Cross-country Skiing Brian Cazeneuve, 1995 A companion volume to the PBS TV series Trailside offers instructions for beginners discusses gear and safety and surveys the latest equipment **Ski Trails and Wildlife** Eric Burr, 2008 Snow sports are usually the first step to learning about snow country wildlife which is only as safe as knowledgeable people want it to be Unfortunately knowledge is too often lacking and skiing is perceived as detrimental too wildlife Reality is that skiing in all its many forms from ski lift resorts to far flung Scandinavian style ski touring holds the keys to wildlife conservation and restoration No amount of litigation can change this basic fact of life although the Mineral King Case from the Supreme Court

of the United States certainly changed the legal landscape for all environmental litigation Mineral King's near miss at becoming another ski lift avalanche disaster area preceded Early Winters another almost ski lift area which shares the honor of being a Supreme Court case and is the last chapter of this book Olympic National Park is the other ski history explored so that the National Parks are given equal emphasis with America's National Forests and Canada's Crown Lands An extensive bibliography also includes many electronically available sources The language is not technical and no prior experience with either skiing or wildlife is presumed The book is primarily written for both skiing and wildlife enthusiasts who may not know much about each other It is intended as a peace offering to hopefully prevent future ski wars and unnecessary trips through the legal system That effort could be better spent restoring wildlife and the life support system of our circumpolar boreal forest

A Natural Sense of Wonder Rick Van Noy, 2010-09-15 The technology boom of recent years has given kids numerous reasons to stay inside and play while parents increasing safety concerns make it tempting to keep children close to home But what is being lost as fewer kids spend their free time outdoors Deprived of meaningful contact with nature children often fail to develop a significant relationship with the natural world much less a sense of reverence and respect for the world outside their doors *A Natural Sense of Wonder* is one father's attempt to seek alternatives to the flickering waves of TV and the electrifying boing of video games and get kids outside and into nature In the spirit of Rachel Carson's *The Sense of Wonder* Rick Van Noy journeys out of his suburban home with his children and describes the pleasures of walking in a creek digging for salamanders and learning to appreciate vultures Through these and other walks to school the Van Noy's discover what lives nearby what nature has to teach and why this matters From the backyard to the hiking trail in a tide pool and a tree house in the wild and in town these narrative essays explore the terrain of childhood threatened by the lure of computers and television by fear and the loss of play habitat showing how kids thrive in their special places In chronicling one parent's determination and at times frustration to get his kids outside *A Natural Sense of Wonder* suggests ways kids both young and old can experience the wonder found only in the natural world
