French Presidentialism And The Election Of 1995:

French Presidentialism and the Election of 1995 Lorna Milne, John Gaffney, 2018-12-21 First published in 1997 this volume examines the presidential elections one of the central events of the democratic process in France and arguably the main organising principle of French politics since 1962 provide an opportunity to assess the development of the regime More significantly they allow us to assess modifications to the office of president and to French Presidentialism which are both reflected in and affected by the electoral campaign and the elections themselves This book provides such an assessment with specific reference to the candidates issues and events of the 1995 Presidential elections **The French Presidential and Legislative Elections of 2002** John Gaffney, 2018-01-18 The French elections of 2002 provided an opportunity to assess the political development of the regime and in particular developments within the complex phenomenon of French presidentialism within a party system In this thorough analysis John Gaffney looks at the institutional political and electoral moments of 2002 which saw both presidential and legislative elections and a major upheaval in the political life of France Bringing together a range of scholars the volume includes contributions from historians political scientists economists cultural studies experts and media experts to offer a thorough and textured analysis of French politics **French Presidential Elections** M. Lewis-Beck, R. Nadeau, É. Bélanger, 2012-01-06 An original and comprehensive study of the sociological and psychological forces driving individual choices in French Presidential elections Based on a unique comparative analysis of four French presidential contests over the last two decades this book presents a rigorous examination of long term and short term voter motivations **Fascism, Populism and the French Fifth Republic** Catherine Fieschi, 2004-09-04 How can a nation associated with the Declaration of the Rights of Man serve as the context for a successful populist party of the far right This book explains how since the late 1950s French institutions have provided the Front National with ways in which to permeate national politics **The Changing French Political System** Robert Elgie, 2013-09-13 Examining the nature of the Fifth Republic after its first 42 years this study looks at the challenges posed by new parties and new expressions of political mobilization Entrenched policy routines are being undermined by the emergence of new actors and the failure of old paradigms **Ibss: Political Science: 1997** British Library of Political and Economic Science, 1999-01-14 Provides an unrivalled overview of intellectual development in political science **Personality Politics?** Marina Costa Lobo, John Curtice, 2015 Personality Politics assesses the role that voters perceptions and evaluations of leaders play in democratic elections The book presents evidence from an array of countries with diverse historical and institutional contexts and employs innovative methodologies to determine the importance of leaders in democracies worldwide Addressing such questions as Where do leaders effects come from In which institutional contexts are leader effects more important and To which kinds of voters are leaders a more prominent factor for voting behaviour the authors seek to determine whether the roles leaders play enhances or damages the electoral process and what impact this has on the

quality of democracy in electoral democracies today **The SAGE Handbook of Political Advertising** Lynda Lee Kaid, Christina Holtz-Bacha, 2006-06-14 The SAGE Handbook of Political Advertising provides a comprehensive view of the role political advertising plays in democracies around the world Editors Lynda Lee Kaid and Christina Holtz Bacha along with an international group of contributors examine the differences as well as the similarities of political advertising in established and evolving democratic governments Key Features Offers an international perspective This Handbook examines the political television advertising process that has evolved in democracies around the world including countries in Asia Europe Australia Africa Latin America and North America In addition a comparative overview addresses the effects of political advertising on the voters and the systems of which it is a part Provides comprehensive coverage For each country presented an analysis is given of its political advertising history its cultural implications the political and regulatory systems related to political advertising the effects of media system structures and the effects of new technologies Includes examples from recent elections The role specific candidate or party controlled television plays in a specific region s electoral process is examined Original research on recent elections confirms the expanding significance of this form of political communication This is an excellent resource for media professionals and practicing journalists as well as a welcome addition to any academic library It can also be used as a textbook for advanced undergraduate and graduate courses on Political Advertising in the fields of Political Science Communication Broadcasting Journalism and International Relations Modern Presidential Electioneering Jody C. Baumgartner, 2000-06-30 Presidential campaigns have seen revolutionary changes in the past few decades in the United States and elsewhere These changes include rapid advances in communications technology and marketing and survey methodology an increased involvement of non party groups and campaign professionals in electoral politics a decreased role for political parties in the recruitment screening and nominating of candidates and dramatic changes in campaign finance laws While changes in presidential campaigning have not gone unnoticed analysis of these changes is typically included in general works on presidential campaigns and elections or studied individually Baumgartner clarifies what is meant by candidate centered as it applies to the organization and operation of presidential campaigns and elections He demonstrates that campaign organizations have become increasingly more central to the campaign effort than party organizations throughout the process of presidential selection and he shows that what is happening to electioneering practices in the United States is also happening although still to a lesser extent in France and Russia Political Campaigning, Elections and the Internet Darren Lilleker, Nigel Jackson, 2013-03 This book offers an in depth comparative analysis of how interactive Web 2 0 online tools including weblogs social networking sites and file sharing sites are utilised by candidates and parties during three recent election campaigns in France Belgium the US and the UK **The 2012 French Presidential Elections** J. Evans, G. Ivaldi, 2013-11-21 Was the victory of Fran ois Hollande the Socialist challenger to Nicolas Sarkozy inevitable in the 2012 French Presidential elections This book argues that a combination of economic

