French From Dialect To Standard:

French, from Dialect to Standard R. Anthony Lodge, 1993 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company French, from Dialect to Standard R. Anthony Lodge, 1993 Written as a text this book looks at the external history of French from its Latin origins to the present day through some of the analytical frameworks developed by contemporary sociolinguistics French is one of the most highly standardized of the world's languages and the author invites us to see the language as heterogeneous rather than a monolithic entity using the model proposed by E Haugen as a useful comparative grid to plot the development of standardization After an introductory section which examines the dialectalization of Latin in Gaul the four central chapters of the book are constructed around the basic processes involved in standardization as identified by Haugen the selection of norms the elaboration of function codification and acceptance The concluding chapter deals with language variability and the wide gulf that has now developed between French used for formal purposes and that used in everyday speech with particular reference to Occitan speaking regions Emphasizing the ordinary speakers of the language rather than the statesmen or great authors as agents of change the book combines a traditional history of the language approach with a sociolinguistic framework to provide a broad and comparative overview of the problem of language standardization

Dialects Across Borders Markku Filppula, 2005-01-01 Nonstandard varieties of languages have recently become an object of new interest in scholarly research This is very much due to the advances in the methods used in data collection and analysis as well as the emergence of new language theoretical frameworks The articles in this volume stem from the 11th International Conference on Methods in Dialectology Methods XI August 2002 Joensuu The theme for this conference was Dialects across borders The selection of contributions included in this volume demonstrates how various kinds of borders exert major influence on linguistic behaviour all over the world The articles have been grouped according to whether they deal primarily with the linguistic outcomes of political and historical borders between states Part I various kinds of social and regional boundaries including borders in a metaphorical sense i.e. social barriers and mental or cognitive boundaries Part II and finally boundaries between languages Part III

meaning of different styles and levels of language and French used by immigrants Part Three looks at recent developments in the French language particularly in France itself Key features of this book Informative and comprehensive covers a wide range of current issues Practical contains a variety of graded exercises and tasks plus an index of terms Topical and contemporary deals with current situations and provides up to date illustrative material Thought provoking encourages students to reflect and research for themselves Rodney Ball is a lecturer in French in the School of Modern Languages Southampton University He teaches General Linguistics and French Sociolinguistics on which he has published a number of articles and is involved in designing practical courses

American-French Dialect Comparison... James Geddes, 1898 *Flanders* Andre de Vries, 2007-06-11 Publisher description **Language, History, Ideology** Camiel Hamans, Hans Henrich Hock, 2024 This volume explores the ways in which historical linguistics and language change interact with ideology The chapters present twelve in depth case studies that cover topics ranging from the location of the Indo European homeland to language policy in the former Yugoslavia

Redefining Regional French David Hornsby, 2022-10-10 This study challenges the orthodox view that emergent regional varieties of French represent no more than an ephemeral dialect residue of little theoretical interest It follows the life cycle of an obsolescent urban Picard variety spoken in a mining town in the Pas de Calais and attempts to unravel the complex reasons behind the survival of some local variants at the expense of others Applying a sociolinguistic model developed by Peter Trudgill it shows how the processes of levelling and simplification have driven change in a dialect contact situation giving rise to a new stable variety or koine This is compared with other new urban varieties in Sweden and the UK where different economic social and demographic conditions have produced very different linguistic outcomes The emergence of Regional French in the north it is argued may herald the start of a new diversification of French in Europe This book will therefore interest both students of French and of language variation more generally **French and Creole in Louisiana**
