animal that has been central to so much of human thought He explains how notions that have been associated with elephants for centuries that they are exceptionally wise deeply emotional and have a special understanding of death that they never forget are beloved of the gods and suffer unusually in captivity and even that they are afraid of mice all tell part of the story of these amazing beings Exploring the history of a skull in a museum a photograph of an elephant walking through the American South in the early twentieth century the debate about the quality of life of a famous elephant in a zoo and the accounts of elephant hunters Rothfels demonstrates that elephants are not what we think they are and they never have been Elephant Trails is a compelling portrait of what the author terms our elephant **Jumbo: The Most Famous Elephant**

Committee,2012-10-18 Wildlife legislation has become so complex that prosecutions fail and even specialist enforcement  
professionals struggle to implement it effectively Hundreds of birds of prey have been deliberately poisoned with substances  
such as carbofuran that have no legal use and the Government could easily make possession an offence The lack of  
sentencing guidelines on wildlife offences means that some offenders are being neither punished nor deterred in the courts  
The CPS is also failing to train its prosecutors to handle complex wildlife cases Furthermore the inflexible implementation in  
UK law of international agreements covering the trafficking of endangered species squanders limited resources The  
Government has maintained funding for specialist wildlife crime investigation and enforcement but this is provided on an ad  
hoc basis reducing operational effectiveness Funding provided to monitor wildlife crime on the internet was too short term to  
attract a suitably qualified individual to fill the post In 2004 the Committee called for a new database to record all wildlife  
crime but this has still not been introduced Internationally this report also examines how the rhino tiger and elephant are  
being driven to extinction by growing demand for illegal wildlife products in south east Asia and China The Government  
needs to exert robust diplomatic pressure in favour of the development and enforcement of wildlife law at the next CITES  
meeting in March 2013 In particular the Government should focus attention on the damaging effect of one off sales of  
impounded ivory which has been found to actually fuel demand for ivory products and seek an unequivocal international ban  
on all forms of ivory trade      *Amazing Animal Adventures Around the World* Brian Keating,2004 Silver Birch Award shortlist

Together We March Leah Henderson,2021-01-19 March through history and discover twenty five groundbreaking protest movements that have shaped the way we fight for equality and justice today in this stunningly illustrated and sweeping book For generations marches have been an invaluable tool for bringing about social change People have used their voices the words on their signs and the strength in their numbers to combat inequality oppression and discrimination They march to call attention to these wrongs and demand change and action from a local to a global scale Whether demanding protective laws or advocating for equal access to things like voting rights public spaces and jobs the twenty five marches in this book show us that even when a fight seems impossible marching can be the push needed to tip the scales and create a movement This gorgeous collection celebrates this rich and diverse history the often overlooked stories and the courageous people who continue to teach us the importance of coming together to march today **Elephant Tourism in Nepal** Michelle

Szydlowski,2024-02-01 A study of elephant tourism in Nepal from its origins in the 1960s to the present day this book examines the challenges faced by captive elephants Used as human conveyance on anti poaching patrol teams as rescue vehicles and in forestry service elephants have worked with and for humans for hundreds of years However the use of elephants in tourism is a fairly new development within Nepal Because the health and welfare of tourism elephants is vital to

the conservation of wild individuals this book offers an assessment of captive elephant needs and an examination of their existing welfare statuses This book seeks to examine the motivations of these NGOs and INGOs and to consider their ethical approaches to elephant health and welfare Are the motivations of these organizations similar enough to work together towards a common goal or are their ethical norms so different that they get in one another's way Using an ordinary language and ethics framework this text aims to identify the norms of cultures and organisations and reframe them in ways which may allow for more successful interactions

**Into the Illusive World** Paul A. Moore, 2019-07-12 Have you ever thought about what a dog smells as it stops to sniff at a tree Or what a cat is watching as it stares intensely off into space What about animals in the wild What do they see hear smell and feel How do they perceive their surroundings This is the illusive world A world filled with fascinating stimuli that we are not equipped to detect This is particularly true because we tend to rely so heavily on our eyes or ears We are figuratively and literally blind to this part of the natural world This part which is full of stimuli we cannot perceive encompasses the daily lives of so many animals Beneath our feet are ants moles and spiders using vibrations to coordinate colonies and communicate danger In the oceans turtles fish and octopi are sensitive to magnetic and electric fields as well as tasty morsels at the tips of their tentacles In the skies owls and raptors can see deep into a lake or pierce the night with highly sensitive eyes This book brings together all these animals and their amazing sensory abilities in an exploration of how animals perceive their world Within these pages are wonderful and exciting stories of organisms using their senses to perform sophisticated communication with nestmates find hidden prey in the dark of night or murky depths and call to lovers both near and far This book will open the door to this illusive world and will take you on a journey into the illusive world and see how different the world is when perceived through another animal's senses Plantation Worlds

Maan Barua, 2024-07-26 In Plantation Worlds Maan Barua interrogates debates on planetary transformations through the histories and ecologies of plantations Drawing on long term research spanning fifteen years Barua presents a unique ethnography attentive to the lives of both people and elephants amid tea plantations in the Indian state of Assam In the nineteenth and early twentieth centuries nearly three million people were brought in to Assam's plantations to work under conditions of indenture Plantations dramatically altered the region's landscape plundered resources and created fraught worlds for elephants and people Their extractive logics and colonial legacies prevail as durations forging the ambit of infrastructures labor habitability and conservation in the present And yet as the perspectives of the Adivasi plantation worker community and lifeworlds of elephants show possibilities for enacting a decolonial imaginary of landscape remain present amid immiseration From the margins of the Global South Barua offers an alternative grammar for articulating environmental change In so doing he prompts a rethinking of multispecies ecologies and how they are structured by colonialism and race
