French Defence Policy Into The Twenty First Century:

French Defence Policy into the Twenty-First Century S. Gregory, 2000-08-22 Since the end of the Cold War French defence policy has undergone a transformation France has reformed its national defence to Europeanize and multilateralize its role moved closer to NATO and emerged as amongst the world's most active military powers This book presents a wide ranging analysis setting out the background and policy framework of French defence charting the transformation of policy between 1989 and 1996 and examining the role of the French military within and beyond Europe into the twenty first century

Nato and the Transatlantic Alliance in the Twenty-First Century G. Williams, B. Jones, 2001-03-13 This book examines the nature of international politics in the twentieth century It encapsulates those essential and enduring features likely to be present in the twenty first century One important feature is the friction generated by nation states attempting to coexist in a still largely unequal and hierarchical system of states The possible impact of three powerful simultaneous and intersecting revolutions on international relations and the future of NATO is assessed in relation to the twenty first century

Nuclear Disarmament in the Twenty-first Century Wade L. Huntley, Mitsuru Kurosawa, Kazumi Mizumoto, 2005-03-06 This work provides a comprehensive examination of the current state and future prospects for nuclear disarmament at the turn of the century The work juxtaposes a sober review of progress made during the last decade with a proactive agenda of proposals for new disarmament initiatives in the next decade Taken together the contributions to this volume suggest that contrary to current conventional wisdom the increasing global cache of nuclear weapons and the waning progress on nuclear disarmament of recent years need not become the defining features of the post Cold War era Rather by examining the new conditions that have emerged at the dawn of the 21st century through both national and issue based perspectives this work reveals how the likelihood of continuing uncertainty and change in world affairs creates opportunities as well as the need for renewed progress toward significant nuclear disarmament

Italy's Foreign Policy in the Twenty-first Century Ludovica Marchi, Richard Whitman, Geoffrey Edwards, 2014-10-17 Italy's foreign policy has often been dismissed as too idiosyncratic inconsistent and lacking ambition This book offers new insights into the position Italy has attained in the international community in the 21st century It explores how the country has sought to take advantage of its passage from a bipolar to a multipolar system and assesses the ways in which it has engaged internationally its new responsibilities and the manner in which it conducts its policies in the pursuit of its interests whether political or commercial It argues that although Italy is engaged internationally there is a gap between its actions and what it actually delivers and as long as this gap continues Italy is likely to remain a partial and unreliable foreign policy actor Divided into three parts this book explores the context and processes which characterise Italy's external action its relations with crucial countries and regions such as the US the EU and the BRICs its security and defence policies This book will be of interest to students and scholars of European Politics Foreign Policy analysis and Italian studies

Foreign Policy in Comparative Perspective Ryan K. Beasley, Juliet

Kaarbo, Jeffrey S. Lantis, Michael T. Snarr, 2012-04-25 Widely regarded as the most comprehensive comparative foreign policy text *Foreign Policy in Comparative Perspective* has been completely updated in this much anticipated second edition Exploring the foreign policies of thirteen nations both major and emerging players and representing all regions of the world chapter authors link the study of international relations to domestic politics while treating each nation according to individual histories and contemporary dilemmas The book's accessible theoretical framework is designed to enable comparative analysis helping students discern patterns to understand why a state acts as it does in foreign affairs

French Defence Policy Since the End of the Cold War Alice Pannier, Olivier Schmitt, 2020-12-27 This book describes the evolution of French defence policy since the end of the Cold War For the past thirty years there have been significant changes to French defence policy as a result of several contextual evolutions Changes include shifts in the global balance of power new understandings of the notion of international security economic downturns and developments in European integration Yet despite these changes the purpose of France's grand strategy and its main principles have remained remarkably stable over time This book identifies the incentives representations and objectives of French defence policy The authors examine the general mechanisms that influence policy change and military transformation in democracies the importance of status seeking in international relations the processes of strategy making by a middle power and the dilemmas and challenges of security cooperation By doing so the book raises a number of questions related to the ways states adjust or not their security policies in a transformed international system This book makes French language sources available to non French speaking readers and contributes to a better understanding of a country that is at the forefront of Europe's external action This book will be of great interest to students of defence studies French politics military studies security studies and IR in general

The Future of Transatlantic Relations Andrew Dorman, Joyce P. Kaufman, 2010-11-29 Since the end of the Cold War and especially following the US decision to invade Iraq the once strong partnership between the US Canada and the European allies has faced the serious possibility of significant change or even dissolution At the very least fundamental differences have emerged in the ways that many of the partners perceive the issues that are most important to them from perceptions of the threat of terrorism and attitudes to the use of force to expectation about the future nature of the NATO Alliance and in the ways in which those perceptions have become translated into policy decisions In this book experts from both sides of the Atlantic seek to explain why there has been so much divergence in the approach the various countries have taken And it seeks to raise questions about what those divergent paths might mean for the future of transatlantic relations

