Highway Safety Literature ,1977 **Japanese Media at the Beginning of the 21st Century** Katsuyuki Hidaka,2016-12-01 Hailed by Japanese critics as a milestone in the study of contemporary Japanese media this book explores the contemporary boom in Japanese media representations of the recent past Recent years have seen the production of an unprecedented number of films animation manga and television programmes representing a deeply nostalgic longing for the Japanese heyday of high economic growth in the 1960s and occasionally the 1970s known in Japan as the Sh wa 30s and 40s Hidaka provides a comprehensive account of an under researched contemporary Japanese media phenomenon by exploring why this nostalgia has been sparked at this particular historical juncture and how that period is represented in the Japanese media today The book accomplishes this through a detailed textual and narrative analysis of representative films and television programmes in relation to their social and cultural context While these nostalgic media renderings are seen by many critics as innocuous this study demonstrates that they do not show a simple yearning for the period but reflects a growing discontent with Japanese post war society In this regard this book concludes that the current nostalgia wave is a critical reaction to the recent past as it seeks to revise historiography through a processes of introspection within popular conceptions of the meta narrative of nostalgia Winner of the Japan Communication Association 2015 Outstanding Book Award **Growth Theories in Light of the East Asian Experience** Takatoshi Ito,Anne O. Krueger,2007-12-01 The contributors to this volume analyze the growth experiences of Japan Korea China Hong Kong Singapore and Taiwan in light

of the recently developed endogenous growth theory to provide an understanding of the economic boom in East Asia The theory explored in this volume attributes the phenomenal economic success of these countries to among other factors the role of an outward orientation a focus on exporting rather than on protecting home markets In addition the importance of exchange rate behavior of the supportive role of government policy and of the accumulation and promotion of physical and human capital are explored in detail This collection also examines the extent to which growth in each country became self sustaining once it began Demonstrating the relevance of endogenous growth theory for studying this important region this fourth volume in the NBER East Asia Seminar on Economics series will be of interest to observers of East Asian affairs
