Freer Markets More Rules Regulatory Reform In Advanced Industrial Countries:

Freer Markets, More Rules Steven K. Vogel, 2018-05-31 Over the past fifteen years the United States Western Europe and Japan have transformed the relationship between governments and corporations The changes are complex and the terms used to describe them often obscure the reality In *Freer Markets More Rules* Steven K Vogel dispenses with euphemisms and makes sense of this recent transformation In defiance of conventional wisdom Vogel contends that the deregulation revolution of the 1980s and 1990s never happened The advanced industrial countries moved toward liberalization or freer markets at the same time that they imposed reregulation or more rules Moreover the countries involved did not converge in regulatory practice but combined liberalization and reregulation in markedly different ways The state itself far more than private interest groups drove the process of regulatory reform Thus the story of deregulation is one rich in paradox a movement aimed at reducing regulation increased it a movement propelled by global forces reinforced national differences and a movement that purported to reduce state power was led by the state itself Vogel's astute and far reaching analysis compares deregulation in Britain and Japan with special attention to the telecommunication and financial services industries He also considers such important sectors as broadcasting transportation and utilities in the United States France and Germany

Freer Markets, More Rules Steven Kent Vogel, 1996 **The Emergence of Private Authority in Global Governance** Rodney Bruce Hall, Thomas J. Biersteker, 2002-12-12 The emergence of private authority has become increasingly a feature of the post Cold War world In *The Emergence of Private Authority in Global Governance* leading scholars explore the sources practices and implications of this erosion of the power of the state They analyse and compare actors as diverse as financial institutions multinational corporations religious terrorists and organised criminals and assess the potential for reversal of the situation The themes of the book relate directly to debates concerning globalization and the role of international law and will be of interest to scholars and students of international relations politics sociology and law

European Integration and the Global Financial Crisis Michele Di Donato, Silvio Pons, 2022-12-12 Offering a fresh take on a crucial phase of European history this book explores the years between the 1980s and 1990s when the European Union took shape Whilst contributing to existing literature on the Maastricht Treaty and European integration at the end of the twentieth century the book also brings those debates into the twenty first century and makes connections with longer term issues The transformation of the European political climate in the wake of the global financial crisis in 2008 and the watershed Brexit vote in 2016 has made it all the more urgent to reconsider the way scholars and opinion makers have looked at European integration in the past Drawing from recently released archival documents the authors analyse European cooperation as part of the broader international history in which it unfolded taking into account the changes in the Cold War order and the advance of a new phase of globalisation Comparing and contrasting the debates objectives and achievements of the 1980s and 1990s with the current political landscape of the European Union this book proposes a novel interpretation

of the choices that were made during the Maastricht years and of their longer term consequences

Labour Market Deregulation in Japan and Italy Hiroaki Richard Watanabe, 2014-11-13 Japan and Italy encountered severe economic problems in the early 1990s and the governments had to deal with those issues effectively under the increasing neoliberal pressures of globalisation. In this context, labour market deregulation was considered an effective tool to cope with those economic problems. However, the forms and degrees of labour market deregulation in the two countries were quite different. This book seeks to explain the differences in labour market deregulation policies between Japan and Italy despite the fact that the two countries shared a number of similar political, social and labour market, if not cultural, characteristics. Uniquely, it takes a political rather than economic or sociological perspective to provide a theoretical and empirical analysis of the processes of labour market deregulation in the two countries. The precarious working conditions of an increasing number of non-regular workers has become a prominent social issue in many industrialised countries, including Japan and Italy, but the level of the protection for these workers depends on a country's labour market policies, which are affected by the power resources of labour unions and labour policy-making structures. This book provides a useful perspective for understanding the root causes of this phenomenon, such as the diffusion of neoliberal ideas aimed at promoting labour market flexibility under globalisation, and demonstrates that there is still room for politics to decide the extent of deregulation and maintain worker protection from management offensives, even in an era of globalisation. *Labour Market Deregulation in Japan and Italy: Worker Protection under Neoliberal Globalisation* will appeal to students and scholars of Japanese politics, Italian politics, political economy and comparative politics.

Why Syria Goes to War Fred Haley Lawson, 1996 Rejecting conventional explanations for Syrian foreign policy, which emphasize the personalities and attitudes of leaders, cultural factors peculiar to Arab societies or the machinations of the great powers, Fred H. Lawson describes key shifts in Damascus's response to regional adversaries in terms of changes in the intensity of political struggles at home. Periodic eruptions of domestic conflict have inspired Syria's ruling coalition to adopt a wide range of programs designed to buy off domestic rivals and perpetuate the predominance of individual coalition members. These programs have undermined the unity of the Ba'ath regime, increasing the chances that opponents will overturn the established order. Challenges to the Ba'ath regime become most threatening whenever crises of accumulation shake the domestic political economy, Lawson contends. Opposition forces gain strength when the state cannot sustain new investment or when competition increases between public and private enterprises. Political and economic trends inside Syria have determined why Damascus has since 1963 alternately escalated tensions with regional rivals and adopted more accommodating postures. Lawson traces this dynamic through five major episodes: the 1967 war with Israel, limited intervention in Jordan in 1970, the widening conflict in Lebanon in 1976, the defusing of conflict with Iraq in 1982, and the rapprochement with Turkey over Kurdish separatism in 1994. These patterns, Lawson suggests, may be characteristic of nations changing from one domestic economic system to a radically different one.

