Silvia, 2021 Effective decision making requires understanding of the underlying principles of financial markets and economics Intellectually economics and financial markets are genetically intertwined although when it comes to popular commentary they are treated separately In fact academic economic thinking appears separate from financial market equity strategy in most financial market commentary Historically macroeconomics tended to assume away financial frictions and financial intermediation whereas financial economists did not necessarily consider the negative macroeconomic spill overs from financial market outcomes In more recent years the economic discipline has gone through a serious self reflection after the global crisis This book explores the interplay between financial markets and macroeconomic outcomes with a conceptual framework that combines the actions of investors and individuals Of interest to graduate students and those professionals working in the financial markets it provides insight into why market prices move and credit markets interact and what factors participants and policy makers can monitor to anticipate market change and future price paths John Silvia is currently President of Dynamic Economic Strategy LLC Formerly John was managing director and the chief economist for Wells Fargo Securities until July 2018 Based in Charlotte North Carolina he held that position since he joined Wachovia a Wells Fargo predecessor in 2002 as the company's chief economist Before his position at Wells John worked on Capitol Hill as senior economist for the U S Senate Joint Economic Committee and chief economist for the U S Senate Banking Housing and Urban

Just Financial Markets? Lisa Herzog, 2017-04-05 Well functioning financial markets are crucial for the economic well being and the justice of contemporary societies The Great Financial Crisis has shown that a perspective that naively trusts in the self regulating powers of free markets cannot capture what is at stake in understanding and regulating financial markets The damage done by the Great Financial Crisis including its distributive consequences raises serious questions about the justice of financial markets as we know them This volume brings together leading scholars from political theory law and economics in order to explore the relation between justice and financial markets Broadening the perspective from a purely economic one to a liberal egalitarian one the volume explores foundational normative questions about how to conceptualize justice in relation to financial markets the biases in the legal frameworks of financial markets that produce unjust outcomes and perspectives of justice on specific institutions and practices in contemporary financial markets Written in a clear and accessible language the volume presents analyses of how financial markets should function and how the Great Financial Crisis came about proposals for how the structures of financial markets could be reformed and analysis of why reform is not happening at the speed that would be desirable from a perspective of justice
