Computers as Components Marilyn Wolf, 2012-05-09 Revision of Computers as components Wayne Wolf 2008 **The Best Books for Academic Libraries: Science, technology, and agriculture** ,2002 **Gas Turbine Design, Components and System Design Integration** Meinhard T. Schobeiri, 2019-11-25 This is the second revised and enhanced edition of the book Gas Turbine Design Components and System Integration written by a world renowned expert with more than forty years of active gas turbine R D experience It comprehensively treats the design of gas turbine components and their integration into a complete system Unlike many currently available gas turbine handbooks that provide the reader with an overview without in depth treatment of the subject the current book is concentrated on a detailed aero thermodynamics design and off design performance aspects of individual components as well as the system integration and its dynamic operation This new book provides practicing gas turbine designers and young engineers working in the industry with design material that the manufacturers would keep proprietary The book is also intended to provide instructors of turbomachinery courses around the world with a powerful tool to assign gas turbine components as project and individual modules that are integrated into a complete system Quoting many statements by the gas turbine industry professionals the young engineers graduated from the turbomachinery courses offered by the author had the competency of engineers equivalent to three to four years of industrial experience **Engineering Design** Clive L. Dym, 2013-10-28 Dym Little and Orwin s Engineering Design A Project Based Introduction 4th Edition gets students actively involved with conceptual design methods and project management tools The book helps students acquire design skills as they experience the activity of design by doing design projects It is equally suitable for use in project based first year courses formal engineering design courses and capstone project courses Virtual Components Design and Reuse Ralf Seepold, Natividad Martinez Madrid, 2013-06-29 Design reuse is not just a topic of research but a real industrial necessity in the microelectronic domain and thus driving the competitiveness of relevant areas like for example telecommunication or automotive Most companies have already dedicated a department or a central unit that transfer design reuse into reality All main EDA conferences include a track to the topic and even specific conferences have been established in this area both in the USA and in Europe Virtual Components Design and Reuse presents a selection of articles giving a mature and consolidated perspective to design reuse from different points of view The authors stem from all relevant areas research and academia IP providers EDA vendors and industry Some classical topics in design reuse like specification and generation of components IP retrieval and cataloguing or interface customisation are revisited and discussed in depth Moreover new hot topics are presented among them IP quality platform based reuse software IP IP security business models for design reuse and major initiatives like the MEDEA EDA Roadmap **Computers as Components** Wayne Hendrix Wolf, 2005 This work unravels the complexity of embedded systems e g cell phones microwaves and information appliances and of the process tools and techniques necessary for designing them

Opto-Mechanical Systems Design, Volume 1 Paul Yoder, Daniel Vukobratovich, 2017-12-19 Opto Mechanical Systems Design Fourth Edition is different in many ways from its three earlier editions coauthor Daniel Vukobratovich has brought his broad expertise in materials opto mechanical design analysis of optical instruments large mirrors and structures to bear throughout the book Jan Nijenhuis has contributed a comprehensive new chapter on kinematics and applications of flexures and several other experts in special aspects of opto mechanics have contributed portions of other chapters An expanded feature a total of 110 worked out design examples has been added to several chapters to show how the theory equations and analytical methods can be applied by the reader Finally the extended text new illustrations new tables of data and new references have warranted publication of this work in the form of two separate but closely entwined volumes This first volume Design and Analysis of Opto Mechanical Assemblies addresses topics pertaining primarily to optics smaller than 50 cm aperture It summarizes the opto mechanical design process considers pertinent environmental influences lists and updates key parameters for materials illustrates numerous ways for mounting individual and multiple lenses shows typical ways to design and mount windows and similar components details designs for many types of prisms and techniques for mounting them suggests designs and mounting techniques for small mirrors explains the benefits of kinematic design and uses of flexures describes how to analyze various types of opto mechanical interfaces demonstrates how the strength of glass can be determined and how to estimate stress generated in optics and explains how changing temperature affects opto mechanical assemblies

Model-Based Design and Evaluation of Interactive Applications Fabio Paterno, 2012-12-06 If you are interested in understanding how the systematic use of task models in the design development and usability evaluation of interactive software applications can open new opportunities and possibilities then this book will help you do just that Fabio Patern also discusses related issues relevant to designing user interfaces and provides a state of the art review of the field including recently developed methods current results and problems and trends Details of the notation and analysis discussed including case studies of industrial interest are available for those who want to use them for applied projects and in industrial contexts While the book is designed to suit a range of academic and industrial courses on task models and methods for user interface design and evaluation it will also be useful as supplementary reading for any course on human computer interaction and software engineering

Computation for Metaphors, Analogy, and Agents Chrystopher L. Nehaniv, 1999-04-28 This volume brings together the work of researchers from various disciplines where aspects of descriptive mathematical computational or design knowledge concerning metaphor and analogy especially in the context of agents have emerged The book originates from an international workshop on Computation for Metaphors Analogy and Agents CMAA held in Aizu Japan in April 1998 The 19 carefully reviewed and revised papers presented together with an introduction by the volume editor are organized into sections on Metaphor and Blending Embodiment Interaction Imitation Situated Mapping in Space and Time Algebraic Engineering Respecting Structure and a Sea Change in Viewpoints

Advances in powder metallurgy G.M.