as Syria has in the transition from state socialism to a privatized political economy National Diversity and Global Capitalism Suzanne Berger, Ronald Dore, 1996 The contributions to the volume present a challenge to conventional views on the extent and scope of globalization as well as to predictions of the imminent disappearance of the nation state's leverage over the economy **Fighting for Partnership** Lowell Turner, 2018-05-31 West Germany from 1949 to 1990 was a story of virtually unparalleled political and economic success This economic miracle incorporated a well functioning political democracy expanded to include a social partnership system of economic representation Then the Wall came down Economic crisis in the East industrial collapse massive layoffs a demoralized workforce triggered gloomy predictions Was this the beginning of the end for the widely admired German model Lowell Turner has extensively researched the German transformation in the 1990s Indeed in 1993 he was at the factory gates at Siemens in Rostock for the first major strike in post Cold War eastern Germany In that strike and in a series of other incisively analyzed workplace and job developments in eastern Germany he shows the remarkable resilience and flexibility of the German social partnership and the contribution of its institutions to unification His controversial and to some radical findings will stimulate debate at home and abroad

Understanding Business Environments Michael Lucas, 2005-07-08 What are the forces shaping today's business world *Understanding Business Environments* provides key readings which introduce the student to the factors underlying the business environment Including chapters by gurus such as Anthony Giddens Stuart Hall and Will Hutton the book covers social forces including the social structure and long term social change technological factors including Information Technology and new production technologies economic factors including the impact of macroeconomic policy and of the financial system political factors including the legal environment and government business relations *The Politics of Financial Markets and Regulation* S. Konoe, 2014-01-28 Sara Konoe looks into the politics of financial regulatory developments in the United States Japan and Germany These case studies highlight systemic interaction between institutions and political contexts and provide broader implications for global financial governance **Regime Shift** T. J. Pempel, 1998 Pempel contrasts the political economy of Japan during two decades the 1960s when the nation experienced conservative political dominance and high growth and the early 1990s when the bubble economy collapsed and electoral politics changed The different dynamics of the two periods indicate a regime shift in which the present political economy deviates profoundly from earlier forms This shift has involved a transformation in socioeconomic alliances political and economic institutions and public policy profile rendering Japanese politics far less predictable than in the past Pempel weighs the Japanese case against comparative data from the USA Great Britain Sweden and Italy to show how unusual Japan's political economy had been in the 1960s The text suggests that Japan's present troubles are deeply rooted in the economy's earlier success *The Politics of Telecommunications* Mark Thatcher, 1999 This book confronts some of the most important questions related to liberalization regulation and the role of the nation state in an increasingly international economy In the face of powerful

transitional pressures for change to what extent are states able to maintain stable institutional frameworks Do different domestic structures generate dissimilar patterns of policy making and economic performance How important are past institutional choices to subsequent reform The author addresses these questions through a study of the transformations of a strategic economic sector telecommunications in Britain and France over the past three decades It analyses the theoretical strengths and weaknesses of various models of public policy formation and the role and reform of national institutions and the continuing role of the nation state *The Oxford Handbook of Historical Institutionalism* Orfeo Fioretos, Tulia G. Falletti, Adam Sheingate, 2016-03-17 The Oxford Handbook of Historical Institutionalism offers an authoritative and accessible state of the art analysis of the historical institutionalism research tradition in Political Science Devoted to the study of how temporal processes and events influence the origin and transformation of institutions that govern political and economic relations historical institutionalism has grown considerably in the last two decades With its attention to past present and potential future contributions to the research tradition the volume represents an essential reference point for those interested in historical institutionalism Written in accessible style by leading scholars thirty eight chapters detail the contributions of historical institutionalism to an expanding array of topics in the study of comparative American European and international politics Competition and Efficiency in International Food Supply Chains John Williams, 2012-07-26 Why have food crises seemingly become more frequent in recent years compared to the last few decades This book examines an array of different issues and distortions that are causing food supply chain dysfunction in many countries particularly for staple non perishable foods such as grains oilseeds pulses and sugar It outlines the underlying changes that are currently occurring which will have an influence on the direction of future food supply chains and provides some solutions to current food security problems Based on an analysis of total regulation in the 1950s 60s through to deregulation during the 1980 90s as well as post deregulation it focuses on liberal trade and deregulation as a more successful solution to creating efficiencies in food supply chains and distribution The author highlights a common thread of either farmers using government for vested interest intervention or autocratic governments seeking market and supply chain power The book examines the role of government after 70 years of food supply chain intervention It discusses the role of commercial trade markets and cluster industries and how these can quickly disintegrate when price distortions occur The author studies both food importing and exporting countries and concludes that comingled commoditization of food has led to increased hoarding corruption and dependence on food aid He argues that a competitive food supply chain that has minimum intervention is more likely to provide future food security In conclusion the book emphasizes that adequate rewards competition and striving for supply chain efficiencies are the essences of sustainable food security Post-Soviet Power Susanne A. Wengle, 2015-02-05 Examines the transformation of the Russian electricity system during post Soviet marketization arguing for a view of economic and political development as mutually constitutive **The Third Globalization** Dan Breznitz, John

