hope of obtaining a comprehensive and coherent understanding of the human condition we must somehow weave together the biological sociological and psychological components of human nature and experience And this cannot be done indeed it is difficult to even make sense of an attempt to do it without first settling our accounts with Darwin Marx and Freud The legacy of these three thinkers continues to haunt us in other ways as well Whatever their substantive philosophical differences in other respects Darwin Marx and Freud shared a common overriding intellectual orientation they taught us to see human things in historical developmental terms Philosophically questions of being were displaced in their works by questions of becoming Methodologically genesis replaced teleological and essentialist considerations in the explanatory logic of their theories Darwin Marx and Freud were above all theorists of conflict dynamism and change They emphasized the fragility of order and their abiding concern was always to discover and to explicate the myriad ways in which order grows out of disorder For these reasons their theories constantly confront and challenge the cardinal tenet of our modern secular faith the notion of progress To be sure their emphasis on conflict and the flux of change within the flow of time was not unprecedented its origins in Western thought can be traced back at least as far as Heraclitus

**Marx and Ethics** Philip J. Kain, 1988 This book traces the development of Marx's ethics as they underwent various shifts and changes during different periods of his thought In his early writings his ethics are based on a concept of essence much like Aristotle's which Marx tries to link to a principle of universalization similar to Kant's categorical imperative In the period 1845-6 Marx abandoned this view holding morality to be incompatible with his historical materialism In the later writings Marx is less of a determinist and he no longer wants to reject morality However he does want to transcend a morality of burdensome obligation and constraint so as to realize a community built upon spontaneous bonds of solidarity

**Marxism and Morality** Nicholas Churchich, 2022-04-28 Not himself a Marxist Dr Churchich has nevertheless won plaudits for this book from those committed to the philosophy It is they acknowledge thoroughly researched well reasoned and balanced in its argument even if that argument is one with which Marxists are bound to disagree being based on the premise that ethical theories must ultimately rest on metaphysical and psychological preconceptions rather than on some imaginary empirical facts The declared aim of this work is to present a full exposition of Marx's and Engels' ideas on morality and ethics and to indicate some of their errors and weaknesses Unlike other studies of this subject Churchich analyses all major aspects of morality dealing not only with the writings of Marx himself but also with the works of most writers who have commented on Marxist morality and ethics Marx himself intended to produce a work on social morality but did not manage to do so This book will therefore and without doubt become the standard work on his view of the subject Superior to anything else on the topic written by non Marxists it is clearer on some aspects of Marx's view than the work of some Marxist writers Churchich

makes obvious for instance how great was Althusser's mistake in arguing that there is not a grain of normative ethics in mature Marx. Yet the author's objectivity allows him also to find values among the ethical arguments of Marx and Engels making this a book which both Marxists and concerned Anglicans would find useful as a criticism of some current social trends. It also sounds a cautionary note for those who argue that the collapse of bureaucratic socialism in the former Soviet Union means the end of Marxism too; this is by no means Dr Churchich's view.

Karl Marx and Friedrich Engels (RLE Marxism) Cecil L. Eubanks, 2015-04-17 The project to publish the works of Marx and Engels continues and this book published in 1984 puts together a comprehensive bibliography of their works either written in or translated into English including books, monographs, articles, chapters and doctoral dissertations together with the works of their interpreters. The inclusion of the secondary literature makes this a particularly valuable bibliography and contributes greatly to the understanding of the thought of Marx and Engels.

**Marxism, Morality, and Social Justice** Rodney G. Peffer, 2014-07-14 The interpreter of Marx's writings faces the task of reconciling on the one hand Marx's frequent explicit condemnations and criticisms of morality and on the other the obvious way in which his world view reflects substantive moral judgments. In this book R. G. Peffer tackles the challenges of finding in Marx's work an implicit moral theory of answering claims that Marxism is incompatible with morality and of developing the outlines of an adequate Marxist moral and social theory. Peffer analyzes the moral components of Marx's thought and considers all the major interpretations of his moral perspective; he concludes that Marx is a mixed deontologist who is most committed to a maximum system of equal freedoms both positive and negative. He then utilizes contemporary metaethical theory to show that Marxism is compatible with morality in general and with the concepts of justice and rights in particular. Peffer proposes a radically egalitarian theory of social justice which subsumes Marx's own moral theory and a minimal set of Marxist empirical theses which together entail the Marxist's basic normative political positions. This book demonstrates that contemporary analytic political philosophy is invaluable for coming to terms with Marxism and that it is only Marx's less abstract empirical theories about classes and class struggle, the dysfunctions of capitalism and the possibility of creating democratic self-managing postcapitalist societies that are needed for the development of an adequate Marxist moral and social theory. *Freud and Nietzsche* Paul-Laurent Assoun, 2006-12-12 Many of the leading Freudian analysts including in the early days Jung, Adler, Reich and Rank attempted to link the writings of Nietzsche with the clinical work of Freud. But what was Nietzsche to Freud: an intuitive anticipation, a precursor, a rival psychologist? Assoun moves beyond the seduction of these

attractive analogues to a deeper analysis of the relation between these two figures      Moral Voices, Moral Selves Susan J. Hekman, 1995 In her landmark 1982 study *In a Different Voice* Carol Gilligan argues that there is not only one true moral voice but two one masculine one feminine Moral values and concerns associated with a feminine outlook are relational rather than autonomous they depend upon interaction with others Susan J Hekman argues that the approach to morality suggested by Gilligan s work marks a radically new departure in moral thinking In a far reaching examination and critique of Gilligan s theory Hekman seeks to deconstruct the major traditions of moral theory that have been dominant since the Enlightenment She challenges the centerpiece of that tradition the disembodied autonomous subject of modernist philosophy Hekman argues that the logic of Gilligan s approach entails multiple moral voices not just one or even two and that factors other than gender class race and culture are constitutive of moral voice Using the work of Wittgenstein and Foucault she outlines the parameters of a discursive morality and its implications for feminism and moral theory      **The Moral Philosophers** Richard J. *Moral Education* Colin Wrings, 2006-02-14 Casual reference to moral education or the manner in which young people should be brought up to behave may provoke a range of responses depending on the context and the personalities and ideological perspectives of those present In the past these responses sometimes included a Rousseauesque assertion of the inherent goodness of all human beings which only needed to be left to emerge uncorrupted and undistorted with the help of infinite loving kindness on the part of teachers all with the patience of saints More extreme versions of this view may have comprised vehement protest at the very idea of the state through its educational institutions concerning itself at all with such matters which were felt to be properly the province of the family or religious organisations if not a matter of individual choice for young people themselves when they were grown up Explicit proposals for moral education were invariably at risk of being perceived as indoctrination or an abuse of children's rights of freedom and autonomous development More frequently these days the response may be a succinct list of the speaker's own choice moral prescriptions an assertion that these need to be inculcated in a clear and unequivocal way to all young people of whatever age inclination or social experience and often enough a statement of the sanctions to be applied to those who do not or will not conform