European Security in the Twenty-First Century Adrian Hyde-Price, 2007-02-12 Combining a sophisticated theoretical analysis with detailed empirical case studies this book provides an original view of the challenges and threats to a stable peace order in Europe The end of Cold War bipolarity has transformed Europe Using structural realist theory Adrian Hyde Price analyzes the new security agenda confronting Europe in the twenty first century Europe he argues is not primed for

peace as mainstream thinking suggests rather it faces new security threats and the challenge of multipolarity This critical and original volume looks at European security after the Iraq War the failure of the EU constitution and the change of government in Germany Reflecting on the inherently competitive and tragic nature of international politics it concludes that realism provides the only firm foundations for an ethical foreign and security policy European Security in the Twenty First Century will appeal to students and scholars of international relations European politics and security studies Securing Europe L. Watanabe,2010-01-20 Securing Europe takes a novel approach to Europeanization among EU member states by employing a sociological institutionalist approach Watanabe argues that Europeanization as a process of change takes place not as a result of rationally calculating states but as a result of the reworking of perceptual and normative frameworks

French Politics Today David Scott Bell,2002 Brings together the varied artistic critical and cultural productions by women scholars critics and artists between 1790 1900 many of whom are little known in the canonical histories of the period Questions the concepts of scholarship criticism and artist across the different disciplines Women discussed include authors Mary Wollstonecraft Shelley Sydney Morgan and Anna Jameson actresses Elizabeth Siddons Dorothy Jordan and Mary Robinson critics Margaret Oliphant and Mary Cowden Clarke historians Agnes Strickland Lucy Aikin Mary Anne Everett Green Elizabeth Cooper and Lucy Toulmin Smith as well as the writers and readers of Women s magazines educationalists and translators Makes a significant and original contribution to the development of gender studies by extending the frontiers of existing knowledge and research **The Handbook of European Defence Policies and Armed Forces** Hugo Meijer,Marco Wyss,2018-06-22 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe s major medium and lesser powers since the end of the cold war the alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the

comparative study of national defence policies and armed forces across Europe **Changing Military Doctrine** Sten Rynning, 2001-10-30 As Rynning shows armed forces have a natural interest in shaping military doctrine according to their resources doctrinal traditions as well as their assessment of the international environment However armed forces are also the instrument of policy makers who are in charge of national security Using civil military relations in France from 1958 to the present as a case study he shows when policy makers are capable of controlling military doctrine as well as the means armed forces rely on to influence doctrine Some scholars argue that policy makers can control military doctrine only when the international environment is threatening a situation granting them added decision making authority Others argue that such control ultimately depends on the degree of domestic political disagreement consensus With access to most of the leading military personnel and policy makers of the era Rynning provides an analysis that will be instructive to scholars as well as policy makers and military leaders concerned with contemporary civil military relations Transaction Costs and Security Institutions M. Weiss, 2011-04-12 Examines international cooperation in European security from a transaction cost economics perspective This book addresses the puzzle of how to approach differing institutional preferences It argues that the reduction and limitation of transaction costs was the primary determinant of security preferences **European Strategic Autonomy and Small States' Security** Giedrius Česnakas, Justinas Juozaitis, 2022-12-26 This book analyses whether the EU's drift towards European strategic autonomy presents a challenge or a window of opportunity for its small member states to advance their security interests The volume presents small states perceptions of European strategic autonomy highlighting their expectations and concerns The chapters focus on the depth and breadth of European strategic autonomy national security considerations assessment of the impact on transatlantic relations the expected outputs and its potential impact on the EU's institutional structure It also shows how systemic circumstances and the interests of powerful states either belonging to the EU France Germany and Poland or having a significant say in European security architecture the US establish opportunities and constraints for the small states to shape European strategic autonomy In particular the study focuses on the diverging interests of the Baltic states Estonia Latvia and Lithuania Belgium Denmark Greece Hungary and the Netherlands It demonstrates that in most cases European strategic autonomy is perceived not as an alternative to NATO but as a supplementary element that could facilitate the development of national military capabilities indigenous defence industries and resilience to non military threats Ultimately the book suggests that national approaches towards European strategic autonomy mainly stem from pragmatic national security and foreign policy considerations while largely ignoring grand strategic ideas This book will be of much interest to students of European politics security studies and international relations The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **The Bases of French Peace Operations Doctrine** Joseph Philippe Grégoire, 2002 France believes that external threats to its vital and important interests

spring more from potential instability on the periphery of Europe than from rival European powers France has modified its military doctrine to reflect this strategic calculus and France's conception of peace operations reflects this doctrinal change France's revision of its peacekeeping doctrine has led or lagged its NATO partners' evolution in thinking but doctrinal convergence is evident A meeting of minds has come about because developments that jeopardize France's security are likely to affect that of its key allies as well France has taken steps to defend its interests within a UN or NATO framework through the application of force if necessary NATO political leaders now have cause collectively to play a greater role in North Atlantic Treaty deliberations than they had during the Cold War Defending Western interests in the face of amorphous threats calls for unity of effort and clarity of purpose If France's comparative advantage lies in the use of force for peacekeeping and associated operations the Alliance may want to institutionalize this fact via an appropriate mechanism
