**Revisiting Ecuador's Economic and Social Agenda in an Evolving Landscape** Vicente Fretes Cibils, Marcelo Giugale, Eduardo Somensatto, 2008 Ecuadorian society has overcome adversity with great determination over the past few years Periodic economic crises external shocks and even natural disasters tested the country's ability to cope with difficulties Despite these challenges the country has maintained a forward looking perspective and has achieved some important goals Economic stability in the last few years has ushered in a period of sustained economic growth During this period several development indicators have improved and several sectors of the economy have demonstrated the dynamism and entrepreneurship that is present in the Ecuadorian culture Revisiting Ecuador's Economic and Social Agenda in an Evolving Landscape aims to provoke a lively discussion between the World Bank the new Correa administration and the entire country in addressing the unresolved issues that require a thoughtful approach

*Rural Poverty in Latin America* R. López, A. Valdés, 2000-09-28 This book provides fresh insight into rural poverty in Latin America It draws on six case studies of recent rural household surveys for Chile Colombia El Salvador Honduras Paraguay and Peru and several thematic studies examining land labour rural financial markets the environments and disadvantaged groups Recognizing the heterogeneity within the rural economy the studies characterize three important groups small farmers landless farm workers and rural non farm workers and provide quantitative and qualitative analyses of the determinants of household income

Poverty and Social Developments in Peru, 1994-1997, 1999 Where when and how much to invest in wastewater treatment is a policy decision that presents many challenges and is not properly addressed in most situations worldwide The most common situations are unfortunately those in which no treatment is provided at all The integration of wastewater management and pollution control interventions and policies within the broader water resources management policy are essential for achieving the efficient use of the scarce resource available With that in mind this paper has three objectives Emphasize the need for systematic evaluation of wastewater management actions and investments as part of any water resources management initiative Define the conceptual framework that should guide the analysis process Identify and explore techniques appropriate to this analysis The ultimate purpose of the paper is to provide a general approach to developing and implementing wastewater management interventions Its scope is determined by two main

considerations i the need to incorporate the general principles that determine water resources management policies into the design and selection of wastewater management and pollution control interventions and ii the need to address water quality problems at the appropriate geographical scale

**Panama Poverty Assessment** ,2000-01-01 French edition Human Development Network Series As the new millennium approaches Education will determine who has the keys to the treasures the world can furnish This is particularly important for the poor who have to rely on their human capital as the main if not the only means of escaping poverty In this way new challenges and opportunities arise for education Immense progress has been achieved in education in the last 50 years However immense challenges still remain This report lays out the vision for education and the ambitious international goals to which the Bank subscribes It notes the progress so far and the gaps that remain It describes the rich group of partners associated with the educational endeavor and how the Bank s role has evolved It conveys the Bank s global priorities and programs to help countries progress toward the international education goals and improve the quality of teaching and learning It illustrates the processes and operating principles that will help Bank staff contribute more effectively to better educational outcomes in each client country and to monitor success in implementing this strategy Also available in English Stock no 14560 and Spanish Stock no 14633

**Geographical Targeting for Poverty Alleviation** David Bigman,Hippolyte Fofack,2000-01-01 in many developing countries there are large differences in economic conditions and the standard of living between regions and even between communities within the same region In many countries poverty has a clear geographic dimension since the poor are often concentrated in pockets of poverty Therefore the design of poverty alleviation policies must also have a significant spatial component Although development projects are carefully designed and meticulously evaluated for cost effectiveness and benefits too many of them are not sufficiently targeted geographically The growing availability and use of spatial data organized in a computer system such as a geographical information system GIS makes it more feasible to analyze the impact of projects in specific locales and to achieve more effective targeting Geographical Targeting for Poverty Alleviation introduces the basic concepts of a GIS It also demonstrates how to organize geographic and nongeographic data In addition it presents different methods for using the data of the Household Income and Expenditure Survey together with other surveys and the population census to provide estimates for the standard of living and the incidence of poverty incidence in different geographical areas of a country Ultimately these estimates should be used to establish guidelines for targeting poverty alleviation projects This publication illustrates different GIS applications for identifying the project s target population determining the project s spatial sphere of influence or deciding where to locate public facilities This publication is of interest to task managers economists development researchers and geographers

Development, Sexual Rights and Global Governance Amy Lind, 2010-01-04 This book addresses how sexual practices and identities are imagined and regulated through development discourses and within institutions of global governance The underlying premise of this volume is that the global development industry plays a central role in constructing people's sexual lives access to citizenship and struggles

for livelihood Despite the industry s persistent insistence on viewing sexuality as basically outside the realm of economic modernization and anti poverty programs this volume brings to the fore heterosexual bias within macroeconomic and human rights development frameworks The work fills an important gap in understanding how people s intimate lives are governed through heteronormative policies which typically assume that the family is based on blood or property ties rather than on alternative forms of kinship By placing heteronormativity at the center of analysis this anthology thus provides a much needed discussion about the development industry s role in pathologizing sexual deviance yet also more recently in helping make visible a sexual rights agenda Providing insights valuable to a range of disciplines this book will be of particular interest to students and scholars of Development Studies Gender Studies and International Relations It will also be highly relevant to development practitioners and international human rights advocates The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9780203868348> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Contesting Citizenship in Latin America** Deborah J.

Yashar, 2005-03-07 Indigenous people in Latin America have mobilized in unprecedented ways demanding recognition equal protection and subnational autonomy These are remarkable developments in a region where ethnic cleavages were once universally described as weak Recently however indigenous activists and elected officials have increasingly shaped national political deliberations Deborah Yashar explains the contemporary and uneven emergence of Latin American indigenous movements addressing both why indigenous identities have become politically salient in the contemporary period and why they have translated into significant political organizations in some places and not others She argues that ethnic politics can best be explained through a comparative historical approach that analyzes three factors changing citizenship regimes social networks and political associational space Her argument provides insight into the fragility and unevenness of Latin America s third wave democracies and has broader implications for the ways in which we theorize the relationship between citizenship states identity and social action
