**Gender and French Identity after the Second World War, 1944-1954** Kelly Ricciardi Colvin, 2017-09-07 The enfranchisement of women in Charles de Gaulle s France in 1944 is considered a potent element in the nation s self crafted triumphant World War Two narrative the French conquered by the Germans valiantly resisted until they rescued themselves and built a new democracy honoring France s longstanding liberal traditions Kelly Ricciardi Colvin s Gender and French Identity after the Second World War 1944 1954 calls that potent element into question By analyzing a range of sources including women s magazines trials memoirs and spy novels this book explores the ways in which culture was used to limit the power of the female vote It exposes a wide network of constructed behavioral norms that supported a conservative vision of French identity Taken together they depicted men as virile Resisters for French democracy and history and women as solely domestic support Indeed Colvin shows that women s access to the vote emerged alongside an explosion of cultural messages that encouraged them to retreat into the home to find mates to have millions of beautiful babies in the words of de Gaulle and not to challenge patriarchy in any way This is a vital study for understanding the nature of postwar France and women s history in 20th century Europe

**National Identities in France** Brian Sudlow, 2011-12-31 National Identities in France explores nationalism national identities and the various ways in which these concepts are accepted adapted discarded or internally disputed across ideological divides The popular assumption that automatically regards nationalism as a largely right wing concern occludes the many ways in which nationalism and national identities have contributed to social imagination and political or literary discourses across the right left spectrum The critical grounds on which such reflections are undertaken are rich and varied The idea of invented traditions has long suggested how such a thing as the modern nation state could vest itself in the creatively assembled robes of a dim and distant past In plotting the ground on which nationalisms are located previous studies have shown among other things the uses and limitations of the distinction of ethnic and civic nationalism Studies on national development reveal the imitative process that brought about nation building in former colonies of the Western powers Each chapter asks important

questions concerning nationalism and national identities in relation to France With nationalism apparently stable distinctions collapse under the pressure of French national identity The signs are that French national identities and nationalisms are in a constant state of reinvention and negotiation of periodic crisis and constant rebirth If political classes attempt to manipulate national identity for some larger project they have no monopoly on the social imaginary National mobilization is a multiple and polysemic process not a univocal and rigid ideology

**Military Power, Conflict and Trade** Michael P. Gerace, 2004-06-01 Wherever international commerce flows in world politics military power often flows with it sometimes as a protector of commerce sometimes as its promoters and sometimes as a tool of aggression against it How are military power and international trade

related Do military power and commerce expand together or does military power decline as commerce and perhaps interdependence increases Does this relationship vary across countries and if so how Power Conflict and Trade is a study of the relationship between military power and international commerce among the Great Powers prior to World War I After building an argument for a direct relationship between military power and commerce one grounded in a mercantilist view of state power and exploring their numerous connections the book estimates models of the relationship among the Great Powers and explores a great deal of their commercial and military data all of which is situated in the context of their mutual rivalries Another question investigated is whether the peacetime conflicts and rivalries of the Great Powers affected their trade relations adversely There is strong support for the argument that military power and commerce move together in world politics though there is evidence for an inverse relationship as well
