multiplicity of networks that constituted the Silk Roads including land and maritime routes and approaches the Silk Roads from Antiquity to China's One Belt One Road Initiative from Afro Eurasia to the Americas This holistic approach to understanding ancient globalization exchanges transformations and movements and their continued relevance to the present is in line with contemporary academic trends toward interdisciplinarity Indeed the Silk Roads is such an expansive topic that many approaches to its study must be included to represent accurately its many facets The volume emphasizes exchange and transformation along the Silk Roads moments of acculturation or hybridization that contributed to novel syncretic forms It highlights the multiplicity of networks that constituted the Silk Roads including land and maritime routes and approaches to the Silk Roads from Antiquity to China's One Belt One Road Initiative from Afro Eurasia to the Americas [The Aesthetics of Food](#) Kevin W. Sweeney, 2017-12-29 The Aesthetics of Food sets out the continuing philosophical debate about the aesthetic nature of food The debate begins with Plato's claim that only objects of sight and hearing could be beautiful consequently food as something we smell and taste could not be beautiful Plato's sceptical position has been both supported and opposed in one form or another throughout the ages This book demonstrates how the current debate has evolved and critically assesses that debate showing how it has been influenced by the changing nature of critical theory and changes in art historical paradigms Expressionism Modernism and Post modernism as well as by recent advances in neuroscience It also traces changes in our understanding of the sensory experience of food and drink from viewing taste as a simple single sense to current views on its complex multi sensory nature Particular attention is paid to recent philosophical discussion about wine whether an interest in a wine reflects only a subjective or personal preference or whether one can make objective judgments about the quality and merit of a wine Finally the book explores how the debate has been informed by changes in the cooking presenting and consuming of food for example by the appearance of the restaurant in the early nineteenth century as well as the rise of celebrity chefs **Hog and Hominy** Frederick Douglass Opie, 2008-10-08 Opie delves into the history books to find true soul in the food of the South including its place in the politics of black America NPR.org Frederick Douglass Opie deconstructs and compares the foodways of people of African descent throughout the Americas interprets the health legacies of black culinary traditions and explains the concept of soul itself revealing soul food to be an amalgamation of West and Central African social and cultural influences as well as the adaptations blacks made to the conditions of slavery and freedom in the Americas Sampling from travel accounts periodicals government reports on food and diet and interviews with more than thirty people born before 1945 Opie reconstructs an interrelated history of Moorish influence on the Iberian Peninsula the African slave trade slavery in the Americas the emergence of Jim Crow the Great Migration the Great Depression and the Civil Rights and Black Power movements His grassroots approach reveals the global origins of soul food the forces that shaped its development and the distinctive cultural collaborations that occurred among Africans Asians Europeans and Americans throughout history Opie shows how food can be an indicator of social position a site of community

building and cultural identity and a juncture at which different cultural traditions can develop and impact the collective health of a community Opie goes back to the sources and traces soul food s development over the centuries He shows how Southern slavery segregation and the Great Migration to the North s urban areas all left their distinctive marks on today s African American cuisine Booklist An insightful portrait of the social and religious relationship between people of African descent and their cuisine FoodReference com

The Personality of Paris Alan R. H. Baker,2021-01-28 What was the personality of 19th century Paris To answer that question this book eschews the conventional narrative and chronological route taken by most histories of Paris Instead it thematically analyses the complex personality traits of Paris from the onset of the Revolution of 1789 to the beginning of the Great War Starting with the topographical and cultural legacies that late 18th century Paris inherited from its foundation in pre Roman and Roman times and from its medieval infancy and early modern adolescence The Personality of Paris unpacks the social and material complexity of the 19th century city It considers the role of immigration in the making of Parisians and in the city s growth from half a million in 1801 to almost three million in 1911 It examines the making of its distinctive landscape through the construction of monuments and architectural icons through its massive re modelling by Napol on III and Baron Haussmann through its five world exhibitions through its emphasis on food fashion and leisure and through the ways in which Parisians sought rural release from urban pressure Finally the book considers the self harm done to the person of 19th century Paris by revolutions and wars and the damage inflicted on it by 20th century hubristic politicians and architects