downturn policy choices and personal unpopularity meant that the Right wing incumbent faced an almost impossible task in holding onto power for another five years *Leaders' Personalities and the Outcomes of Democratic Elections* Anthony King, 2002-03-21 The conventional wisdom purveyed by the press and television and accepted as true by most politicians is that elections throughout the democratic world are personal clashes between individual presidential candidates and party leaders Almost everyone assumes that election outcomes are frequently determined by the major candidates personal characteristics In the United States Al Gore in 2000 came over as aloof and arrogant and failed to win his expected victory In Great Britain Tony Blair in 2001 came across as dynamic and personable and won a second term So personal charisma appears to yield electoral success This study by eminent scholars on both sides of the Atlantic suggests that the conventional wisdom is wrong Survey research conducted in recent decades indicates that relatively few voters are swayed by candidates personal characteristics Far more important are voters longstanding party loyalties their views on issues and their judgments of how well or badly presidents and parties have performed or will perform in office The votes of even the few electors who are swayed by candidates personalities usually cancel each other out As a result election outcomes are seldom decided by individual candidates personal images Occasionally but not often Ronald Reagan and Bill Clinton owed their election victories more to economics than to charm At the end of World War II the charismatic Winston Churchill lost the 1945 British general election the colorless Clement Attlee won Chancellor Helmut Kohl remained in power in Germany for a generation but was never personally popular Russian voters reckoned that Boris Yeltsin could not hold his drink but nevertheless elected him The implications of the authors analyses are profound They suggest that modern democratic politics is not nearly as candidate centered and personality oriented as is often supposed They also suggest that parties policies and their performance in office usually count for far more than the men and women they choose as their leaders Not least the authors suggest that the efforts of political consultants advertising agencies and spin doctors are often misdirected *Structures of Power in Modern France* G. Raymond, 1999-10-11 Traditionally France has been viewed as host to a unique set of tensions between the centre and the periphery dating back to the Revolution and beyond which has shaped its structures of power and marked its evolution as a modern society This survey provides a fresh overview of those tensions between a centralising state and the constituencies challenging it and asks whether that model can remain viable or whether it is not in fact undergoing a process of profound change **The French Voter** M. Lewis-Beck, 2003-12-18 Why do French voters vote the way they do In this book leading international scholars examine this question from many different angles Special attention is given to the 2002 national elections when right wing extremist Le Pen made such a spectacular showing in the presidential contest Was the first ballot success of Le Pen based on issues of law and order ethnicity nationalism or on the economy What about the role of the traditional factors of social class region religion and left right ideology Do the peculiar electoral institutions of the Fifth Republic foster political extremism or act as a break on it The French Voter considers these issues

both in relation to the 2002 contest and past elections Multi-Level Governance and European Integration Liesbet Hooghe, Gary Marks, 2002-05-30 European politics has been reshaped in recent decades by a dual process of centralization and decentralization At the same time that authority in many policy areas has shifted to the supranational level of the European Union so national governments have given subnational regions within countries more say over the lives of their citizens At the forefront of scholars who characterize this dual process as Multi level governance O Liesbet Hooghe and Gary Marks argue that its emergence in the second half of the twentieth century is a watershed in the political development of Europe Hooghe and Marks explain why multi level governance has taken place and how it shapes conflict in national and European political arenas Drawing on a rich body of original research the book is at the same time written in a clear and accessible style for undergraduates and non experts Political Leadership, Parties and Citizens Jean Blondel, Jean-Louis Thiebault, 2009-12-04 Explores the increasing importance of personality in leadership It focuses on the relationship and psychological dimension between citizens and political leaders with case studies on Britain and Northern Ireland France Italy Poland Japan and Thailand *French Presidentialism and the Election of 1995* Lorna Milne, 2020-04-02 First published in 1997 this volume examines the presidential elections one of the central events of the democratic process in France and arguably the main organising principle of French politics since 1962 provide an opportunity to assess the development of the regime More significantly they allow us to assess modifications to the office of president and to French Presidentialism which are both reflected in and affected by the electoral campaign and the elections themselves This book provides such an assessment with specific reference to the candidates issues and events of the 1995 Presidential elections **Government and Politics of France** Anne Stevens, 2017-03-14 Updated throughout to cover the period of Chirac Jospin cohabitation and the implications of Chirac's success in the dramatic 2002 presidential and parliamentary elections the third edition of this popular and widely used text provides a clear and comprehensive account of the contemporary French political system Encyclopedia of World Political Systems J. Denis Derbyshire, Ian Derbyshire, 2016-04-15 This comprehensive resource provides up to date political coverage of every country and political entity in the world today It incorporates all the major global and regional changes following the decolonization of Hong Kong in 1997 recent leadership changes in China and Russia the results of the Dayton Peace Accord the rise of the New Labor Party in the UK the 1999 elections in Israel and South Africa and the continued search for peace in the Middle East and Northern Ireland The economic crisis in Asia and the widespread growth of world nuclear powers are also covered **Parties and Democracy in France** David Bell, 2018-10-24 This title was first published in 2000 The Presidency has been the principal political focus of the French Fifth Republic and the new component of French democracy This book looks at how the Presidency has shaped political parties and party systems as well as how they have interacted with the new institution The Presidency has acted as a unifying force bringing together coalitions of parties to provide a political basis for presidential power but has also been a divisive factor Parties

draw on longstanding traditions of French political life and the Presidency can provoke destructive rivalry as well as constructive coalition building Presented here is a discussion of the contemporary French party system its dynamics successes and failures Written in an accessible style it is intended for students of French studies and political parties as well as comparative politics
