Knowledge Economy and the City Ali Madanipour,2013-03-01 This book explores the relationship between space and economy the spatial expressions of the knowledge economy The capitalist industrial economy produced its own space which

differed radically from its predecessor agrarian and mercantile economies. If these spatial expressions do exist even if in incomplete and partial forms they are likely to be the model for the future of cities.

Weaving Complementary Knowledge Systems and Mindfulness to Educate a Literate Citizenry for Sustainable and Healthy Lives Małgorzata Powietrzyńska, Kenneth Tobin, 2017-11-14. Weaving Complementary Knowledge System and Mindfulness to Educate a Literate Citizenry for Sustainable and Healthy Lives contains 24 chapters written by 33 authors from 9 countries. The book which consists of two sections on mindfulness in education and wellness is intended for a broad audience of educators, researchers and complementary medicine practitioners. Members of the general public may find appeal and relevance in chapters that advocate transformation in a number of spheres including K-12 schools, museums, universities, counselling and everyday lifestyles. Innovative approaches to education involving meditation and mindfulness produce numerous advantages for participants in schools, museums and a variety of self-help contexts of everyday life. In several striking examples, critical stances address a bandwagon approach to the application of mindfulness often by for-profit companies to purportedly improve quality of education in contexts where learning has been commodified and ideologies such as neoliberalism have been mandated by politicians and implemented by policy makers. In different international contexts, Buddhist roots of mindfulness are critically reviewed by a number of authors. Chapters on wellness focus on complementary practices including art therapy, Jin Shin Jyutsu, Iridology and yoga. Foci in the wellness section include sexual health, prescription drug addiction, obesity, diabetes, cancer and a variety of common ailments that can be addressed using complementary medicine. New theories such as a polyvagal theory provide scope for people to become aware of their bodies in different ways and maintain wellbeing through changes in lifestyle, heightened self-awareness and self-help.