Defining Culinary Authority Jennifer J. Davis,2013-01-02 In the eighteenth and nineteenth centuries French cooks began to claim central roles in defining and enforcing taste as well as in educating their diners to changing standards Tracing the transformation of culinary trades in France during the Revolutionary era Jennifer J Davis argues that the work of cultivating sensibility in food was not simply an elite matter it was essential to the livelihood of thousands of men and women Combining rigorous archival research with social history and cultural studies Davis analyzes the development of cooking aesthetics and practices by examining the propagation of taste the training of cooks and the policing of the culinary marketplace in the name of safety and good taste French cooks formed their profession through a series of debates intimately connected to broader Enlightenment controversies over education cuisine law science and service Though cooks assumed prominence within the culinary public sphere the unique literary genre of gastronomy replaced the Old Regime guild police in the wake of the French Revolution as individual diners began to rethink cooks authority The question of who wielded culinary influence and thus shaped standards of taste continued to reverberate throughout society into the early nineteenth century This remarkable study illustrates how culinary discourse affected French national identity within the country and around the globe where elite cuisine bears the imprint of the country s techniques and labor organization Feeding France E. C. Spary,2014-05-20 Feeding France shows how chemists navigated the French Revolution to become the first public food experts in an industrialising world

Food Education and Gastronomic Tradition in Japan and France Haruka

Ueda,2022-11-24 Drawing on ethical and sociological theories of food this book presents a new approach to food education that moves beyond nutrition centred education Food education has gained increasing scientific and political importance in many countries as a promising way to change contemporary eating However many practices fail to address two epistemological obstacles regarding its very components food and education Food has largely been thought of from a nutritionistic viewpoint alone and the ethical issues over children s freedom of choice and well being have been absent This book resolves these problems by applying ethical and sociological theories of food and analysing food education in two pioneering countries Japan and France The book focuses on taste education and gastronomy as two key concepts which have great potential to positively impact food education Taste education is a promising alternative to nutrition centred pedagogy which foregrounds the experience and pleasure of eating food creating an environment for taste sensibility and food curiosity From taste education the picture can be broadened to examine the role and impact of gastronomy in food education Examining the cultural traditions of France and Japan reveals how gastronomy can impact eating habits and food cultures and how these criteria should be an intrinsic part of food education The book concludes by constructing an integrative theory for food education that moves beyond nutrition centred education for the benefit of one s well being This book will greatly interest students scholars policymakers and educators working on food education food related issues at the intersection between nutritional and social sciences and gastronomes searching for a pedagogical guide for developing their capabilities to eat in a more humanistic way

Au Revoir to All That Michael Steinberger,2009-06-01 Au Revoir to All That takes us on an entertaining and intriguing journey into France s identity directly through the tastebuds Offering a fresh and entertaining approach to understanding French history through its food and wine Steinberger reveals a radically changing France a country moving through social and political reform economic crises and importantly the loss of their seemingly unbreakable dominance in all things gastronomical If the state of France s celebrated cuisine is the bellwether for the state of the nation things are looking bleak Top chefs are renouncing their Michelin stars and prized farmhouse cheeses are going extinct because there is no one to make them Bistros brasseries and caf s fold by the scores and hypermarkets and superstores account for 75% of retail food sales The famed wine producing Languedoc is home to the world s first wine terrorist organization winemakers resorting to violence to protect their struggling industry But while there may be better baguettes in Tokyo than in Paris and Spain has become the darling of the gastronomic world there are glimpses of hope There are up and coming culinary stars and outdoor food festivals pockets of exuberance amid the gloom And as long as a praline millefeuille can be celebrated savoured and allowed to assume talismanic qualities at a Right Bank tea salon all is not lost Au Revoir to All That is an essential almost edible book for lovers of food France and culinary history **Slow Food**

Carlo Petrini,2004-10-06 Discusses the history and spread of the International Slow Food Movement which was sparked in 1986 when Carlo Petrini organized a protest against plans to build a McDonald s fast food restaurant near the Spanish Steps

Building a Meal Hervé This, 2009-03-13 An internationally renowned chemist, popular television personality and bestselling author, Hervé This heads the first laboratory devoted to molecular gastronomy: the scientific exploration of cooking and eating. By testing recipes that have guided cooks for centuries and the various dictums and maxims on which they depend, Hervé This unites the head with the hand in order to defend and transform culinary practice. With this new book, Hervé This's scientific project enters an exciting new phase. Considering the preparation of six bistro favorites—hard-boiled egg with mayonnaise, simple consommé, leg of lamb with green beans, steak with French fries, lemon meringue pie, and chocolate mousse—he isolates the exact chemical properties that tickle our senses and stimulate our appetites. More important, he connects the mind and the stomach, identifying methods of culinary construction that appeal to our memories, intelligence, and creativity. By showing that the creation of a meal is as satisfying as its consumption, Hervé This recalibrates the balance between food and our imaginations. The result is a revolutionary perspective that will tempt even the most casual cooks to greater flights of experimentation.
