**Institutional Constructivism in Social Sciences and Law** Dora Kostakopoulou, 2018-10-04 This book proposes a new institutional constructivist model for social scientific and legal enquiries based on the interrelations within the social and political world and the application of change in EU laws and politics Much of the research conducted in social sciences and law examines the diverse activities of individuals and collectivities and the role of institutions in the social and political world Although there exist many vantage points from which one can gain entry into understanding how agents in the world act interact shape and bear the world socio legal scientific epistemology has found monism and dualism to be convincing models This book argues that current models do not capture the complexity of our micro worlds macro worlds and meso worlds Nor

can they account for the forms and patterns of socio legal change Mind time and change are brought together in an attempt to contribute to socio legal epistemology and to enhance its toolkit

**The Research Imagination** Paul S. Gray, John B. Williamson, David A. Karp, John R. Dalphin, 2007-08-13 The idea that science is a blueprint for research and imagination gives research its life and purpose inspired this comprehensive explanation of research methodology The authors decades of experience have revealed that research is a craft requiring judgment and creativity not simply memorization and application of the rules of science Whether one is conducting an intimate one on one interview or a large scale examination of an entire society human imagination and scientific principles of inquiry go hand in hand To that end this book emphasizes scientific method but also acknowledges its critics It covers a wide variety of data collection techniques but presents them as reinforcing rather than competing with one another thus striking a balance between qualitative and quantitative methods It is designed for students and instructors who want a comprehensive treatment of a variety of research techniques with special emphasis on qualitative approaches

**Health Systems Thinking** James A. Johnson, Douglas E. Anderson, Caren C. Rossow, 2018-10-15 This book is a primer focusing on systems thinking as it spans the domains of health administration public health and clinical practice Currently the accrediting commissions within public health health administration and nursing are including systems thinking as part of the core competencies in their respective fields and professions Meanwhile academic programs do not have the materials other than journal articles to give students the requisite understanding of systems thinking as is expected of the next generation of health professionals This primer is designed to meet that void and serve as a supplemental reading for this important and timely topic This is the only book of its kind that provides a broad introduction and demonstration of the application of health systems thinking

**Transforming Violent Political Movements** Kevin E. Grisham, 2014-03-21 This book explores the factors that influence violent rebellious political organisations to transform into other entities such as political parties criminal organisations and terrorist organisations From the end of the Second World War until 1990 many events in the world centred on the bipolar struggle between the United States and the USSR Although there were numerous civil wars occurring during the Cold War era many of these conflicts went virtually unnoticed unless they were linked to the Cold War struggle for ideological dominance In the aftermath of the fall of the Soviet Union the number of intra state conflicts was prevalent around the globe Along with the occurrence of civil wars a variety of violent political movements also developed Examining cases from Latin America Africa Europe and Asia this book addresses how violent political movements transform during and after conflict into new types of

organisations using the collective political violence transformative CPVT model The study uses a combination of pre existing literature from the fields of sociology and political science archival research and interviews with movement members former and active conducted by the author In studying the Provisional IRA and Sinn F in the Spear of the Nation MK and the African National Congress ANC the Abu Sayyaf Group and the Revolutionary Armed Forces of Colombia FARC EP Transforming Violent Political Movements paints a picture of organisations that have to respond to their environments to survive This book will be of much interest to students of political violence terrorism war and conflict studies security studies and IR

**Post-Modernism and the Social Sciences** Pauline Marie Rosenau, 1991-11-05 Post modernism offers a revolutionary approach to the study of society in questioning the validity of modern science and the notion of objective knowledge this movement discards history rejects humanism and resists any truth claims In this comprehensive assessment of post modernism Pauline Rosenau traces its origins in the humanities and describes how its key concepts are today being applied to and are restructuring the social sciences Serving as neither an opponent nor an apologist for the movement she cuts through post modernism s often incomprehensible jargon in order to offer all readers a lucid exposition of its propositions Rosenau shows how the post modern challenge to reason and rational organization radiates across academic fields For example in psychology it questions the conscious logical coherent subject in public administration it encourages a retreat from central planning and from reliance on specialists in political science it calls into question the authority of hierarchical bureaucratic decision making structures that function in carefully defined spheres in anthropology it inspires the protection of local primitive cultures from First World attempts to reorganize them In all of the social sciences she argues post modernism repudiates representative democracy and plays havoc with the very meaning of left wing and right wing Rosenau also highlights how post modernism has inspired a new generation of social movements ranging from New Age sensitivities to Third World fundamentalism In weighing its strengths and weaknesses the author examines two major tendencies within post modernism the largely European skeptical form and the predominantly Anglo North American form which suggests alternative political social and cultural projects She draws examples from anthropology economics geography history international relations law planning political science psychology sociology urban studies and women s studies and provides a glossary of post modern terms to assist the uninitiated reader with special meanings not found in standard dictionaries

**Criteria of Social Scientific Knowledge** Terrence E. Cook, 1994 Social scientists often do not agree on what is a solid contribution to knowledge and what is only the illusory appearance of knowledge In this work Terrence E Cook systematically compares and contrasts the main epistemological families within the social sciences interpretive predictive and praxeological examining strengths and weaknesses of each outlook In exceptionally clear language he shows how paradigms of thought are constructed and reveals the often unreflected presuppositions of each epistemological family He concludes with a move toward synthesis and a turn to the study of strategy     *Applied Social Research* Timothy P.

*Contemporary Society* John A Perry, Erna K Perry, 2015-10-02 This best selling text emphasizes that social and cultural changes are the pervasive realities of our era One of the main themes of *Contemporary Society* is that the transition from an industrial to a post industrial order in the modern world is fraught with difficulties as was the transition from an agricultural to an industrial order in an earlier era Within this framework we can observe the increasing fragmentation of the social order which tends to lead people away from community and a common purpose and often invites conflict and disunity At the same time countervailing social forces are also at work providing some stability some shelter in the storm Finally societies are faced with the rapid and transformative power of information technology a fact that propels separate groups of people into a global entity
