addresses human rights in relation to the historical settings in which its language was drafted and adopted Featuring five original essays Little articulates his view that fascist practices before and during World War II vivified the wrongfulness of deliberately inflicting severe pain injury and destruction for self serving purposes and that the human rights corpus developed in response was designed to outlaw all practices of arbitrary force He contends that while there must be an accountable human rights standard it should guarantee latitude for the expression and practice of beliefs consistent with outlawing arbitrary force Little details the theoretical grounds of the relationship between religion and human rights and concludes with essays on US policy and the restraint of force in regard to terrorism With a foreword by John Kelsay this book is a capstone of the work of this influential writer on religion philosophy and law

The Persistent

Objector Rule in International Law James A. Green, 2016-03-03 The persistent objector rule is said to provide states with an

escape hatch from the otherwise universal binding force of customary international law. It provides that if a state persistently objects to a newly emerging norm of customary international law during the formation of that norm then the objecting state is exempt from the norm once it crystallises into law. The conceptual role of the rule may be interpreted as straightforward to preserve the fundamentalist positivist notion that any norm of international law can only bind a state that has consented to be bound by it. In reality however numerous unanswered questions exist about the way that it works in practice. Through focused analysis of state practice this monograph provides a detailed understanding of how the rule emerged and operates how it should be conceptualised and what its implications are for the binding nature of customary international law. It argues that the persistent objector rule ultimately has an important role to play in the mixture of consent and consensus that underpins international law.

Religion, Equality and Employment in Europe Katayoun Alidadi, 2017-06-15 The management of religious and ideological diversity remains a key challenge of our time deeply entangled with debates about the nature of liberal democracy equality social cohesion minorities and nationalism security and foreign policy. This book explores this challenge at the level of the workplace in Europe. People do not surrender their religion or belief at the gates of their workplace nor should they be required to do so. But what are the limits of accommodating religious belief in the workplace particularly when it clashes with other fundamental rights and freedoms. Using a comparative and socio legal approach that emphasises the practical role of human rights anti discrimination law and employment protection this book argues for an enforceable right to reasonable accommodation on the grounds of religion and belief in the workplace in Europe. In so doing it draws on the case law of Europe's two supranational courts three country studies Belgium the Netherlands and the UK as well as developments in the US and Canada. By offering the first book length treatment of the issue it will be of significance to academics students policy makers business leaders and anyone interested in a deeper understanding of the potentials and limits of European and Western inclusion freedom and equality in a multicultural context. Awarded an honourable mention from the International Academy of Comparative Law for the 2018 Canada Prize.

Freedom of Religion Renáta Uitz, 2007-01-01 The Universal Declaration of Human Rights and the European Convention on Human Rights proclaim that everyone has the right to freedom of thought conscience and religion including freedom to manifest their religion or belief in worship teaching practice and observance. Even today in democratic societies too this fundamental right is still sometimes restricted and meets with hostility and intolerance. Using concrete examples the author compares and analyzes the protection of the right to freedom of religion in the case law of European constitutional courts and of the European Court of Human Rights of the Council of Europe in order to establish whether there is such a thing as general European law in this sphere.
