manifestation of illnesses which range also from unusual joint deterioration to depression migraines weakness and fatigue to also extreme and medically unexplained severe neurological problems and autoimmune disease Whistleblowers are described as Primary Targets such as Renee Pittman Primary Targets are those who have been placed on the hit list marked for the slow kill and are being heavily targeted 24/7 in intentional physical and psychological torture programs using remotely directed microwave energy weapons which are also termed psychotronic in a decisive manner to covertly technologically reduce a lifespan The overall structure of this program is to destroy every aspect of the target's life mentally and physically by using technology to create systematic tissue and organ damage mental illness resulting from the deployment of the focused directional beam relentlessly over a period of time Victims who end up at this level in this program are often those who begin to realize what is happening and by their exposure become a threat The Program does not just stop with primaries In the full spectrum of this ruthless testing program Ordinary Victimized Individuals are people who have been unsuspectingly put on a list to be either experimented on destroyed or mind controlled with remote frequencies Women said to be 70% of those targeted fit this category This is especially true when single and living alone and reportedly are also being sexually exploited by patented stimulation beams It is all done quietly covertly secretly and it's strategic and slyly orchestrated Without public awareness through mainstream media on Gag Orders exposing these crimes victims have no real help when it is military and unified law enforcement The torture then results in microwave COINTELPRO Covert Technological Murder by the Pain Ray Beam The weapons are portable handheld also and defined in the Space Preservation Act of 2001 Sec 7 and make the perfect official crime

Cyber Criminology Hamid Jahankhani, 2018-11-27 This book provides a comprehensive overview of the current and emerging challenges of cyber criminology victimization and profiling It is a compilation of the outcomes of the collaboration between researchers and practitioners in the cyber criminology field IT law and security field As Governments corporations security firms and individuals look to tomorrow's cyber security challenges this book provides a reference point for experts and forward thinking analysts at a time when the debate over how we plan for the cyber security of the future has become a major concern Many criminological perspectives define crime in terms of social cultural and material characteristics and view crimes as taking place at a specific geographic location This definition has allowed crime to be characterised and crime prevention mapping and measurement methods to be tailored to specific target audiences However this characterisation cannot be carried over to cybercrime because the environment in which such crime is committed cannot be pinpointed to a geographical location or distinctive social or cultural groups Due to the rapid changes in technology cyber criminals behaviour has become dynamic making it necessary to reclassify the typology being currently used Essentially cyber criminals behaviour is evolving over time as they learn from their actions and others experiences and enhance their skills The offender signature which is a repetitive ritualistic behaviour that offenders often display at the crime scene provides law enforcement agencies an appropriate profiling tool and offers investigators the

opportunity to understand the motivations that perpetrate such crimes This has helped researchers classify the type of perpetrator being sought This book offers readers insights into the psychology of cyber criminals and understanding and analysing their motives and the methodologies they adopt With an understanding of these motives researchers governments and practitioners can take effective measures to tackle cybercrime and reduce victimization

Handbook of Research on Bullying in Media and Beyond Sarı, Gülşah,2022-08-19 Bullying has been an issue for generations across fields and industries and can affect children as well as adults With the rise of social media in recent years bullying has evolved to include new forms such as cyberbullying and peer bullying In the past victims were able to escape their bullies in safe places such as their homes Nowadays with technology keeping society constantly connected bullies are able to exert their influence at all times This is taking a far greater mental toll on bullied adults and children leading to burnout in the workplace stress anxiety depression and more To understand and develop possible solutions to prevent bullying further study is required The Handbook of Research on Bullying in Media and Beyond considers the various forms of bullying and analyzes their representation in the media The book also discusses the evolution of bullying throughout the years and how media and technology have played a key role in the changing landscape Covering topics such as body image peer bullying social media and violence this major reference work is ideal for policymakers computer scientists psychologists counselors researchers academicians scholars practitioners instructors and students
