*The Customary International Law of Human Rights* William A. Schabas,2021-06-24 Customary international law is one of the principal sources of public international law Although its existence is uncontroversial until now the content of customary international law in the area of human rights has not been analyzed in a comprehensive manner This book from one of international law s foremost scholars and practitioners provides an unparalleled account of the customary international law of human rights It discusses the emergence of this customary law the debates about how it is to be identified and the efforts at formulation of customary norms In doing so the book provides a useful and accessible introduction to the content of international human rights The author uses the Universal Declaration of Human Rights as a basis to examine human rights norms and determine whether they may be described as customary He makes use of relatively new sources of evidence of the two elements for the identification of custom State practice and opinio juris In particular the book draws on the increasingly universal ratification of major human rights treaties and the materials generated by the Universal Periodic Review mechanism of the Human Rights Council The book concludes that a large number of human rights

norms may indeed be described as customary in nature and that courts should make greater use of custom as a source of international law

**Un Convention on the Rights of Persons with Disabilities** Joint Committee on Human Rights, 2009-04 This report follows the Committee's first report of session 2008-09 on the UN Convention on the Rights of Persons with Disabilities HL paper 9 HC 93 ISBN 9780104014165 in which the Committee welcomed the Government's intention to ratify the Convention but drew attention to proposals for reservations and interpretative declarations The Committee was concerned that there had been insufficient scrutiny of these proposals not least because draft texts had not been published and that the Office for Disability Issues had not robustly challenged Government departments about their proposals The Government laid the Convention before Parliament on 3 March heralding the beginning of the ratification process Four reservations and one interpretative declaration were proposed The Committee has criticised the Government for ruling out formal consultation on these proposals and also drawn attention to the limited opportunities for parliamentary scrutiny and control of the ratification of treaties Ratification should take priority over potentially lengthy and futile discussions about whether or not to enter reservations but the Government's approach to some of the reservations has been unduly cautious and may detract from the position role the UK has played in relation to the Convention The Committee considers that the reservation relating to service in the armed forces is open to challenge as incompatible with the object and purpose of the Convention The reservation relating to immigration control is felt to be too broad its purpose has not been adequately explained and so it should be dropped The Government should clarify matters in relation to the reservation and declaration on education and should consult on how to deal with the treatment of benefits appointees

*European Fundamental Rights and Freedoms* Dirk Ehlers, Ulrich Becker, Et al., 2011-12-07 The ever increasing relevance of European

law which involves replacement or supplementation of and interaction with national law not only affects the states in Europe but also and foremost the citizens The rights of the citizens in Europe are protected by the European Fundamental Rights and Freedoms The aim of this textbook is to grasp and illustrate the meaning of these rights and to integrate it into a coherent system For this purpose the book not only deals with the pertinent law of the European Union and the European Community but also with the European Convention for the Protection of Human Rights and Fundamental Freedoms which too is becoming more and more important In addition regard is had to the Charter of Fundamental Rights of the Union which forms part of the Treaty establishing a Constitution for Europe Although the Charter is not yet legally binding since the Constitution has not been ratified by all EU Member States the Community Courts already make reference to it as a concentrate of the constitutional traditions common to the Member States It therefore does not seem entirely unlikely that the Charter might be included into the existing Treaties irrespective of the future constitutional developments on the EU level On a similar anticipatory basis the book also takes into account those Protocols to the European Convention for the Protection of Human Rights and Fundamental Freedoms that have not yet entered into force

*Religious Actors and International Law* Ioana Cismas, 2014-07-17 This book assesses whether a new category of religious actors has been constructed within international law Religious actors through their interpretations of the religion s they are associated with uphold and promote or indeed may transform potentially oppressive structures or discriminatory patterns This study moves beyond the concern that religious texts and practices may be incompatible with international law to provide an innovative analysis of how religious actors themselves are accountable under international law for the interpretations they choose to put forward The book defines religious actors as comprising religious states international organizations and non state entities that assume the role of interpreting religion and so claim a special legitimacy anchored in tradition or charisma Cutting across the state non state divide this definition allows the full remit of religious bodies to be investigated It analyses the

crucial question of whether religious actors do in fact operate under different international legal norms to non religious states international organizations or companies To that end the Holy See Vatican the Organization of Islamic Cooperation and churches and religious organizations under the European Convention on Human Rights regime are examined in detail as case studies The study ultimately establishes that religious actors cannot be seen to form an autonomous legal category under international law they do not enjoy special or exclusive rights nor incur lesser obligations when compared to their respective non religious peers Going forward it concludes that a process of two sided legitimation may be at stake religious actors will need to provide evidence for the legality of their religious interpretations to strengthen their legitimacy and international law itself may benefit from religious actors fostering its legitimacy in different cultural contexts
