Elements of the History of Philosophy and Science Thomas Morell (Principal, Coward College, London.),1827

Elements of the History of Philosophy and Science Thomas Morell,1827 *The History of Philosophy, in Eight Parts* Thomas Stanley,1656 *Technen: Elements of Recent History of Information Technologies with Epistemological Conclusions* Andrzej Piotr Wierzbicki,2014-07-25 The book expresses the conviction that the art of creating tools Greek techne changes its character together with the change of civilization epochs and co determines such changes This does not mean that tools typical for a civilization epoch determine it completely but they change our way of perceiving and interpreting the world There might have been many such epochs in the history of human civilization much more than the three waves of agricultural industrial and information civilization This is expressed by the title Technen of the book where n denotes a subsequent civilization epoch During last fifty years we observed a decomposition of the old episteme understood as a way of creating and interpreting knowledge characteristic for a given civilization epoch of modernism which was an episteme typical for industrial civilization Today the world is differently understood by the representatives of three different cultural spheres of strict and natural sciences of human and social sciences especially by their part inclined towards postmodernism and technical sciences that have a different episteme than even that of strict and natural sciences Thus we observe today not two cultures but three different episteme The book consists of four parts First contains basic epistemological observations second is devoted to selected elements of recent history of information technologies third contains more detailed epistemological and general discussions fourth specifies conclusions The book is written from the cognitive perspective of technical sciences with a full awareness and discussion of its differences from the cognitive perspective of strict sciences or human and social sciences The main thesis of the book is that informational revolution will probably lead to a formation of a new episteme The book includes discussions of many issues related to such general perspective such as what is technology proper what is intuition from a perspective of technology and of evolutionary naturalism what are the reasons for and how large are the delays between a fundamental invention and its broad social utilization what is the fundamental logical error using paradoxes that are not real only apparent of the tradition of sceptical philosophy what are rational foundations and examples of emergence of order out of chaos whether civilization development based on two positive feedbacks between science technology and the market might lead inevitably to a self destruction of human civilization etc

History of the Reign of the Emperor Charles V. with a View of the Progress of Society in Europe William

Robertson,1848 *Language as a Scientific Tool* Miles MacLeod,Rocío G. Sumillera,Jan Surman,Ekaterina

Smirnova,2016-01-29 Language is the most essential medium of scientific activity Many historians sociologists and science studies scholars have investigated scientific language for this reason but only few have examined those cases where language itself has become an object of scientific discussion Over the centuries scientists have sought to control refine and engineer language for various epistemological communicative and nationalistic purposes This book seeks to explore cases in the history of science in which questions or concerns with language have bubbled to the surface in scientific discourse This opens a window into the particular ways in which scientists have conceived of and construed language as the central medium of their activity across different cultural contexts and places and the clashes and tensions that have manifested their many attempts to engineer it to both preserve and enrich its function The subject of language draws out many topics that have mostly been neglected in the history of science such as the connection between the emergence of national languages and the development of science within national settings and allows us to connect together historical episodes from many understudied cultural and linguistic venues such as Eastern European and medieval Hebrew science

Brownson: Explanations and index* Orestes Augustus Brownson,1887 **Harper & Brothers' List of Publications** Harper & Brothers,1859 *Harper & Brothers' List of Publications* Anonymous,2023-04-29 Reprint of the original first published in 1859 The publishing house Anatiposi publishes historical books as reprints Due to their age these books may have missing pages or inferior quality Our aim is to preserve these books and make them available to the public so that they do not get lost

The Foundations of History Stephen Leach,2017-01-24 This book provides an exposition and critical examination of Collingwood s philosophy of history in which Collingwood s views are read in the light of his metaphilosophy Collingwood s philosophy of history is also located in relation to recent and current philosophy Although the author argues that Collingwood s conception of the subject matter of history may require some revision he is generally sympathetic to the aims and methods of Collingwood s project Indeed the author hopes to demonstrate that these aims and methods are still of great value

J. Tester, 1987 Superb general account Times Literary Supplement The story of the history of Western astrology begins with the philosophers of Greece in the 5th century BC To the magic and stargazing of Egypt the Greeks added numerology geometry and rational thought The philosophy of Plato and later of the Stoics made astrology respectable and by the time Ptolemy wrote his textbook the Tetrabiblos in the second century AD the main lines of astrological practice as it is known today had already been laid down In future centuries astrology shifted to Islam only to return to the West in medieval times where it flourished until the shift of ideas during the Renaissance Antonio Gramsci and the Ancient World Emilio Zucchetti, Anna Maria Cimino, 2021-06-14 Antonio Gramsci and the Ancient World explores the relationship between the work of the Italian Marxist thinker Antonio Gramsci and the study of classical antiquity The collection of essays engages with Greek and Roman history literature society and culture offering a range of perspectives and approaches building on Gramsci's theoretical insights especially from his Prison Notebooks The volume investigates both Gramsci's understanding and reception of the ancient world including his use of ancient sources and modern historiography and the viability of applying some of his key theoretical insights to the study of Greek and Roman history and literature The chapters deal with the ideas of hegemony passive revolution Caesarism and the role of intellectuals in society offering a complex and diverse exploration of this intersection With its fascinating mixture of topics this volume will be of great interest to students and scholars of classics ancient history classical reception studies Marxism and history and those studying Antonio Gramsci's works in particular