Zysman,2013-04-25 Given the powerfully negative and ongoing impact of the Great Recession on western economies the question of whether historically wealthy nations the US Western European countries Japan can stay wealthy has become an overriding concern for virtually every interested observer In The Third Globalization eminent political economists Dan Breznitz and John Zysman gather some of the discipline s leading scholars to assess the prospects for growth and prosperity among advanced industrial nations

Comparative Capitalism Magnus Feldmann,2025-02-20 How do capitalist institutions vary across countries and regions How is capitalist diversity related to political and social factors like inequality representation and political systems How do capitalist institutions shape economic outcomes Comparative Capitalism takes a global approach to capitalist diversity It considers not only liberal and coordinated market economies in the Global North but also other varieties such as networked hierarchical dependent and statist market economies in other parts of the world It examines new models such as growth regimes and growth models and key trends such as the growing significance of finance and the rise of populism in the 21st century Case studies are drawn from both the Global North and South including East Central Europe East Asia Latin America and the BRICS economies to highlight both domestic institutions and the role of economic integration on a global scale Including tables and overviews of key features of each model Comparative Capitalism is essential reading for students of international and comparative political economy international development and business government relations

The Oxford Handbook of Asian Business Systems Michael A. Witt,Gordon Redding,2014-01-30 Much of the existing literature within the varieties of capitalism VOC and comparative business systems fields of research is heavily focused on Europe Japan and the Anglo Saxon nations As a result the field has yet to produce a detailed empirical picture of the institutional structures of most Asian nations and to explore to what extent existing theory applies to the Asian context The Oxford Handbook of Asian Business Systems aims to address this imbalance by exploring the shape and consequences of institutional variations across the political economies of different societies within Asia Drawing on the deep knowledge of 32 leading experts this book presents an empirical comparative institutional analysis of 13 major Asian business systems between India and Japan To aid comparison each country chapter follows the same consistent outline Complementing the country chapters are eleven contributions examining major themes across the region in comparative perspective and linking the empirical picture to existing theory on these themes A further three chapters provide perspectives on the influence of history and institutional change The concluding chapters spell out the implications of all these chapters for scholars in the field and for business practitioners in Asia The Handbook is a major reference work for scholars researching the causes of success and failure in international business in Asia

The World Trade Organization and Trade in Services Kern Alexander,Mads Andenas,2007-12-31 The World Trade Organisation plays the primary role in regulating international trade in goods services and intellectual property Traditionally international trade law and regulation has been analysed primarily from the trade in goods perspective Services are becoming an important competence for the

WTO The institutional legal and regulatory influence of the General Agreement on Trade in Services GATS on domestic economic policymaking is attracting increasing attention in the academic and policymaking literature The growing importance of services trade to the global economy makes the application of the GATS to trade in services an important concern of international economic policy The GATS contains important innovations that build on the former GATT and existing WTO GATT trade regime for goods This book fills a void in the academic and policymaking literature by examining how the GATS governs international trade in services and its growing impact on the regulatory practice of WTO member states It offers a unique discussion of the major issues confronting WTO member states by analysing the GATS and related international trade issues from a variety of perspectives that include law political economy regulation and business Moreover the role of the WTO in promoting liberalised trade and economic development has come under serious strain because of the breakdown of the Doha Development Round negotiations The book analyses the issues in the Doha services debate with some suggested policy approaches that might help build a more durable GATS framework The book is a welcomed addition to the WTO literature and will serve as a point of reference for academics policymakers and practitioners **Race for the Exits**

Leonard J. Schoppa, 2011-07-15 Contrary to all expectations Japan's long term recession has provoked no sustained political movement to replace the nation's malfunctioning economic structure The country's basic social contract has so far proved resistant to reform even in the face of persistently adverse conditions In *Race for the Exits* Leonard J Schoppa explains why it has endured and how long it can last The postwar Japanese system of convoy capitalism traded lifetime employment for male workers against government support for industry and the private female provision of care for children and the elderly Two social groups bore a particularly heavy burden in providing for the social protection of the weak and dependent large firms which committed to keeping their core workforce on the payroll even in slow times and women who stayed home to care for their homes and families Using the exit voice framework made famous by Albert Hirschman Schoppa argues that both groups have chosen exit rather than voice depriving the political process of the energy needed to propel necessary reforms in the system Instead of fighting for reform firms slowly shift jobs overseas and many women abandon hopes of accommodating both family and career Over time however these trends have placed growing economic and demographic pressures on the social contract As industries reduce their domestic operations the Japanese economy is further diminished Japan has also experienced a baby bust as women opt out of motherhood Schoppa suggests that a radical break with the Japanese social contract of the past is becoming inevitable as the system slowly and quietly unravels
