*The Soul of Iran: A Nation's Struggle for Freedom* Afshin Molavi, 2010-07-12 The truths about Iran quite different truths from versions put forward by Washington Tehran and the media Iran thundered onto the world stage in 1979 with an Islamic revolution that shook the world Today that revolution has gone astray a popular democracy movement boldly challenges authority and young Iranians are more interested in moving to America than in chanting Death to America Afshin Molavi born in Iran and fluent in Persian

Baldwin, Victor Anderson, 2018-11-01 MLK and the Practice of Spirituality The scholarship on Martin Luther King Jr is seriously lacking in terms of richly nuanced and revelatory treatments of his spirituality and spiritual life This book

addresses this neglect by focusing on King's life as a paradigm of a deep vital engaging balanced and contagious spirituality. It shows that the essence of the person King lies in the quality of his own spiritual journey and how that translated into not only a personal devotional life of prayer meditation and fasting but also a public ministry that involved the uplift and empowerment of humanity. Much attention is devoted to King's spiritual leadership to his sense of the civil rights movement as a spiritual movement and to his efforts to rescue humanity from what he termed a perpetual death of the spirit. Readers encounter a figure who took seriously the personal interpersonal and sociopolitical aspects of the Christian faith thereby figuring prominently in recasting the very definition of spirituality in his time. King's holistic spirituality is presented here with a clarity and power fresh for our own generation. *Chicken Soup for the Soul: The Advice that Changed My Life* Amy Newmark, 2023-03-14 Sometimes it takes only a few words to solve a big problem reorient your focus or change the trajectory of your life. This examination of bioengineering in popular and literary culture shows that the influence of science on science fiction is more reciprocal than we might expect. Looking closely at the work of Margaret Atwood Richard Powers and other authors as well as at film comics and serial television such as *Orphan Black* Everett Hamner shows how the genome age is transforming both the most commercial and the most sophisticated stories we tell about the core of human personhood. As sublime technologies garner public awareness beyond the genre fiction shelves they inspire new literary categories like slipstream and shape new definitions of the human the animal the natural and the artificial. In turn what we learn of bioengineering via popular and literary culture prepares the way for its official adoption or restriction and for additional representations. By imagining the connections between emergent gene testing and editing capacities and long standing conversations about freedom and determinism these stories help build a cultural zeitgeist with a sharper more balanced vision of predisposed agency. A compelling exploration of the interrelationships among science popular culture and self
