 Hunold,2012-12-06 caused in the western camp A further factor which operates to our disadvantage is the fact that in our  
 democracies the role played by the mass of uprooted humanity is becoming increasingly important and the problem of  
 control and guidance of the masses still seems to be far from being solved To all these burning questions an answer is given  
 in this volume Freedom and Serfdom which contains a selection from the best contributions of world renowned social  
 economists sociologists philosophers and exponents of the political sciences published for the first time in the English  
 language It is at this very moment that a work such as this dedicated to the moral and intellectual struggle against  
 communism and an analysis of our own democratic institu tions is of particular and urgent importance For it is imperative  
 surely that we should use to the best possible advantage the relatively short time vouchsafed us by the sobering effects of the  
 Paris con ference before our opponents succeed once again in lulling us into a sense of complacent security The purpose of  
 this volume is not only to make a contribution towards the scientific clarification of some of the burning problems of the age  
 but also to instil a sense of urgency and vigilance particularly in the younger generation and to imbue them with courage and  
 an eager readiness to fight for the ideals of the western world Property and the German Idea of Freedom Colin F.  
 Wilder,2024-04-22 This book offers a new interpretation of German law and politics during the era between the Thirty Years  
 War and the French Revolution Liberal ideas of freedom and equality were prototyped in Germany in property law through  
 the free disposition of estates freedom from taxation and other extractions and free use of paper money Civil liberty ideas  
 about equality and restrictions on arbitrary state power were real recognized and meaningful These freedoms were enjoyed  
 by all classes of Germans They were thought to have been built atop Germans ancient heritage of freedom and a federalist  
 imperial constitution which inspired Montesquieu and the American Founders Driving these trends were ideas about political  
 economy enlightened reform practical problem solving as well as forces of supply and demand in everything from the market  
 for books to the market for justice This book places the story of early modern German freedom close by the side of more  
 familiar stories of England North America France and the Netherlands *American Politics and the African American Quest*
