Liu,2005-07-05 As China has blended market reforms with comprehensive industrial policies most research has focused on the national government's strategies for economic growth. However, one of the unique characteristics of industrial policy in China is that it involves government intervention at all levels from the political elite all the way down to village leaders. This book focuses on the domestic appliance industry and China's three major business groups in this area: Haier, Hisense, and Aucma. The Haier Group in particular is one of the most successful and competitive enterprises in China and is very well placed to compete globally as the Chinese economy becomes more integrated with the world trading system. This volume shows how industrial policy is formulated at the national level and implemented at the local level and examines how local government frequently intervenes in local enterprises' business strategy and management. Of practical importance, this book provides academics, business people, and policy makers with valuable insights into the development process and a concrete understanding of the challenges faced in the global business revolution by one of the world's most dynamic economies.

**Annual Report of the President of the United States on the Trade Agreements Program** United States.

President,1981     Restructuring the French Economy William James Adams,2010-12-01 At the end of World War II, experts on both sides of the Atlantic believed that France was doomed to economic stagnation. French culture and institutions, they argued, inhibited the changes in economic structure that sustained growth would require. But in spite of these predictions and the occasional volatility of the world economy, the French economy grew rapidly. Only the Japanese of the major economies has grown faster, and by 1975 the French standard of living matched that of West Germany. Restructuring the French Economy looks at the four decades of the structural changes that fostered growth and explores explanations of why such changes occurred. Drawing on many and diverse primary materials, including government statistics, judicial decisions, and professional memoirs, Adams examines three different explanations of France's postwar economic success. The first downplays the extent of structural change during the surge of growth. The second emphasizes the importance of government policies to compensate for inadequate private initiative. The third suggests that European economic integration and French decolonization created enough market competition to push the private sector into its own restructuring. Adams stresses that if government initiatives worked well, they did so in an environment of strong market competition; if competition seemed to work wonders, it occurred only as a result of government actions. He also devotes considerable attention to the implications of his findings for U.S. policy concerning European protectionism and the health and growth of American industries.     **French Politics and Society** Alistair Cole,2017-04-21 French Politics and Society is the ideal companion for all students of France and French politics with a strong reputation for its lucidity and lively exposition of the French polity. This third edition remains a highly readable text and offers a broad critical and comprehensive understanding of French politics. The book provides an excellent description of French institutions and ensures readers access to background information through discussing historical developments, political forces, public policy, and the evolution of important aspects of French society. Key

updates for the third edition include extensive updates including the Chirac Sarkozy and Hollande presidencies inclusion of constitutional and state reform coverage since 2008 the French party system and evolution of the French left and right more on France's positioning with regards to Brussels and the impact of the European economic crisis French Politics and Society is essential reading for all undergraduates studying French politics French studies European studies or comparative politics
