnes 1996 for a review without taking into account the interactions between residual decision and residual income rights as interrelated parts of the governance structure This paper fills this gap in the literature According to the property rights view decision rights should be allocated according to the distribution of intangible knowledge assets between the franchisor and franchisee and ownership rights should be assigned according to the residual decision rights Since ownership rights are diluted in franchising networks the dilution of residual income rights of franchised outlets is compensated by residual income rights of company owned outlets Under a dual ownership structure company owned outlets compensate the disincentive effect of low royalties for the franchisor and low royalties strengthen the investment incentives for the franchisee

Strategy and Governance of Networks George Hendrikse, Mika Tuunanen, Josef Windsperger, Gérard Cliquet, 2008-07-20 The book emphasizes research in economics and management of networks as an interdisciplinary field by offering new theoretical perspectives and presenting new empirical results on strategic and governance structure issues in cooperatives franchising networks alliances joint ventures and venture capital relations The authors apply different theoretical views on networks such as transaction cost theory property rights theory resource and knowledge based theory evolutionary theory information richness theory and social exchange theory

New Developments in the Theory of Networks Mika Tuunanen, Josef Windsperger, Gérard Cliquet, George Hendrikse, 2011-01-12 The theory of networks aims at developing theoretical views on the design and management of alliances franchise chains licensing joint ventures cooperatives and venture capital relations The current trend in economics and management of networks is twofold First there is a strong tendency toward application of theoretical approaches developed both in organizational economics strategic management and organization theory The second trend refers to the development of more integrative views on networks Especially combining organizational economics strategic management and relational views on networks are very promising research directions Starting from this status of research the current book emphasizes network research as a theory driven field by offering new perspectives on contract design decision and ownership rights value creation knowledge management and the role of social capital in franchising networks alliances and cooperatives
