European Armies of the French Revolution, 1789-1802 Frederick C. Schneid, 2015-05-26 Upon France's defeat of the vaunted Prussian army at the Battle of Valmy in 1792 German author Johann Wolfgang von Goethe remarked "From this place and from this day forth commences a new era in the world's history. The pronouncement proved prescient for this first major victory emboldened France's revolutionary government to end the monarchy and establish the first French Republic with dramatic consequences for the wars that soon roiled the continent. In nine essays by leading scholars *European Armies of the French Revolution 1789-1802* provides an authoritative continent-wide analysis of the organization and constitution of these armies, the challenges they faced, and the impact they had on the French Revolutionary Wars and on European military practices. The volume opens with editor Frederick C. Schneid's substantial introduction which reviews the strategies and policies of each participating state throughout the wars, establishing a clear context for the essays that follow. Drawing on the latest research and thought, each contributor focuses on the army of a particular power: France, Prussia, Austria, Russia, Britain, Spain, the German principalities, the Italian states, and the Ottoman Empire. Their essays examine the system, tactics, operations, and strategies that each army adopted and developed in the Revolutionary Wars. The authors explore the conflicts' wider influence on these policies and practices, along with significant battles and actions. Unique in its approach and reach, this volume offers a thorough and closely observed view of the composition, scope, and purpose of the European armies at the turn of the nineteenth century. It enhances and extends our insights into how the military powers of the post-French Revolutionary era and thus the era itself took shape.

*The Study of Indo-European Vocalism in the 19th century* Wilbur A. Benware, 1974-01-01 In the 19th century, research on the Indo-European languages was to a large degree coterminous with the development of linguistics itself. The most notable accomplishments as related in every history of linguistics took place in the area of phonology. The present study examines one aspect of phonological investigation of the Indo-European languages: vocalism from the early 1800s to around 1870, the threshold of the neogrammarian era. It attempts to go beyond a mere chronological presentation of research on vocalism in the 19th century to examine other questions such as the origin of the concepts which linguists employed and the methodology they advanced. Moreover, it attempts to illustrate anew that the history of any science cannot be reduced to a simple linear arrangement of discoveries.

*New Directions in European Historiography* Georg G. Iggers, 1984-07 Impressive analytical essays on the transformation of historical studies in Europe. In four impressively researched essays, Georg Iggers recounts the transformation of historical studies in Europe during the twentieth century, with particular emphasis on the historiography of the past fifteen years. Although the book does survey a broad area of contemporary historical thought, it is primarily a careful analytical examination of the methodological and theoretical reorientation of certain influential European historians. The first essay discusses the emergence at German Universities during the eighteenth and nineteenth centuries of the concept of history as a scientific discipline distinct from

the classical tradition of literary history and the later broad acceptance of this mode of Enquiry in the Western world Against this background Mr Iggers then considers the challenge to this mode of the political social and intellectual upheavals of the twentieth century especially after World War II The three essays following examine important attempts to develop alternate paradigms for historical study the French historians of the Annales tradition the German political historians of the 1960s the various Marxist historians of France Poland East Germany and Great Britain In despite of the frequent insistence by philosophers and theorists of history that history is not a science in contemporary terms historians themselves have striven in recent years to strengthen the quantitative aspects of historical study moving away from traditional patterns of writing and adopting methods and concepts from the systematic social sciences Mr Iggers book is an excellent introduction to these contemporary changes in historiography and in its comparative analyses itself makes a contribution to historical studies

*Sex, France, and Arab Men, 1962-1979* Todd Shepard, 2018-01-08 The aftermath of Algeria s revolutionary war for independence coincided with the sexual revolution in France and in this book Todd Shepard argues that these two movements are inextricably linked Sex France and Arab Men is a history of how and why from the upheavals of French Algeria in 1962 through the 1970s highly sexualized claims about Arabs were omnipresent in important public French discussions both those that dealt with sex and those that spoke of Arabs Shepard explores how the so called sexual revolution took shape in a France profoundly influenced by the ongoing effects of the Algerian revolution Shepard s analysis of both events alongside one another provides a frame that renders visible the ways that the fight for sexual liberation usually explained as an American and European invention developed out of the worldwide anticolonial movement of the mid twentieth century

**Comparative and Transnational History** Heinz-Gerhard Haupt, Jürgen Kocka, 2012 Since the 1970s West German historiography has been one of the main arenas of international comparative history It has produced important empirical studies particularly in social history as well as methodological and theoretical reflections on comparative history During the last twenty years however this approach has felt pressure from two sources cultural historical approaches which stress microhistory and the construction of cultural transfer on the one hand global history and transnational approaches with emphasis on connected history on the other This volume introduces the reader to some of the major methodological debates and to recent empirical research of German historians who do comparative and transnational work

**Tracing the Trails in the Medieval World** Albrecht Classen, 2020-10-11 Every human being knows that we are walking through life following trails whether we are aware of them or not Medieval poets

from the anonymous composer of Beowulf to Marie de France Hartmann von Aue Gottfried von Strassburg and Guillaume de Lorris to Petrarch and Heinrich Kaufringer predicated their works on the notion of the trail and elaborated on its epistemological function We can grasp here an essential concept that determines much of medieval and early modern European literature and philosophy addressing the direction which all protagonists pursue as powerfully illustrated also by the anonymous poets of Herzog Ernst and Sir Gawain and the Green Knight Dante s Divina Commedia in fact proves to be one of the most explicit poetic manifestations of the fundamental idea of the trail but we find strong parallels also in powerful contemporary works such as Guillaume de Deguileville s Plerinage de la vie humaine and in many mystical tracts