Lee,S.J. Park,2013-08-31 This chapter introduces the concept of optimization in the area of component manufacturing A short introduction explains the associated concepts applications formats and approaches and familiarizes the reader with the terminology The main body of the chapter examines approaches to optimization in four different component manufacturing applications die compaction process design powder injection moulding process design sintering process design and steady state conduction design The methodologies used in the applications include both mathematical iterative methods and experimental optimization methods *Advanced Control of Chemical Processes 1994* D. Bonvin,2014-05-23 This publication

brings together the latest research findings in the key area of chemical process control including dynamic modelling and simulation modelling and model validation for application in linear and nonlinear model based control nonlinear model based predictive control and optimization to facilitate constrained real time optimization of chemical processes statistical control techniques major developments in the statistical interpretation of measured data to guide future research knowledge based v model based control the integration of theoretical aspects of control and optimization theory with more recent developments in artificial intelligence and computer science *Safe Comp 96* Erwin Schoitsch,2012-12-06 SAFECOMP 96 contains papers

presented at the 15th International Conference on Computer Safety Reliability and Security held in Vienna Austria 23 25 October 1996 The conference aimed to provide an opportunity for technical developers and users to discuss and review their experiences to consider the best technologies currently available and to identify the skills and technologies required for the future SAFECOMP 96 focuses on critical computer applications and is intended as a platform for technology transfer between academia industry and research institutions SAFECOMP 96 will be of interest to all those in universities research institutions industry and business who want to be well informed about the current international state of the art in computer safety reliability and security Formal Methods for Components and Objects Frank S. de Boer,Marcello M.

Bonsangue,Susanne Graf,Willem-Paul de Roever,2006-09-30 This book presents 19 revised invited keynote lectures and revised tutorial lectures given at the 4th International Symposium on Formal Methods for Components and Objects FMCO 2005 Amsterdam November 2005 The book provides a unique combination of ideas on software engineering and formal methods that reflect the current interest in the application or development of formal methods for large scale software systems such as component based systems and object systems **Formal Methods for Components and Objects** ,2007

Object-Oriented Behavioral Specifications Haim Kilov,William Harvey,1996-09-30 Object Oriented Behavioral Specifications encourages builders of complex information systems to accelerate their move to using the approach of a scientific discipline in analysis rather than the approach of a craft The focus is on understanding customers needs and on precise specification of understanding gained through analysis Specifications must bridge any gaps in understanding about business rules among customers Subject Matter Experts and computer people must inform decisions about reuse of software and systems and must enable review of semantics over time Specifications need to describe semantics rather than syntax and

to do that in an abstract and precise manner in order to create software systems that satisfy business rules The papers in this book show various ways of designing elegant and clear specifications which are reusable lead to savings of intellectual effort time and money and which contribute to the reliability of software and systems Object Oriented Behavioral Specifications offers a fresh treatment of the object oriented paradigm by examining the limitations of traditional OO methodologies and by describing the significance of competing trends in OO modeling The book builds on four years of successful OOPSLA workshops 1991 1995 on behavior semantics This book deals with precise specifications of what is accomplished by the business and what is to be done by a system The book includes descriptions of successful use of abstract and precise specification in industry It draws on the experience of experts from industrial and academic settings and benefits from international participation Collective behavior neglected in some treatment of the OO paradigm is addressed explicitly in this book The book does not take reuse of specifications or software for granted but furnishes a foundation for taking as rigorous an approach to reuse decisions as to precise specifications in original developments

ECOOP '94 - Object-Oriented Programming Mario Tokoro, Remo Pareschi, 1994-06-15 This volume contains the proceedings of the 8th European Conference on Object Oriented Programming ECCOP 94 held in Bologna Italy in July 1994 ECOOP is the premier European event on object oriented programming and technology The 25 full refereed papers presented in the volume were selected from 161 submissions they are grouped in sessions on class design concurrency patterns declarative programming implementation specification dispatching and experience Together with the keynote speech Beyond Objects by Luc Steels Brussels and the invited paper Putting Objects to Work by Norbert A Streitz GMD IPSI Darmstadt they offer an exciting perspective on object oriented programming research and applications

Higher Order Logic Theorem Proving and Its Applications Thomas F. Melham, 1994-09-07 This volume presents the proceedings of the 7th International Workshop on Higher Order Logic Theorem Proving and Its Applications held in Valetta Malta in September 1994 Besides 3 invited papers the proceedings contains 27 refereed papers selected from 42 submissions In total the book presents many new results by leading researchers working on the design and applications of theorem provers for higher order logic In particular this book gives a thorough state of the art report on applications of the HOL system one of the most widely used theorem provers for higher order logic

The Universal Generating Function in Reliability Analysis and Optimization Gregory Levitin, 2006-02-04 Many real systems are composed of multi state components with different performance levels and several failure modes These affect the whole system's performance Most books on reliability theory cover binary models that allow a system only to function perfectly or fail completely The Universal Generating Function in Reliability Analysis and Optimization is the first book that gives a comprehensive description of the universal generating function technique and its applications in binary and multi state system reliability analysis Features an introduction to basic tools of multi state system reliability and optimization applications of the universal generating function in widely used multi state systems examples of

the adaptation of the universal generating function to different systems in mechanical industrial and software engineering
This monograph will be of value to anyone interested in system reliability performance analysis and optimization in industrial electrical and nuclear engineering
